WARNING

Warnings appear where overlooked details may cause damage to the equipment or result in personal injury. Warnings should be taken seriously.

CAUTION

Cautionary messages should be heeded to help reduce the chance of losing data or damaging the product.

NOTE

These messages inform the reader of essential but non-critical information. These messages should be read carefully as any directions or instructions contained therein can help avoid making mistakes.

HOT SURFACE

This symbol indicates a hot surface that should not be touched without taking care.

Introduction

1.1 Introduction

Figure 1-1: KINO-AQ170 Industrial Motherboard

The KINO-AQ170 series is a Mini-ITX form factor industrial motherboard. It has an LGA 1156 socket that supports Intel® Core™ i7/i5/i3, Pentium® or Celeron® processor. It also equipped with two 260-pin 2133 MHz dual-channel DDR4 SDRAM SO-DIMM slots supporting up to 64 GB of memory.

The KINO-AQ170 series includes an internal DisplayPort connector, an HDMI 2.0 port, an HDMI/DP port and a VGA connector for triple independent display.

Expansion and I/O include one full-size/half-size PCIe Mini slot supporting mSATA modules, one PCIe x8 slot for expansion, four USB 3.0 connectors plus two USB 2.0 connectors on the rear panel and four SATA 6Gb/s connectors. Serial device connectivity is provided by four internal RS-232 connectors and two internal RS-232/422/485 connectors. Two RJ-45 GbE connectors provide the system with smooth connections to an external LAN.

1.2 Features

Some of the KINO-AQ170 motherboard features are listed below:

- Mini-ITX motherboard supports Intel® Core™ i7/i5/i3, Pentium® or Celeron® processor
- Two 2133 MHz DDR4 SO-DIMM slots support up to 64 GB of memory
- Triple independent display via HDMI 2.0, HDMI/DP 1.2, VGA and iDP interface
- Supports HDMI 2.0 (4096x2160 @ 60Hz)
- Dual Intel® GbE port supporting Intel® AMT 11.0
- One full-size/half-size PCIe Mini card slot supports mSATA module
- Four SATA 6Gb/s connectors with RAID 0/1/5/10 support
- Four USB 3.0 external connectors
- Four internal RS-232 connectors and two internal RS-232/422/485 connector
- IEI One Key Recovery solution allows you to create rapid OS backup and recovery

1.3 Connector

The connectors on the KINO-AQ170 are shown in the figures below.

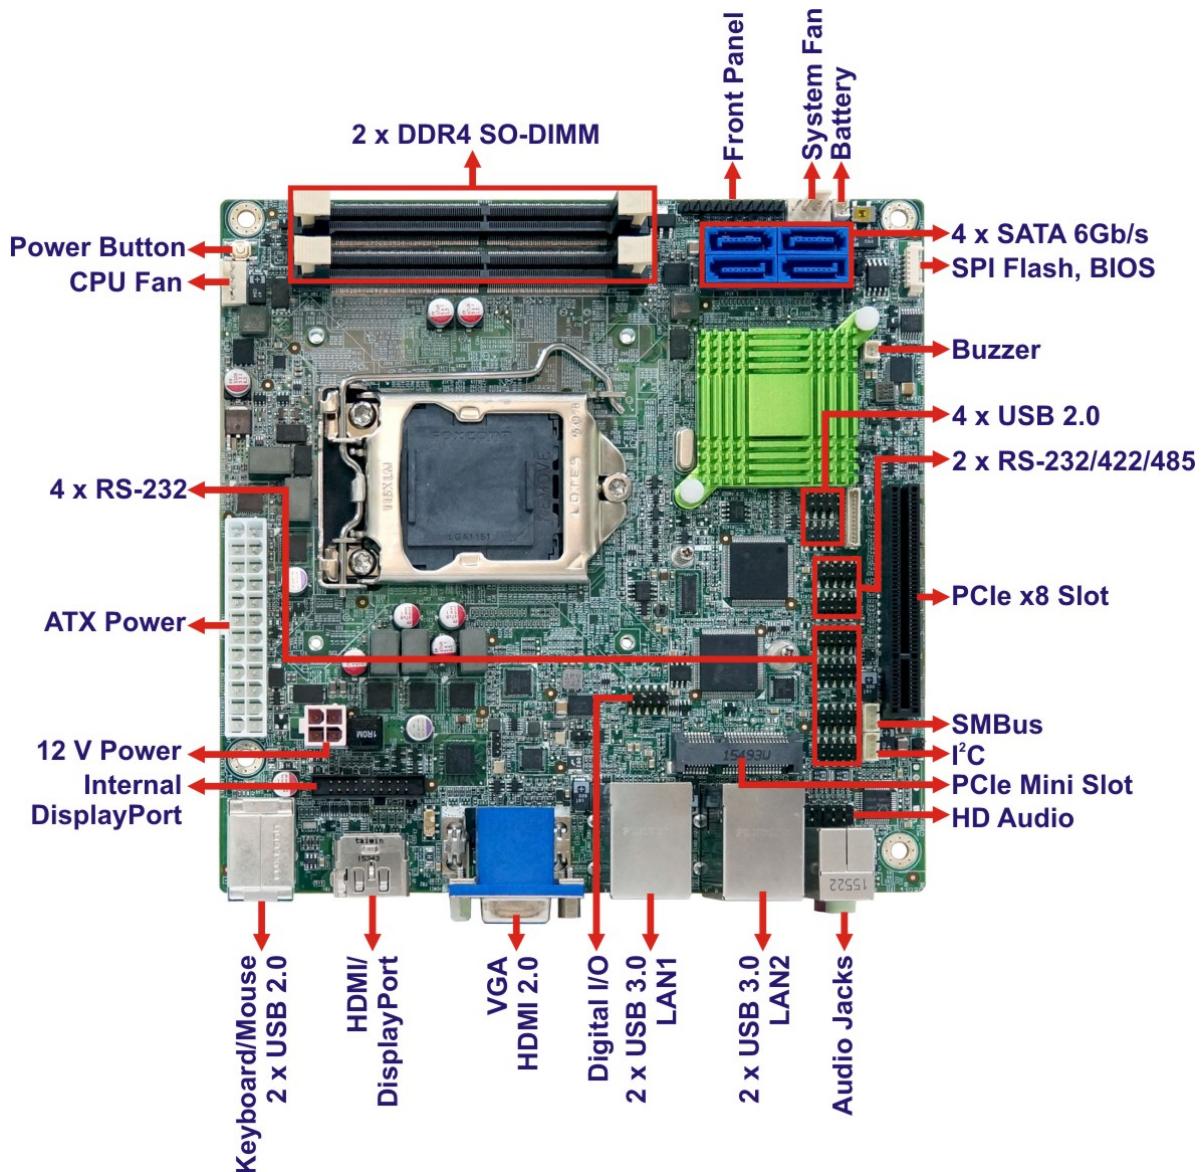

Figure 1-2: Connectors (Front Side)

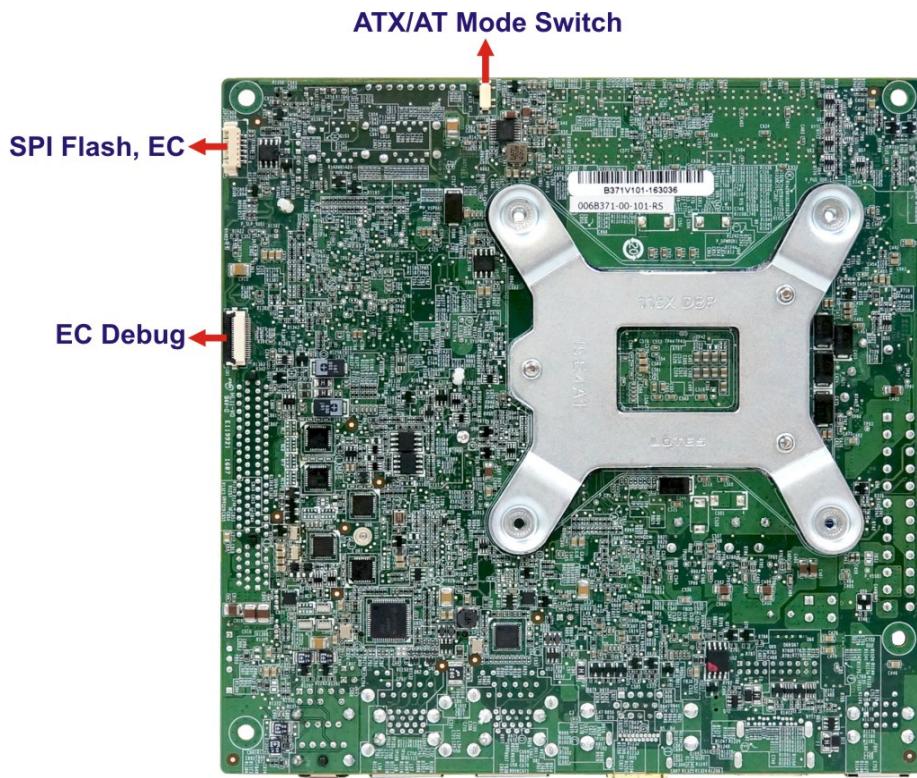

KINO-AQ170 Industrial Motherboard

Figure 1-3: Connectors (Solder Side)

1.4 Dimensions

The dimensions of the board are listed below:

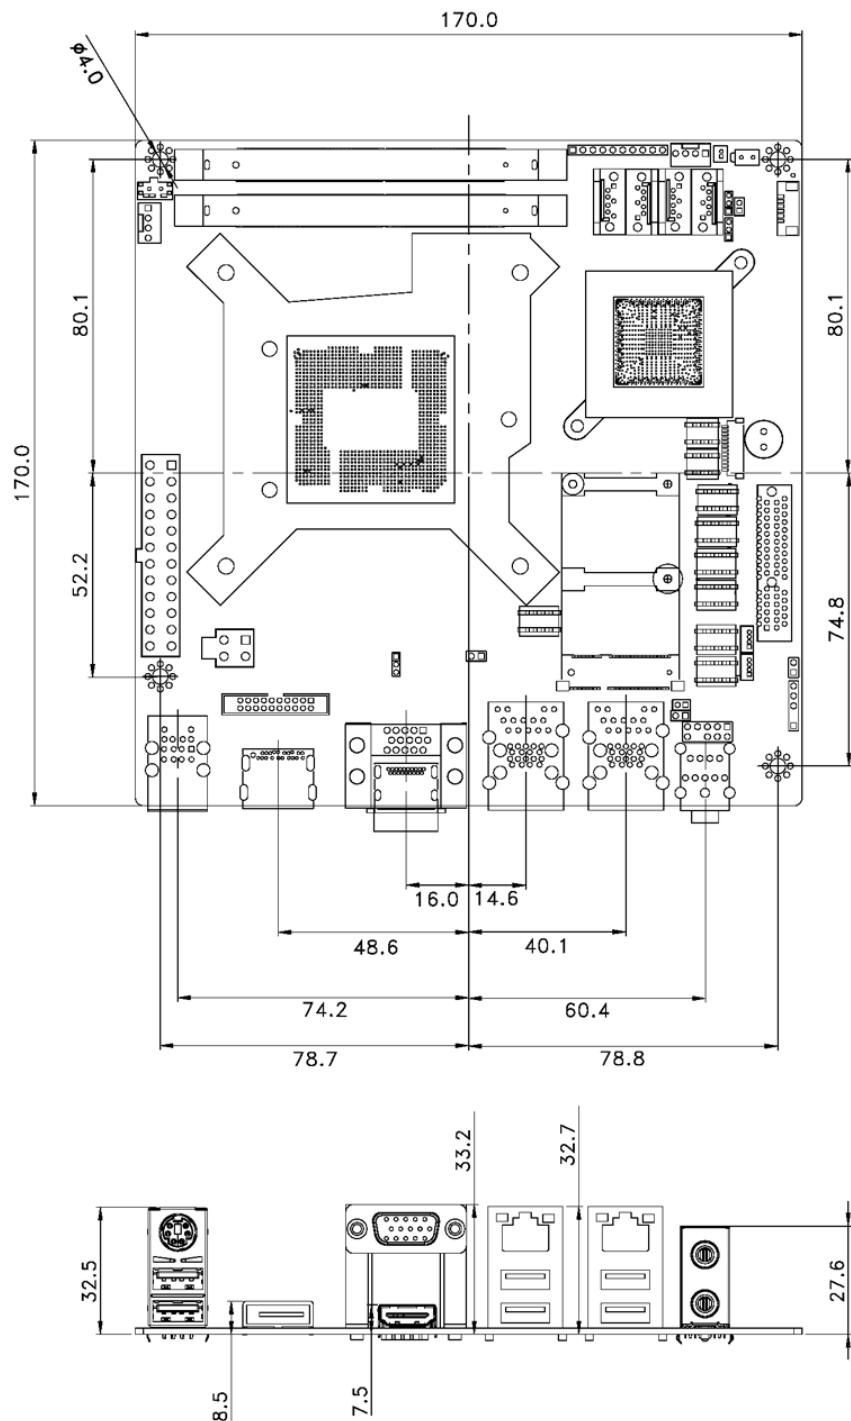

Figure 1-4: Dimensions (mm)

KINO-AQ170 Industrial Motherboard

1.5 Data Flow

Figure 1-5 shows the data flow between the system chipset, the CPU and other components installed on the motherboard.

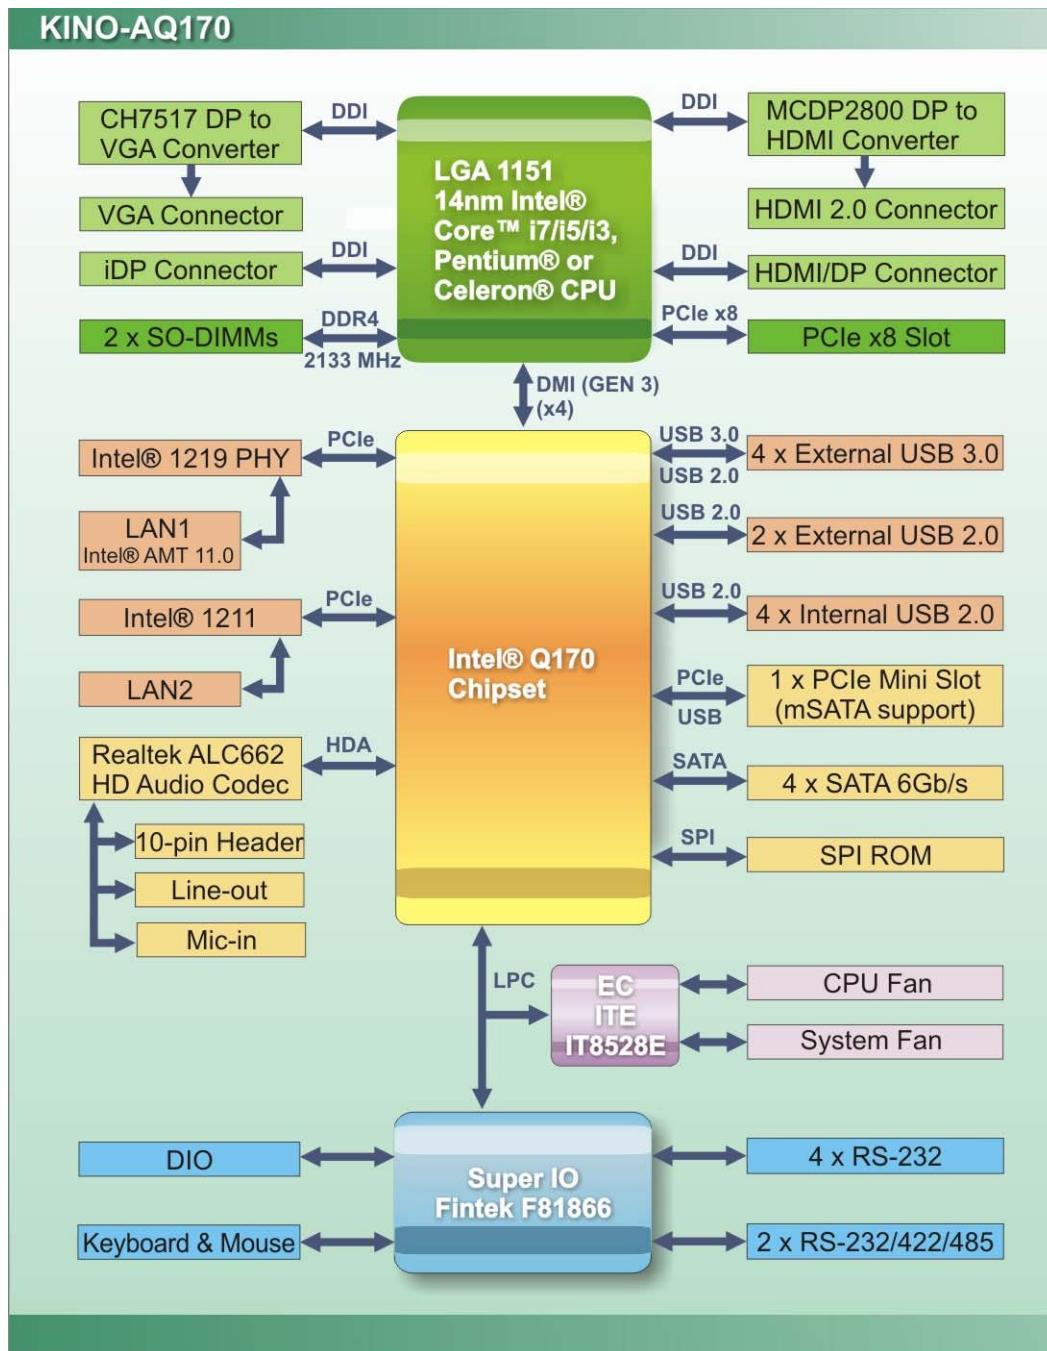

Figure 1-5: Data Flow Diagram

1.6 Technical Specifications

KINO-AQ170 technical specifications are listed below.

Specification	KINO-AQ170
Form Factor	Mini-ITX
CPU	LGA 1151 socket supports 6 th generation Intel® Core™ i7/i5/i3, Pentium® and Celeron® processors
Chipset	Intel® Q170
BIOS	AMI BIOS
Memory	Two 260-pin 2133 MHz dual-channel DDR4 SO-DIMM slots (system max. 64 GB)
Graphics	9 th generation Intel® HD Graphics with 16 low-power execution units, supporting DX11, DX12, OpenGL 4.3/4.4 and ES 2.0 decode/encode for HEVC, VP8, VP9, VDENC
Display Output	Triple independent display 1 x HDMI 2.0 by MCDP2800-BB DP to HDMI converter (up to 4096x2160 @ 60Hz) 1 x HDMI/DP (DP 1.2 up to 3840x2160 @ 60Hz; HDMI 1080p) 1 x VGA by CH7517 DP to VGA converter (up to 1920x1200) 1 x iDP interface for HDMI, LVDS, VGA, DVI, DP (up to 2560x1600 @ 60Hz)
Ethernet	LAN1: Intel® I219-LM PHY with Intel® AMT 11.0 support LAN2: Intel® I211-AT PCIe GbE controller with NCSI support
Super IO	Fintek F81866D-I
Embedded Controller	ITE IT8528E/FX
Audio	Realtek ALC662 HD codec
Watchdog Timer	Software programmable support 1~255 sec. system reset
I/O Interface	
Audio Connector	2 x Audio jacks (line-out and mic-in) 1 x Audio connector by 10-pin (2x5) header

KINO-AQ170 Industrial Motherboard

Specification	KINO-AQ170
Digital I/O	8-bit digital I/O by 10-pin (2x5) header
Ethernet	2 x RJ-45 GbE port
Keyboard/Mouse	1 x PS/2 keyboard/mouse connector
Serial Ports	4 x RS-232 by 10-pin (2x5) header 2 x RS-232/422/485 by 10-pin (2x5) header
USB Ports	4 x USB 3.0 on rear I/O 2 x USB 2.0 on rear I/O 4 x USB 2.0 by 8-pin (2x4) header
Front Panel	1 x Front panel connector by 10-pin (1x10) wafer (supports power LED, HDD LED, speaker, power button and reset button)
LAN LED	2 x LAN link LED connector by 2-pin header
Fan	1 x CPU fan connector by 4-pin (1x4) wafer 1 x System fan connector by 4-pin (1x4) wafer
SMBus	1 x SMBus connector by 4-pin (1x4) wafer
I²C	1 x I ² C connector by 4-pin (1x4) wafer
Storage	4 x SATA 6Gb/s port (with RAID 0/1/5/10 support)
Expansion	1 x Full-size/Half-size PCIe Mini card slot (with mSATA support) 1 x PCIe x8 slot (PCIe Spec. 3.0)
Environmental and Power Specifications	
Power Supply	AT/ATX power
Power Consumption	3.3V@1.62A, 5V@3.54A, 12V@8.17A, 5VSB@3.6A (Intel® Core™ i7 6700K 4.0GHz CPU with 16 GB (two 8 GB) 2133 MHz DDR4 memory)
Operating Temperature	-20°C ~ 60°C
Storage Temperature	-30°C ~ 70°C
Humidity	5% ~ 95%, non-condensing
Physical Specifications	

Specification	KINO-AQ170
Dimensions	170 mm x 170 mm
Weight GW/NW	900 g / 450 g

Table 1-1: Technical Specifications

2

Unpacking

2.1 Anti-static Precautions

WARNING!

Static electricity can destroy certain electronics. Make sure to follow the ESD precautions to prevent damage to the product, and injury to the user.

Make sure to adhere to the following guidelines:

- **Wear an anti-static wristband:** Wearing an anti-static wristband can prevent electrostatic discharge.
- **Self-grounding:** Touch a grounded conductor every few minutes to discharge any excess static buildup.
- **Use an anti-static pad:** When configuring any circuit board, place it on an anti-static mat.
- **Only handle the edges of the PCB:** Don't touch the surface of the motherboard. Hold the motherboard by the edges when handling.

2.2 Unpacking Precautions

When the KINO-AQ170 is unpacked, please do the following:

- Follow the antistatic guidelines above.
- Make sure the packing box is facing upwards when opening.
- Make sure all the packing list items are present.

2.3 Packing List

NOTE:

If any of the components listed in the checklist below are missing, do not proceed with the installation. Contact the IEI reseller or vendor the KINO-AQ170 was purchased from or contact an IEI sales representative directly by sending an email to sales@ieiworld.com.

The KINO-AQ170 is shipped with the following components:

Quantity	Item and Part Number	Image
1	KINO-AQ170 industrial motherboard	
2	SATA cable, 500 mm	
1	I/O shielding	
1	Utility CD	
1	One Key Recovery CD	

1	Quick Installation Guide	
---	--------------------------	---

2.4 Optional Items

The following are optional components which may be separately purchased:

Item and Part Number	Image
Dual USB cable (wo bracket), 210 mm, p=2.0 (P/N: 32000-070301-RS)	
RS-232 cable, 200 mm (P/N : 32200-000049-RS)	
CPU cooler (P/N: CF-1156A-RS-R11)	
LGA1155/LGA1156 Cooler kit (45W) (P/N: CF-1156C-RS)	
LGA1155/LGA1156 Cooler kit (65W) (P/N: CF-1156D-RS)	
LGA1155/LGA1156 cooler kit (95W) (P/N: CF-1156E-R11)	

KINO-AQ170 Industrial Motherboard

Item and Part Number	Image
DisplayPort to DisplayPort converter board for IEI iDP connector (P/N: DP-DP-R10)	
DisplayPort to DVI-D converter board for IEI iDP connector (P/N: DP-DVI-R10)	
DisplayPort to 24-bit dual-channel LVDS converter board for IEI iDP connector (P/N: DP-LVDS-R10)	
DisplayPort to VGA converter board for IEI iDP connector (P/N: DP-VGA-R10)	
DisplayPort to HDMI converter board for IEI iDP connector (P/N: DP-HDMI-R10)

Connectors

3.1 Peripheral Interface Connectors

This chapter details all the jumpers and connectors.

3.1.1 KINO-AQ170 Layout

The figures below show all the connectors and jumpers.

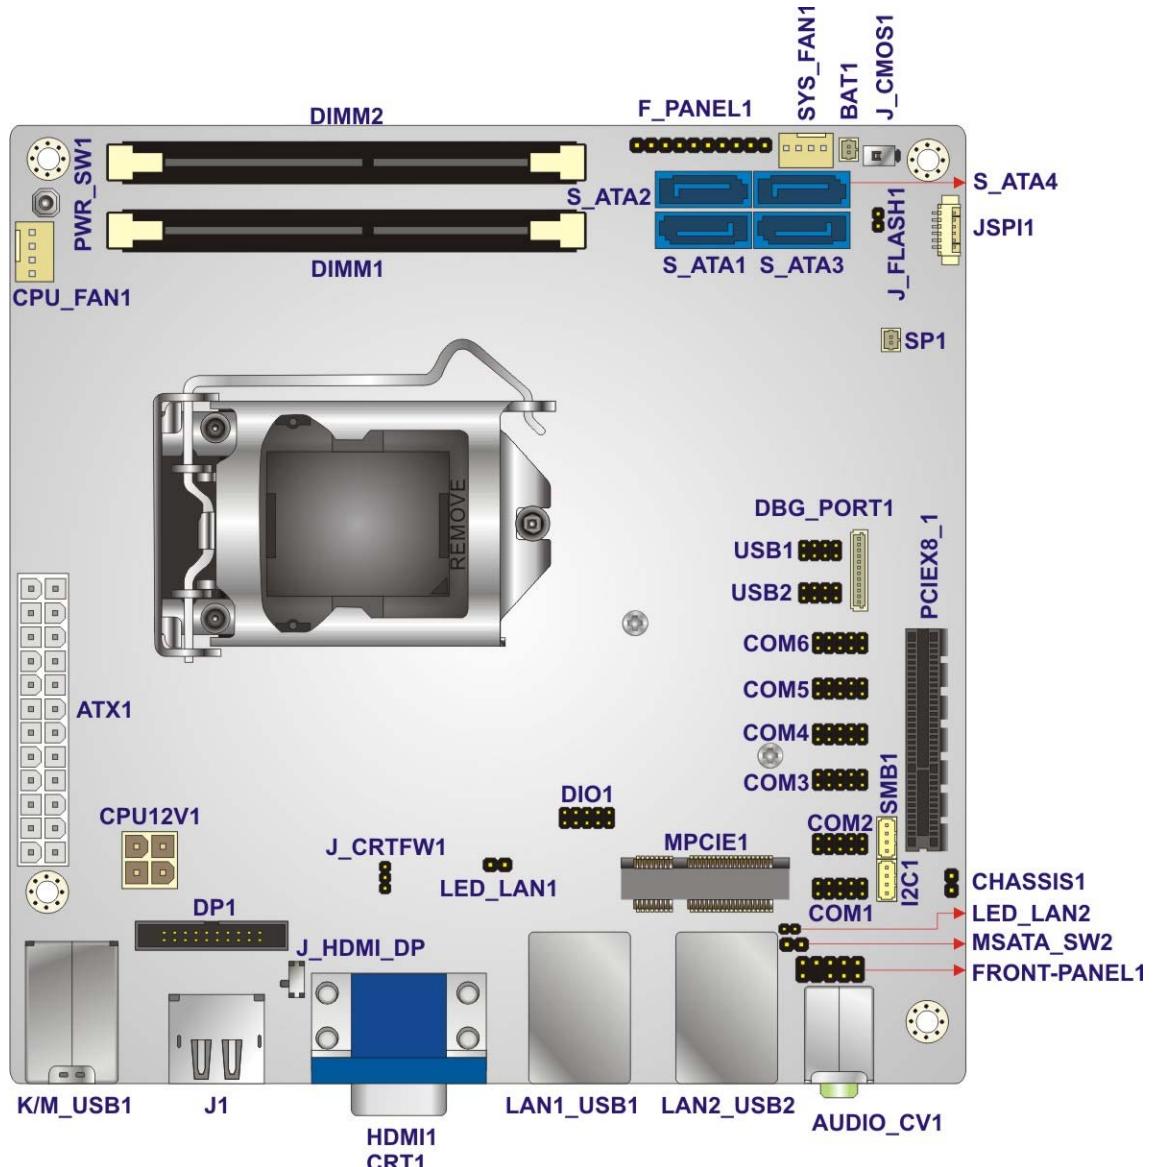

Figure 3-1: Connector and Jumper Locations (Front Side)

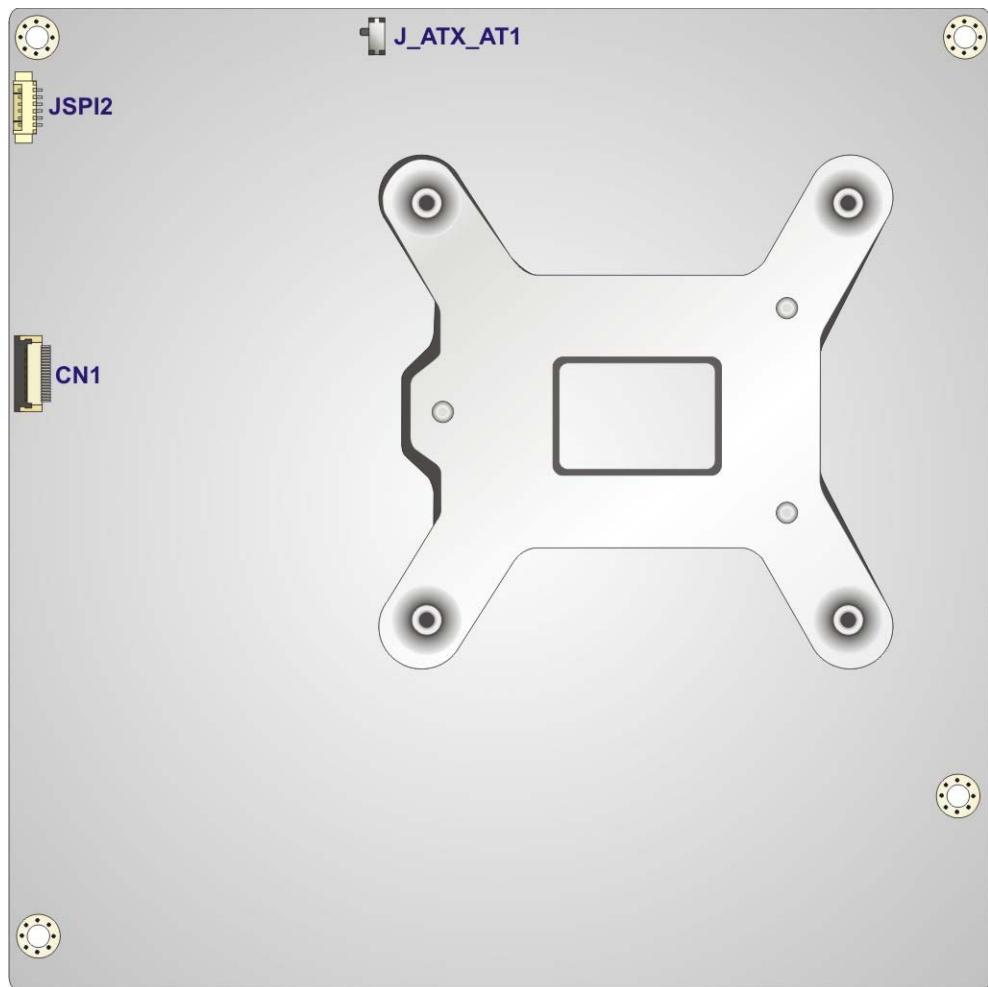

Figure 3-2: Connector and Jumper Locations (Solder Side)

3.1.2 Peripheral Interface Connectors

The table below lists all the connectors on the board.

Connector	Type	Label
+12V DC-IN power connector	4-pin Molex	CPU12V1
ATX power connector	24-pin connector	ATX1
Audio connector	10-pin header	FRONT-PANEL1
Battery connector	2-pin wafer	BAT1
Buzzer connector	2-pin wafer	SP1
Chassis intrusion connector	2-pin header	CHASSIS1
Debug connector	12-pin wafer	DBG_PORT1
Digital I/O connector	10-pin header	DIO1
EC debug connector	20-pin FPC	CN1
Fan connector, CPU	4-pin wafer	CPU_FAN1
Fan connector, system	4-pin wafer	SYS_FAN1
Front panel connector	10-pin header	F_PANEL1
I ² C connector	4-pin wafer	I2C1
Internal DisplayPort connector	20-pin box header	DP1
LAN link LED connectors	2-pin header	LED_LAN1, LED_LAN2
Memory slot	260-pin DDR4 SO-DIMM	DIMM1, DIMM2
PCIe x8 slot	PCIe x8 slot	PCIEX8_1
PCIe Mini card slot	PCIe Mini slot	MPCIE1
Power button (on board)	Push button	PWR_SW1
RS-232 connectors	10-pin header	COM1, COM2,

		COM3, COM4
RS-232/422/485 connectors	10-pin header	COM5, COM6
SATA 6Gb/s drive connectors	7-pin SATA connector	S_ATA1, S_ATA2, S_ATA3, S_ATA4
SMBus connector	4-pin wafer	SMB1
SPI flash connector, BIOS	6-pin wafer	JSPI1
SPI flash connector, EC	6-pin wafer	JSPI2
USB 2.0 connectors	8-pin header	USB1, USB2
VGA firmware update connector	3-pin header	J_CRTFW1

Table 3-1: Peripheral Interface Connectors

3.1.3 External Interface Panel Connectors

The table below lists the connectors on the external I/O panel.

Connector	Type	Label
Audio jacks	Audio jacks	AUDIO_CV1
Keyboard/Mouse and USB 2.0 connectors	PS/2 and USB 2.0 combo connector	K/M_USB1
Ethernet and USB 3.0 connectors	RJ-45 and USB 3.0 combo connector	LAN1_USB1, LAN2_USB2
HDMI 2.0 connector	HDMI 2.0 connector	HDMI1
HDMI/DP connector	HDMI+DP connector	J1
VGA connector	15-pin D-sub female connector	CRT1

Table 3-2: Rear Panel Connectors

3.2 Internal Peripheral Connectors

The section describes all of the connectors on the KINO-AQ170.

3.2.1 +12V DC-IN Power Connector

CN Label: CPU12V1

CN Type: 4-pin Molex, p=4.2 mm

CN Location: See **Figure 3-3**

CN Pinouts: See **Table 3-3**

The connector supports the +12V power supply.

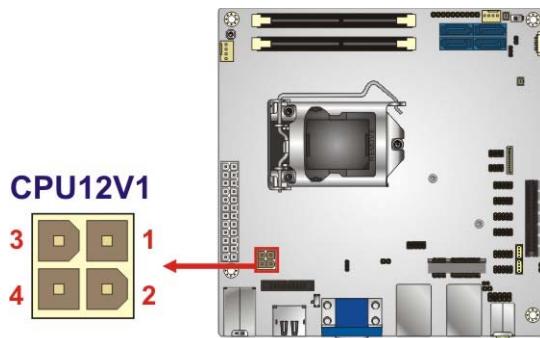

Figure 3-3: +12V DC-IN Power Connector Location

3.2.3 Audio Connector

CN Label: FRONT-PANEL1

CN Type: 10-pin header, p=2.54 mm

CN Location: See Figure 3-5

CN Pinouts: See Table 3-5

The audio connector is connected to external audio devices including speakers and microphones for the input and output of audio signals to and from the system.

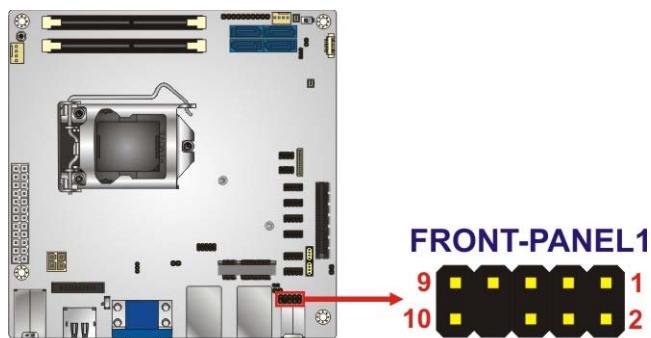

Figure 3-5: Audio Connector Location

Table 3-5: Audio Connector Pinouts

3.2.4 Battery Connector

CAUTION:

Risk of explosion if battery is replaced by an incorrect type. Only certified engineers should replace the on-board battery.

Dispose of used batteries according to instructions and local regulations.

CN Label: BAT1

CN Type: 2-pin wafer, p=1.25 mm

CN Location: See [Figure 3-6](#)

CN Pinouts: See [Table 3-6](#)

The battery connector is connected to the system battery. The battery provides power to the system clock to retain the time when power is turned off.

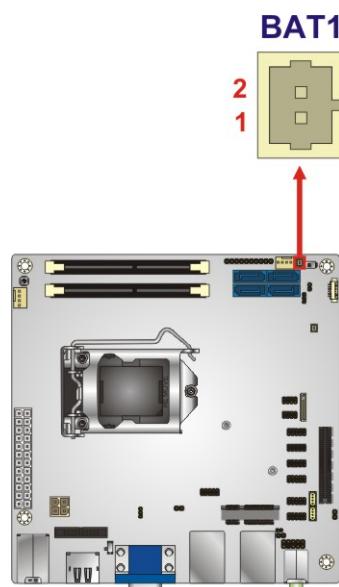

Figure 3-6: Battery Connector Location

KINO-AQ170 Industrial Motherboard

Pin	Description
1	VBAT+
2	GND

Table 3-6: Battery Connector Pinouts

3.2.5 Buzzer Connector

CN Label: SP1

CN Type: 2-pin wafer, p=1.25 mm

CN Location: See **Figure 3-7**

CN Pinouts: See **Table 3-7**

The buzzer connector is connected to the buzzer.

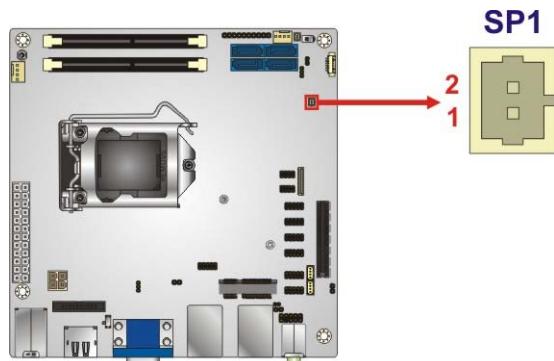

Figure 3-7: Buzzer Connector Location

Pin	Description
1	Buzzer +
2	Buzzer -

Table 3-7: Buzzer Connector Pinouts

3.2.6 Chassis Intrusion Connector

CN Label: CHASSIS1

CN Type: 2-pin header, p=2.54 mm

CN Location: See [Figure 3-8](#)

CN Pinouts: See [Table 3-8](#)

The chassis intrusion connector is for a chassis intrusion detection sensor or switch that detects if a chassis component is removed or replaced.

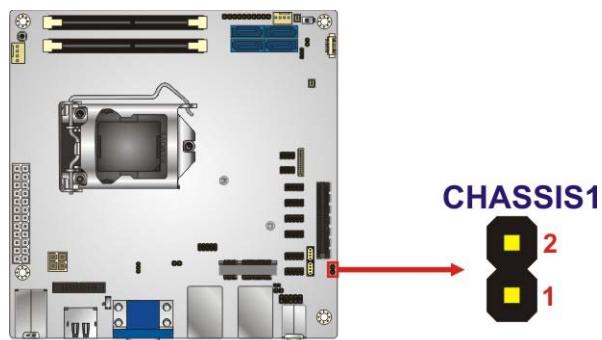

Figure 3-8: Chassis Intrusion Connector Location

Pin	Description
1	+3.3VSB
2	Chassis open

Table 3-8: Chassis Intrusion Connector Pinouts

3.2.7 Debug Connector

CN Label: **DBG_PORT1**

CN Type: 12-pin wafer, p=1.00 mm

CN Location: See **Figure 3-9**

CN Pinouts: See **Table 3-9**

The debug connector is used for debug.

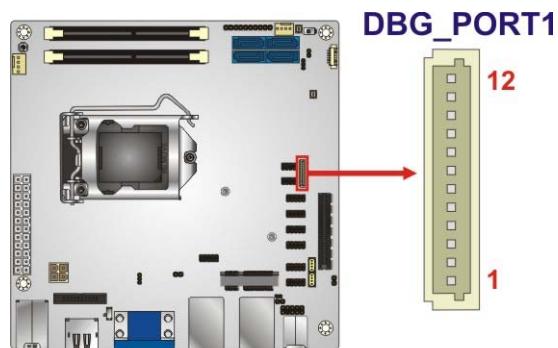

Figure 3-9: Debug Connector Location

CN Label: MPCIE1

CN Type: Full-size/Half-size PCIe Mini card slot

CN Location: See **Figure 3-18**

CN Pinouts: See **Table 3-18**

The PCIe Mini card slot supports PCIe Mini cards with USB interface, including mSATA modules.

NOTE:

If the mSATA module installed on the KINO-AQ170 can not be automatically detected, please set MPCIE1 as an mSATA slot manually by using the MSATA_SW2 jumper. Please refer to **Section 4.7.5.**

3.2.20 SATA 6Gb/s Drive Connectors

CN Label: S_ATA1, S_ATA2, S_ATA3, S_ATA4

CN Type: 7-pin SATA connector

CN Location: See [Figure 3-22](#)

The SATA 6Gb/s drive connector is connected to a SATA 6Gb/s drive. The SATA 6Gb/s drive transfers data at speeds as high as 6Gb/s.

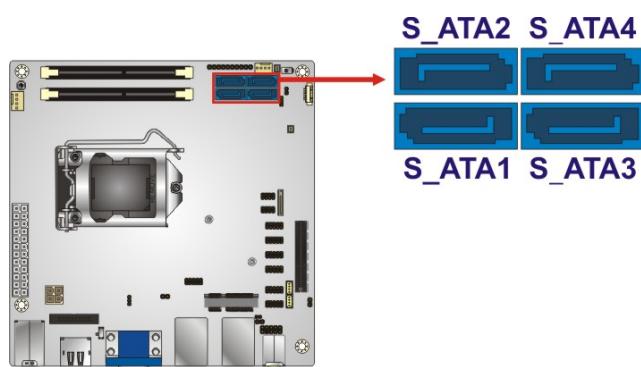

Figure 3-22: SATA 6Gb/s Drive Connector Locations

3.2.21 SMBus Connector

CN Label: SMB1

CN Type: 4-pin wafer, p=1.25 mm

CN Location: See [Figure 3-23](#)

CN Pinouts: See [Table 3-22](#)

The SMBus (System Management Bus) connector provides low-speed system management communications.

KINO-AQ170 Industrial Motherboard

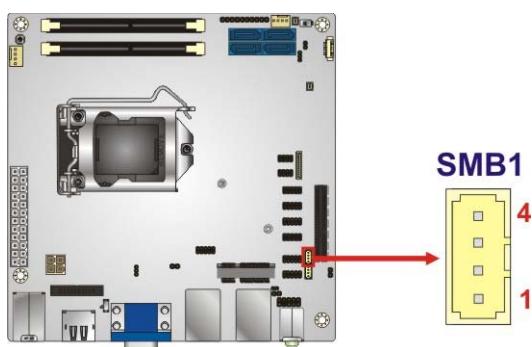

Figure 3-23: SMBus Connector Location

Pin	Description
1	GND
2	SMB_DATA
3	SMB_CLK

3.3 External Peripheral Interface Connector Panel

Figure 3-28 shows the KINO-AQ170 external peripheral interface connector (EPIC) panel.

The EPIC panel consists of the following:

- 2 x Audio jacks (line-out, mic-in)
- 2 x GbE connector
- 1 x Keyboard/Mouse connector
- 1 x HDMI 2.0 connector
- 1 x HDMI/DP connector
- 2 x USB 2.0 connector
- 4 x USB 3.0 connector
- 1 x VGA connector

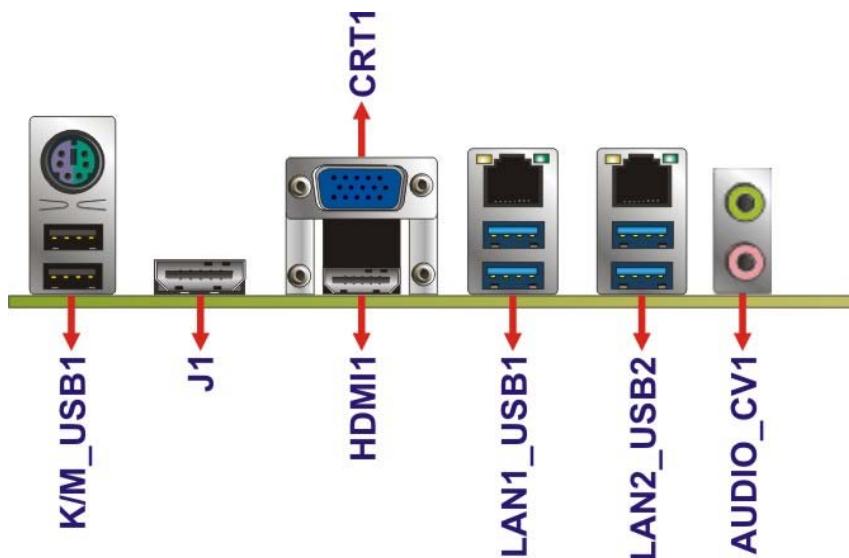

Figure 3-28: External Peripheral Interface Connector

3.3.1 Audio Connector

CN Label: AUDIO_CV1

CN Type: Audio jacks

CN Location: See Figure 3-28

The audio jacks connect to external audio devices.

- **Line Out port (Lime):** Connects to a headphone or a speaker. With multi-channel configurations, this port can also connect to front speakers.
- **Microphone (Pink):** Connects a microphone.

Figure 3-29: Audio Connector

KINO-AQ170 Industrial Motherboard

3.3.2 Keyboard/Mouse and USB 2.0 Combo Connector

CN Label: K/M_USB1

CN Type: PS/2 and USB 2.0 connector

CN Location: See **Figure 3-28**

CN Pinouts: See **Table 3-27** and **Table 3-28**

The USB 2.0 connector can be connected to a USB device.

Pin	Description	Pin	Description

Table 3-34: VGA Connector Pinouts

NOTE:

The VGA connector does not support hot plug function. The user must connect the VGA cable to the monitor and the KINO-AQ170 before powering up the KINO-AQ170.

Chapter

4

Installation

4.1 Anti-static Precautions

WARNING:

Failure to take ESD precautions during the installation of the KINO-AQ170 may result in permanent damage to the KINO-AQ170 and severe injury to the user.

Electrostatic discharge (ESD) can cause serious damage to electronic components, including the KINO-AQ170. Dry climates are especially susceptible to ESD. It is therefore critical that whenever the KINO-AQ170 or any other electrical component is handled, the following anti-static precautions are strictly adhered to.

- ***Wear an anti-static wristband:*** Wearing a simple anti-static wristband can help to prevent ESD from damaging the board.
- ***Self-grounding*** Before handling the board, touch any grounded conducting material. During the time the board is handled, frequently touch any conducting materials that are connected to the ground.
- ***Use an anti-static pad:*** When configuring the KINO-AQ170, place it on an anti-static pad. This reduces the possibility of ESD damaging the KINO-AQ170.
- ***Only handle the edges of the PCB:*** When handling the PCB, hold the PCB by the edges.

4.2 Installation Considerations

NOTE:

The following installation notices and installation considerations should be read and understood before installation. All installation notices must be strictly adhered to. Failing to adhere to these precautions may lead to severe damage and injury to the person performing the installation.

**WARNING:**

The installation instructions described in this manual should be carefully followed in order to prevent damage to the KINO-AQ170, KINO-AQ170 components and injury to the user.

Before and during the installation please **DO** the following:

- Read the user manual:
 - The user manual provides a complete description of the KINO-AQ170 installation instructions and configuration options.
- Wear an electrostatic discharge cuff (ESD):
 - Electronic components are easily damaged by ESD. Wearing an ESD cuff removes ESD from the body and helps prevent ESD damage.
- Place the KINO-AQ170 on an antistatic pad:
 - When installing or configuring the motherboard, place it on an antistatic pad. This helps to prevent potential ESD damage.
- Turn all power to the KINO-AQ170 off:
 - When working with the KINO-AQ170, make sure that it is disconnected from all power supplies and that no electricity is being fed into the system.

Before and during the installation of the KINO-AQ170 **DO NOT**:

- Remove any of the stickers on the PCB board. These stickers are required for warranty validation.
- Use the product before verifying all the cables and power connectors are properly connected.
- Allow screws to come in contact with the PCB circuit, connector pins, or its components.

4.3 Socket LGA1151 CPU Installation

WARNING:

CPUs are expensive and sensitive components. When installing the CPU please be careful not to damage it in anyway. Make sure the CPU is installed properly and ensure the correct cooling kit is properly installed.

DO NOT touch the pins at the bottom of the CPU. When handling the CPU, only hold it on the sides.

To install the CPU, follow the steps below.

Step 1: Disengage the load lever by pressing the lever down and slightly outward to clear the retention tab. Fully open the lever. See **Figure 4-1**.

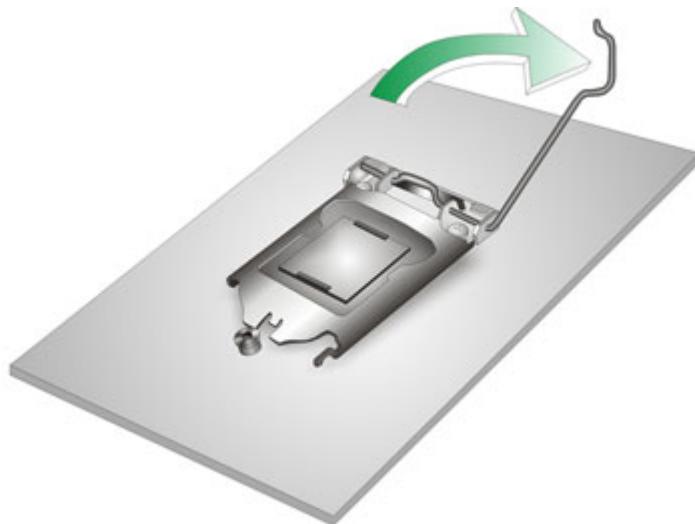

Figure 4-1: Disengage the CPU Socket Load Lever

Step 2: Open the socket and remove the protective cover. The black protective cover can be removed by pulling up on the tab labeled "Remove". See **Figure 4-2**.

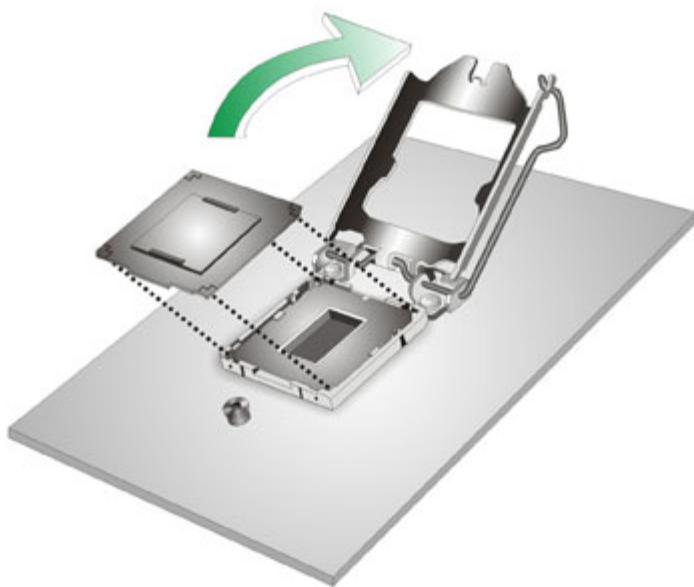

KINO-AQ170 Industrial Motherboard

Figure 4-2: Remove Protective Cover

- Step 3: Inspect the CPU socket.** Make sure there are no bent pins and make sure the socket contacts are free of foreign material. If any debris is found, remove it with compressed air.
- Step 4: Orientate the CPU properly.** The contact array should be facing the CPU socket.
- Step 5: Correctly position the CPU.** Match the Pin 1 mark with the cut edge on the CPU socket.
- Step 6: Align the CPU pins.** Locate pin 1 and the two orientation notches on the CPU. Carefully match the two orientation notches on the CPU with the socket alignment keys.
- Step 7: Insert the CPU.** Gently insert the CPU into the socket. If the CPU pins are properly aligned, the CPU should slide into the CPU socket smoothly. See **Figure 4-3.**

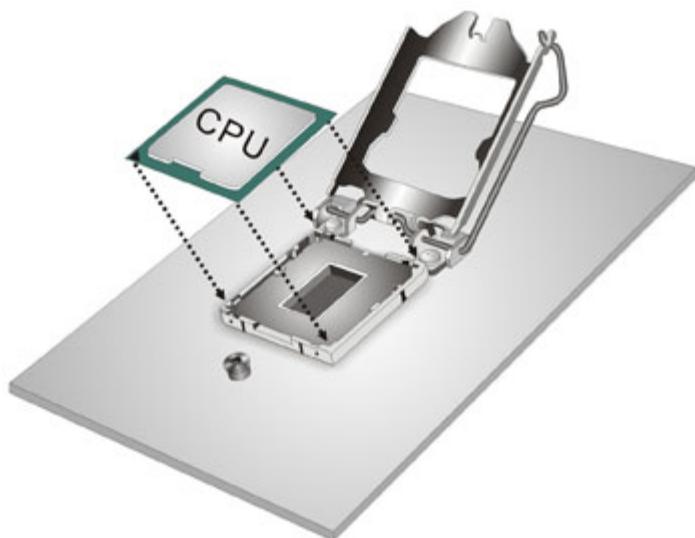

Figure 4-3: Insert the Socket LGA1151 CPU

Step 8: Close the CPU socket. Close the load plate and pull the load lever back a little to have the load plate be able to secure to the knob. Engage the load lever by pushing it back to its original position (**Figure 4-4**). There will be some resistance, but will not require extreme pressure.

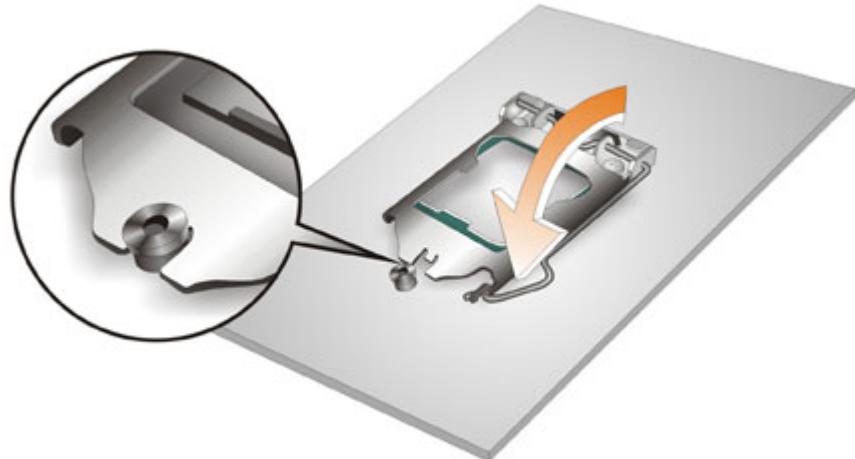

Figure 4-4: Close the Socket LGA1151

4.4 Socket LGA1151 Cooling Kit Installation

WARNING:

DO NOT attempt to install a push-pin cooling fan.

The pre-installed support bracket prevents the board from bending and is ONLY compatible with captive screw type cooling fans.

WARNING:

Do not wipe off (accidentally or otherwise) the pre-sprayed layer of thermal paste on the bottom of the heat sink. The thermal paste between the CPU and the heat sink is important for optimum heat dissipation.

The cooling kit can be bought from IEI. The cooling kit has a heatsink and fan. To install the cooling kit, follow the instructions below.

Step 1: A cooling kit bracket is pre-installed on the solder side of the motherboard.

See **Figure 4-5**.

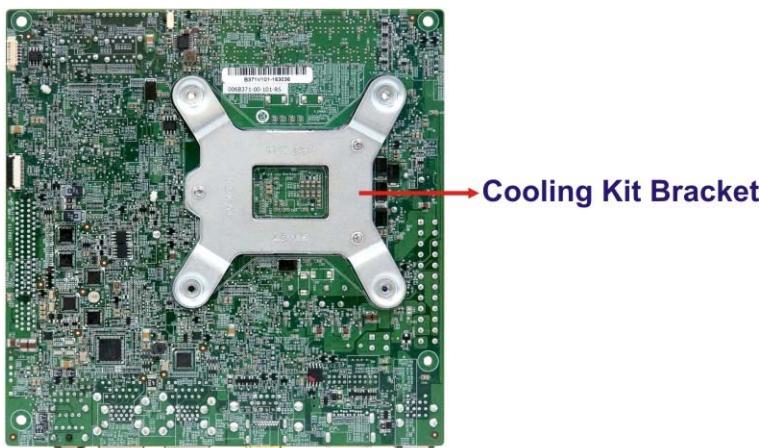

Figure 4-5: Cooling Kit Support Bracket

Step 2: Place the cooling kit onto the socket LGA1151 CPU. Make sure the CPU cable can be properly routed when the cooling kit is installed.

Step 3: Mount the cooling kit. Gently place the cooling kit on top of the CPU. Make sure the four threaded screws on the corners of the cooling kit properly pass through the holes of the cooling kit bracket.

Step 4: Tighten the screws. Use a screwdriver to tighten the four screws. In a diagonal pattern, tighten each screw a few turns then move to the next one, until they are all secured. Do not over tighten the screws.

Step 5: Connect the fan cable. Connect the cooling kit fan cable to the fan connector on the KINO-AQ170. Carefully route the cable and avoid heat generating chips and fan blades.

4.5 SO-DIMM Installation

To install an SO-DIMM, please follow the steps below and refer to **Figure 4-6**.

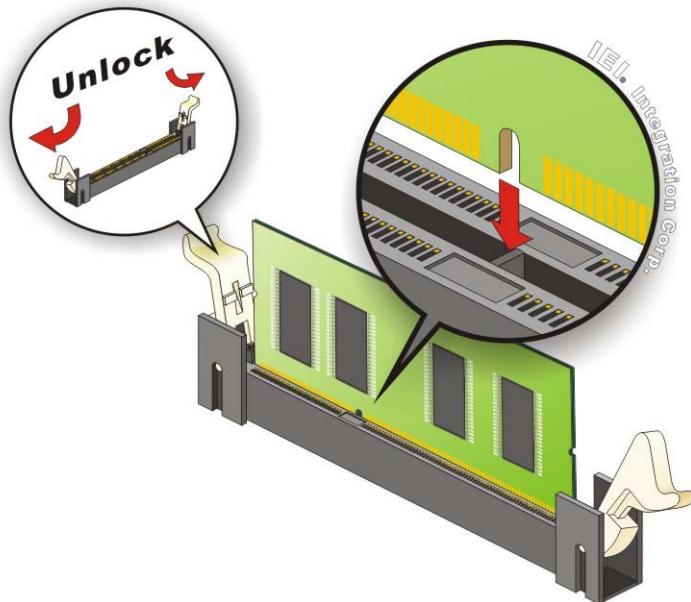

Figure 4-6: SO-DIMM Installation

Step 1: Open the SO-DIMM socket handles. Open the two handles outwards as far as they can. See **Figure 4-6**.

Step 2: Align the SO-DIMM with the socket. Align the SO-DIMM so the notch on the memory lines up with the notch on the memory socket. See **Figure 4-6**.

Step 3: Insert the SO-DIMM. Once aligned, press down until the SO-DIMM is properly seated. Clip the two handles into place. See **Figure 4-6**.

Step 4: Removing a SO-DIMM. To remove a SO-DIMM, push both handles outward. The memory module is ejected by a mechanism in the socket.

4.6 PCIe Mini Card Installation

4.6.1 Full-size PCIe Mini Card Installation

To install a full-size PCIe Mini card, please follow the steps below.

Step 1: Locate the PCIe Mini card slot. See Chapter 3.

Step 2: Remove the retention screw and standoff for a half-size PCIe Mini card. To avoid interference of the board circuit, remove the retention screw and standoff for a half-size PCIe Mini card as shown in **Figure 4-7**.

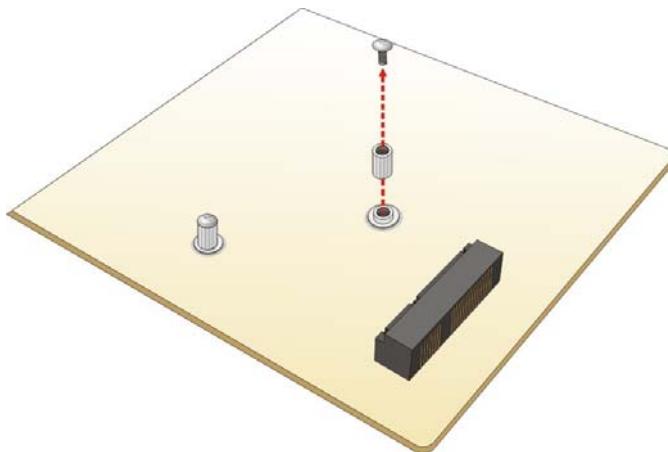

Figure 4-7: Removing the Retention Screw and Standoff for a Half-size PCIe Mini Card

Step 3: Remove the retention screw. Remove the retention screw as shown in **Figure 4-8**.

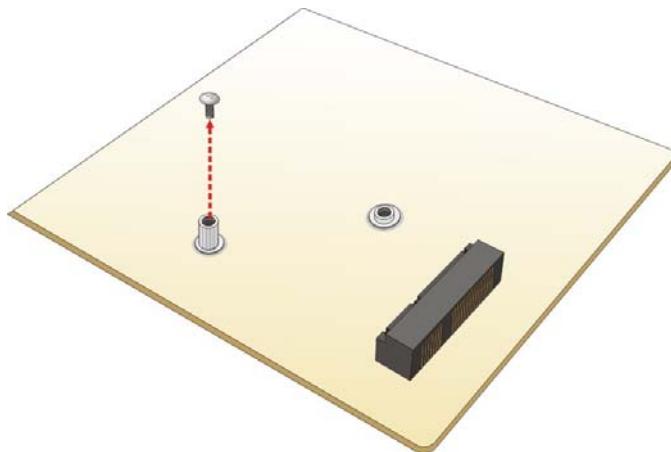

Figure 4-8: Removing the Retention Screw

Step 4: Insert into the socket at an angle. Line up the notch on the card with the notch on the slot. Slide the PCIe Mini card into the socket at an angle of about 20° (Figure 4-9).

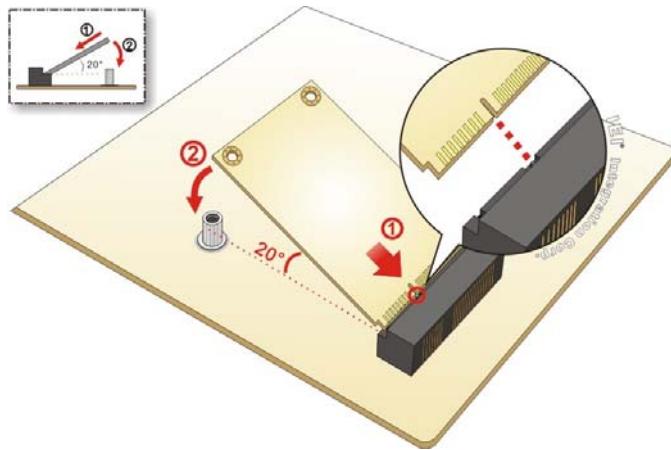

Figure 4-9: Inserting the Full-size PCIe Mini Card into the Slot at an Angle

Step 5: Secure the full-size PCIe Mini card. Secure the full-size PCIe Mini card with the retention screw previously removed (Figure 4-10).

KINO-AQ170 Industrial Motherboard

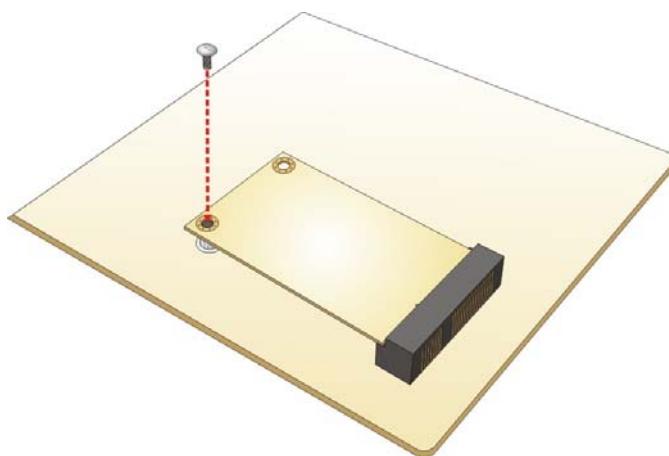

Figure 4-10: Securing the Full-size PCIe Mini Card

4.6.2 Half-size PCIe Mini Card Installation

To install a half-size PCIe Mini card, please follow the steps below.

Step 1: Locate the PCIe Mini card slot. See Chapter 3.

Step 2: Remove the retention screw. See Figure 4-11.

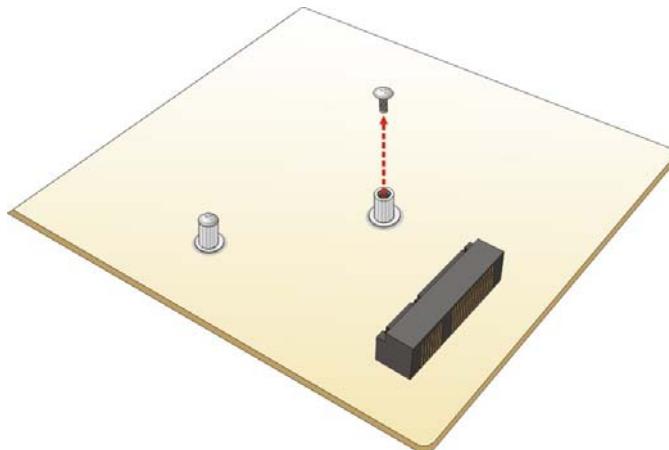

Figure 4-11: Removing Retention Screw

Step 3: Insert into the socket at an angle. Line up the notch on the card with the notch on the slot. Slide the PCIe Mini card into the slot at an angle of about 20° (Figure 4-12).

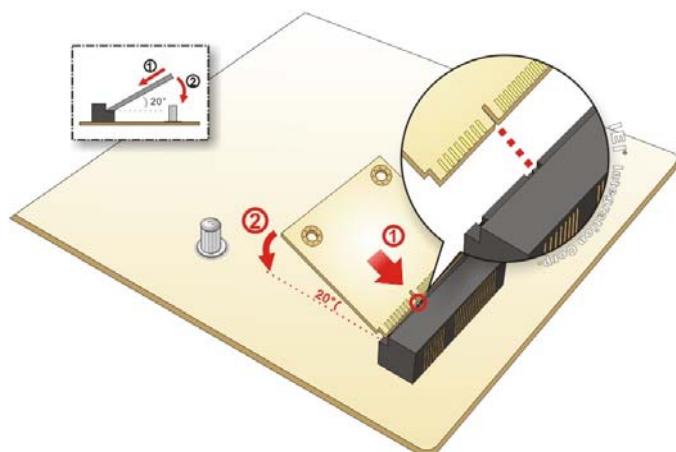

Figure 4-12: Inserting the Half-size PCIe Mini Card into the Slot at an Angle

Step 4: Secure the half-size PCIe Mini card. Secure the half-size PCIe Mini card with the retention screw previously removed (**Figure 4-13**).

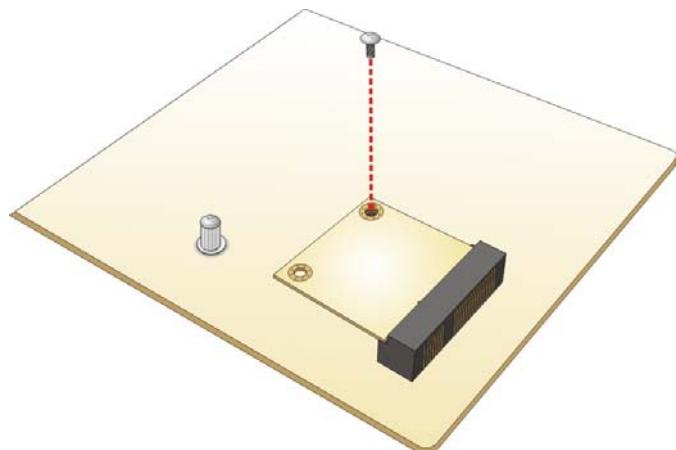

Figure 4-13: Securing the Half-size PCIe Mini Card

4.7 System Configuration

The system configuration is controlled by buttons, jumpers and switches. The system configuration should be performed before installation.

4.7.1 AT/ATX Mode Select Switch

The AT/ATX mode select switch specifies the systems power mode as AT or ATX. AT/ATX mode select switch settings are shown in **Table 4-1**.

Setting	Description
Short 1-2	ATX Mode (Default)
Short 2-3	AT Mode

Table 4-1: AT/ATX Mode Select Switch Settings

The location of the AT/ATX mode select switch is shown in **Figure 4-14** below.

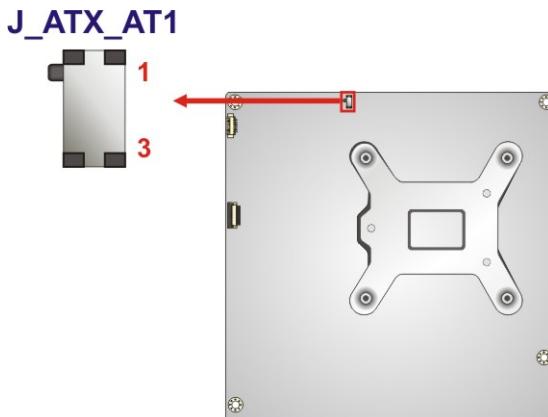

Figure 4-14: AT/ATX Mode Select Switch Location

4.7.2 Clear CMOS Button

If the KINO-AQ170 fails to boot due to improper BIOS settings, press the button for three seconds to clear the CMOS data and reset the system BIOS information. After updating to a new version of BIOS, the user has to follow the steps described below to boot up the system.

Step 1: Unplug the system power cord.

Step 2: Unplug the RTC battery for a while and re-plug it back in.

Step 3: Clear CMOS by pressing the clear CMOS button for three seconds or more.

Step 4: Boot up the system.

The location of the clear CMOS button is shown in **Figure 4-15**

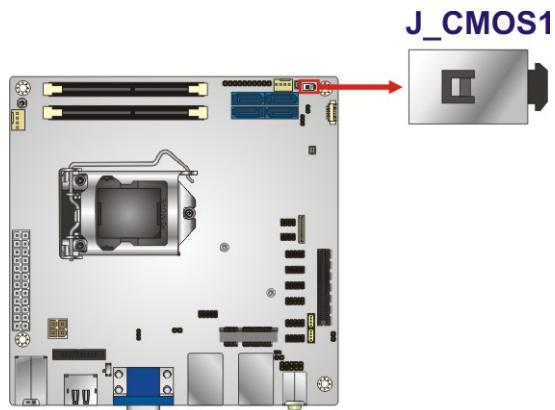

Figure 4-15: Clear CMOS Button Location

4.7.3 Flash Descriptor Security Override Jumper

The Flash Descriptor Security Override jumper (J_FLASH1, p=2.00 mm) allows users to enable or disable the ME firmware update. Refer to **Figure 4-16** and **Table 4-2** for the jumper location and settings.

Setting	Description
Open	Disabled (default)
Short	Enabled

Table 4-2: Flash Descriptor Security Override Jumper Settings

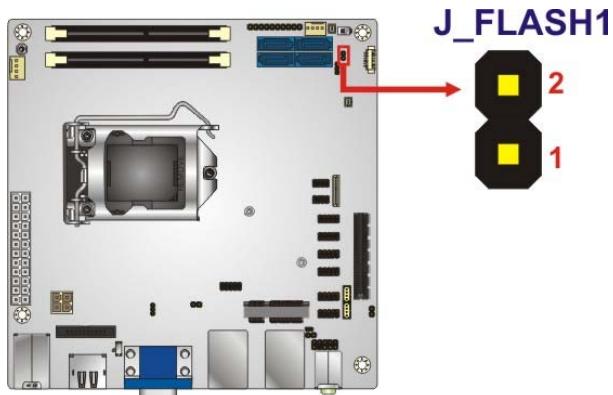

Figure 4-16: Flash Descriptor Security Override Jumper Location

To update the ME firmware, please follow the steps below.

Step 1: Before turning on the system power, short the Flash Descriptor Security Override jumper.

Step 2: Update the BIOS and ME firmware, and then turn off the system power.

Step 3: Remove the metal clip on the Flash Descriptor Security Override jumper to its default setting.

Step 4: Restart the system. The system will reboot 2 ~ 3 times to complete the ME firmware update.

4.7.4 HDMI/DP Select Switch

The HDMI/DP select switch specifies the external HDMI/DP connector as HDMI or DisplayPort. HDMI/DP select switch settings are shown in **Table 4-3**.

Setting	Description
Short 1-2	HDMI
Short 2-3	DisplayPort (Default)

Table 4-3: HDMI/DP Select Switch Settings

The location of the HDMI/DP select switch is shown in **Figure 4-17** below.

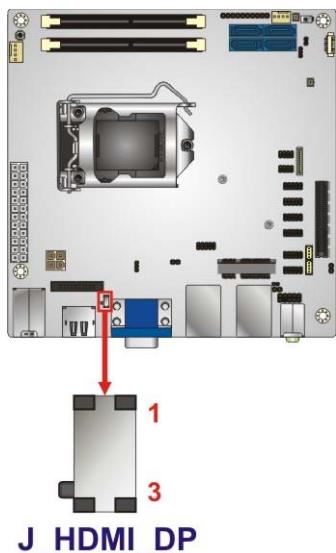

Figure 4-17: HDMI/DP Select Switch Location

4.7.5 mSATA Module Detection Jumper

Use the **MSATA_SW2** jumper to select whether to automatically detect mSATA devices installed in the PCIe Mini slot (MPCIE1).

Setting	Description
Open	Automatically detect mSATA device (Default)
Short	Enable mSATA device

Table 4-4: mSATA Module Detection Jumper Settings

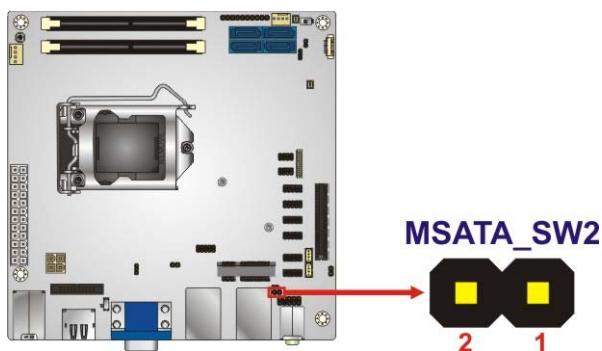

Figure 4-18: mSATA Module Detection Jumper Location

4.7.6 USB Power Selection

The USB power selection is made through the BIOS menu in “Chipset → PCH-IO Configuration”. Use the **USB Power SW1** and the **USB Power SW2** BIOS options to configure the correspondent USB ports (see **Table 4-5**) and refer to **Table 4-6** to select the USB power source.

BIOS Options	Configured USB Ports
USB Power SW1	K/M_USB1 (external USB 2.0 ports) LAN1_USB1 (external USB 3.0 ports) LAN2_USB2 (external USB 3.0 ports)
USB Power SW2	USB1 (internal USB 2.0 ports) USB2 (internal USB 2.0 ports)

Table 4-5: BIOS Options and Configured USB Ports

Options	Description
+5V DUAL	+5V dual (default)
+5V	+5V

Table 4-6: USB Power Source Setup

Please refer to **Section 5.4.2** for BIOS setup.

4.8 Chassis Installation

4.8.1 Airflow

WARNING:

Airflow is critical for keeping components within recommended operating temperatures. The chassis should have fans and vents as necessary to keep things cool.

The KINO-AQ170 must be installed in a chassis with ventilation holes on the sides allowing airflow to travel through the heat sink surface. In a system with an individual power supply unit, the cooling fan of a power supply can also help generate airflow through the board surface.

4.8.2 Motherboard Installation

To install the KINO-AQ170 motherboard into the chassis please refer to the reference material that came with the chassis.

4.9 Internal Peripheral Device Connections

This section outlines the installation of peripheral devices to the on-board connectors

4.9.1 SATA Drive Connection

The KINO-AQ170 is shipped with two SATA drive cables. To connect the SATA drives to the connectors, please follow the steps below.

Step 1: Locate the connectors. The locations of the SATA drive connectors are shown in Chapter 3.

Step 2: Insert the cable connector. Insert the cable connector into the on-board SATA drive connector until it clips into place. See Figure 4-19.

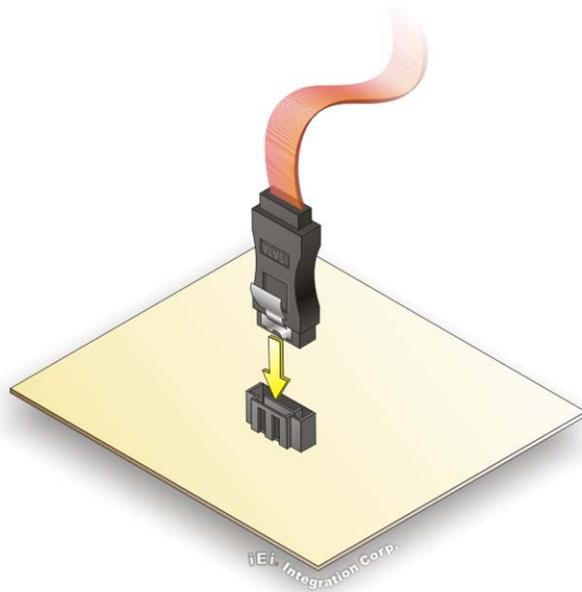

Figure 4-19: SATA Drive Cable Connection

Step 3: Connect the cable to the SATA disk. Connect the connector on the other end of the cable to the connector at the back of the SATA drive. See Figure 4-20.

Step 4: Connect the SATA power cable. Connect the SATA power connector to the back of the SATA drive. See Figure 4-20.

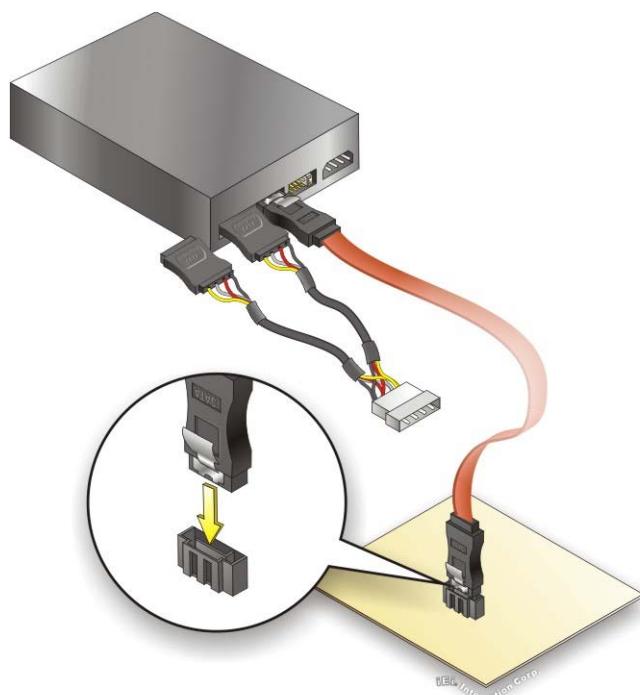

Figure 4-20: SATA Power Drive Connection

4.9.2 RS-232 Cable Connection (Optional)

The optional single RS-232 cable consists of one serial port connector attached to a serial communications cable that is then attached to a D-sub 9 male connector. To install the single RS-232 cable, please follow the steps below.

Step 1: Locate the connector. The location of the RS-232 connector is shown in [Chapter 3](#).

Step 2: Insert the cable connector. Align the cable connector with the onboard connector. Make sure pin 1 on the board and connector line up. Pin 1 on the cable connector is indicated with a white dot. See [Figure 4-21](#).

KINO-AQ170 Industrial Motherboard

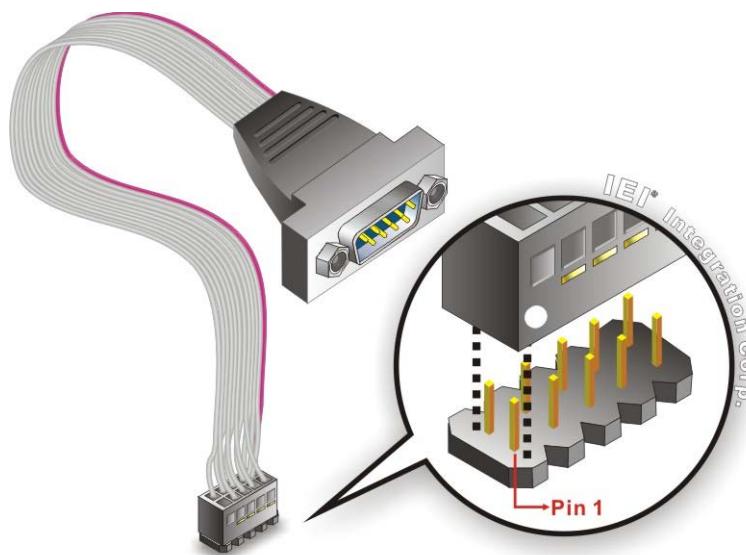

Figure 4-21: Single RS-232 Cable Installation

Step 3: Secure the bracket. The single RS-232 connector has two retention screws that must be secured to a chassis or bracket.

Step 4: Connect the serial device. Once the single RS-232 connector is connected to a chassis or bracket, a serial communications device can be connected to the system.

4.10 Intel® AMT Setup Procedure

The KINO-AQ170 is featured with the Intel® Active Management Technology (AMT). To enable the Intel® AMT function, follow the steps below.

Step 1: Make sure at least one of the memory sockets is installed with a DDR4 SO-DIMM.

Step 2: Connect an Ethernet cable to the RJ-45 connector labeled **LAN1_USB1**.

Step 3: The AMI BIOS options regarding the Intel® ME or Intel® AMT must be enabled,

Step 4: Properly install the Intel® Management Engine Components drivers from the Intel AMT (ME) directory in the driver CD.

Step 5: Configure the Intel® Management Engine BIOS extension (MEBx). To get into the Intel® MEBx settings, press <Ctrl+P> after a single beep during boot-up process. Enter the Intel® current ME password as it requires (the Intel® default password is **admin**).

NOTE:

To change the password, enter a new password following the strong password rule (containing at least one upper case letter, one lower case letter, one digit and one special character, and be at least eight characters).

4.11 Windows 7 Installation – USB 3.0 Creator Utility

Microsoft Windows 7 installation media does not include native driver support for USB 3.0, so during installation, a keyboard/mouse connected to a USB 3.0 port does not respond. The Windows 7 USB 3.0 Creator Utility automates the steps to update a Windows 7 installation image so that it contains USB 3.0 drivers. To install Windows 7 from a USB drive onto the KINO-AQ170, please follow the steps described below.

Step 1: Create a USB flash drive installer. Use your Windows 7 DVD or ISO image to create a bootable USB flash drive. Instructions on how to do are found on [Microsoft's website](#).

Step 2: Download and unzip the [Windows 7 USB 3.0 Creator utility](#) to a temporary folder on the Admin system.

Step 3: Connect the USB device containing the Windows 7 image to the Admin system.

Step 4: Right-click the file “Installer_Creator.exe” and select Run as administrator.

Step 5: Browse to the root of the USB drive.

Step 6: Click “Create Image” to begin the creation process.

Step 7: Wait for the process to finish. It can take up to 15 minutes.

Step 8: Using the updated installer, proceed with the Windows 7 installation as you normally would.

Chapter

5

BIOS

5.1 Introduction

The BIOS is programmed onto the BIOS chip. The BIOS setup program allows changes to certain system settings. This chapter outlines the options that can be changed.

NOTE:

Some of the BIOS options may vary throughout the life cycle of the product and are subject to change without prior notice.

5.1.1 Starting Setup

The UEFI BIOS is activated when the computer is turned on. The setup program can be activated in one of two ways.

1. Press the **DELETE** or **F2** key as soon as the system is turned on or
2. Press the **DELETE** or **F2** key when the “**Press Del to enter SETUP**” message appears on the screen.

If the message disappears before the **DELETE** or **F2** key is pressed, restart the computer and try again.

5.1.2 Using Setup

Use the arrow keys to highlight items, press **ENTER** to select, use the **PageUp** and **PageDown** keys to change entries, press **F1** for help and press **Esc** to quit. Navigation keys are shown in.

Key	Function
Up arrow	Move to previous item
Down arrow	Move to next item
Left arrow	Move to the item on the left hand side
Right arrow	Move to the item on the right hand side
+	Increase the numeric value or make changes

Key	Function
-	Decrease the numeric value or make changes
F1 key	General help, only for Status Page Setup Menu and Option Page Setup Menu
F2 key	Load previous values.
F3 key	Load optimized defaults
F4 key	Save changes and Exit BIOS
Esc key	Main Menu – Quit and not save changes into CMOS Status Page Setup Menu and Option Page Setup Menu -- Exit current page and return to Main Menu

5.1.3 Getting Help

When **F1** is pressed a small help window describing the appropriate keys to use and the possible selections for the highlighted item appears. To exit the Help Window press **Esc** or the **F1** key again.

5.1.4 Unable to Reboot after Configuration Changes

If the computer cannot boot after changes to the system configuration is made, CMOS defaults. Use the jumper described in **Section 4.7.2**.

5.1.5 BIOS Menu Bar

The **menu bar** on top of the BIOS screen has the following main items:

- Main – Changes the basic system configuration.
- Advanced – Changes the advanced system settings.
- Chipset – Changes the chipset settings.
- Security – Sets User and Supervisor Passwords.
- Boot – Changes the system boot configuration.
- Save & Exit – Selects exit options and loads default settings

The following sections completely describe the configuration options found in the menu items at the top of the BIOS screen and listed above.

KINO-AQ170 Industrial Motherboard

5.2 Main

The **Main** BIOS menu (**BIOS Menu 1**) appears when the **BIOS Setup** program is entered.

BIOS Menu 1: Main

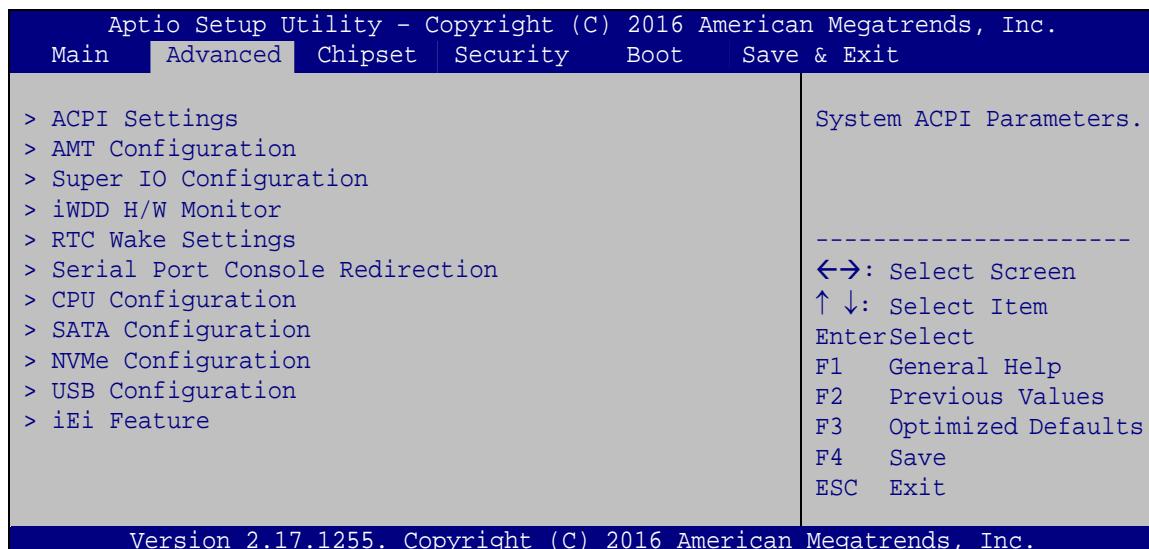

5.3 Advanced

Use the **Advanced** menu (**BIOS Menu 2**) to configure the CPU and peripheral devices through the following sub-menus:

WARNING!

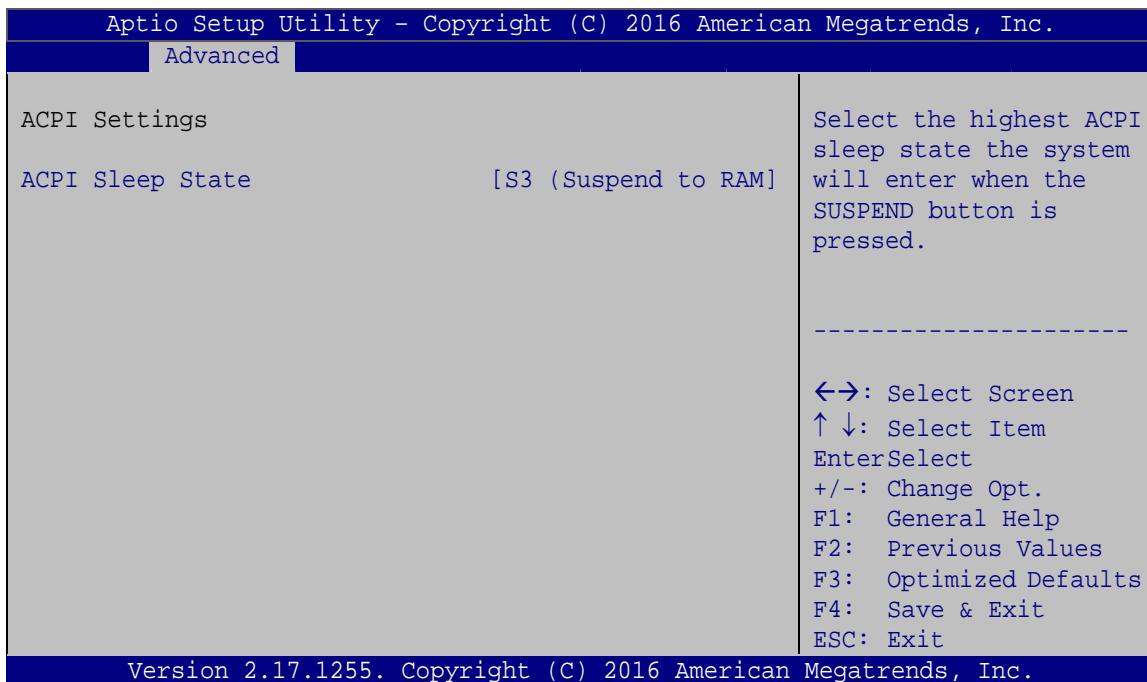

Setting the wrong values in the sections below may cause the system to malfunction. Make sure that the settings made are compatible with the hardware.

BIOS Menu 2: Advanced

5.3.1 ACPI Settings

The **ACPI Settings** menu (**BIOS Menu 3**) configures the Advanced Configuration and Power Interface (ACPI) options.

BIOS Menu 3: ACPI Settings

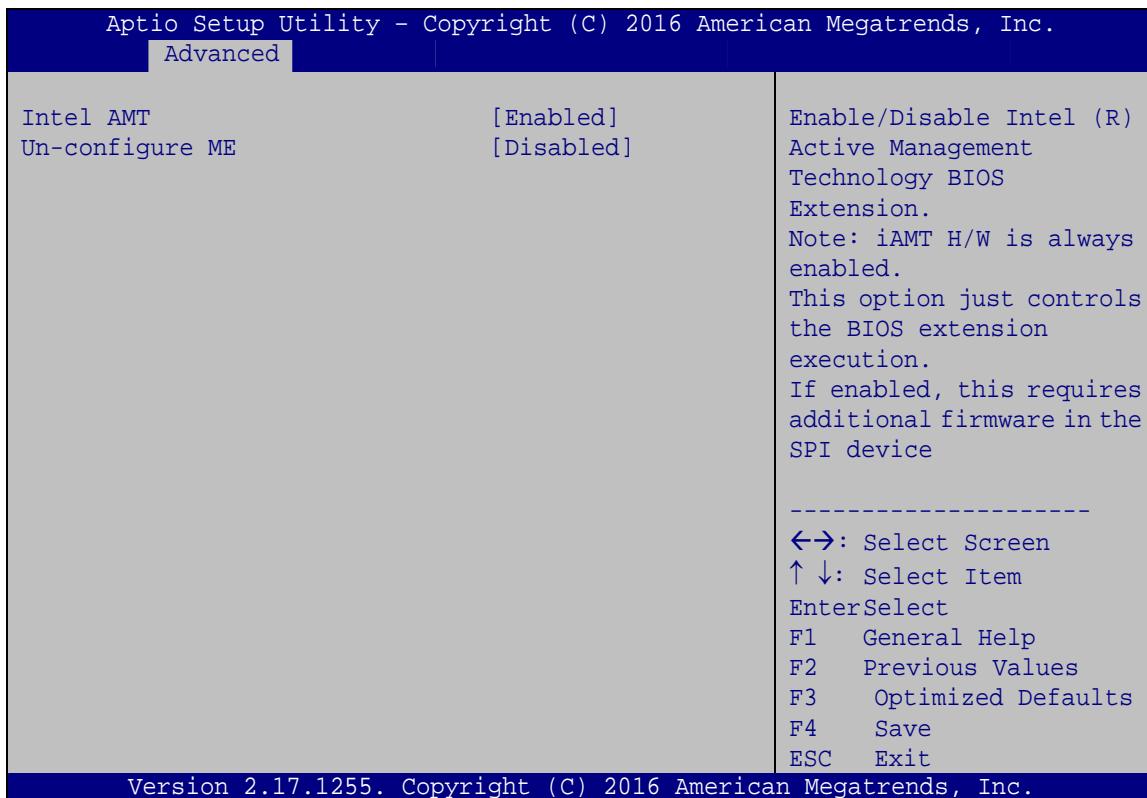

→ **ACPI Sleep State [S3 (Suspend to RAM)]**

Use the **ACPI Sleep State** option to specify the sleep state the system enters when it is not being used.

- **S3 (Suspend to DEFAULT RAM)** The caches are flushed and the CPU is powered off. Power to the RAM is maintained. The computer returns slower to a working state, but more power is saved.

5.3.2 AMT Configuration

The **AMT Configuration** menu (**BIOS Menu 4**) allows Intel® Active Management Technology (AMT) options to be configured.

BIOS Menu 4: AMT Configuration

→ Intel AMT [Enabled]

Use **Intel AMT** option to enable or disable the Intel® AMT function.

→ **Disabled** Intel® AMT is disabled

→ **Enabled** **DEFAULT** Intel® AMT is enabled

→ Un-configure ME [Disabled]

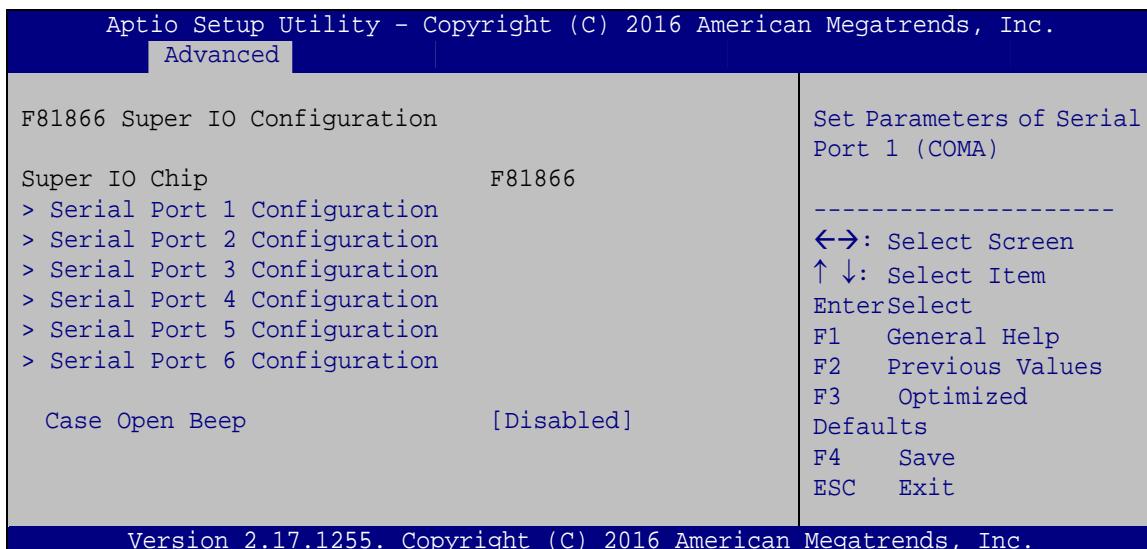

Use the **Un-configure ME** option to perform ME unconfigure without password operation.

→ **Disabled** **DEFAULT** Not perform ME unconfigure

- **Enabled** To perform ME unconfigure

5.3.3 Super IO Configuration

Use the **Super IO Configuration** menu (**BIOS Menu 5**) to set or change the configurations for the serial ports.

BIOS Menu 5: Super IO Configuration

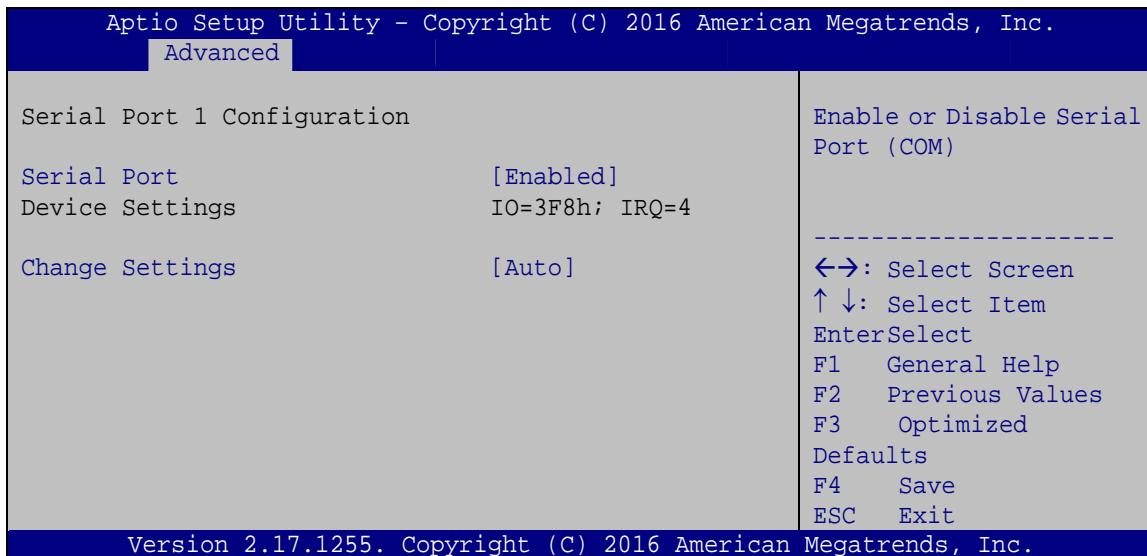

- **Case Open Beep [Disabled]**

Use the **Case Open Beep** option to enable or disable the case open beep function.

- | | | |
|-------------------|----------------|-------------------------------------|
| → Disabled | DEFAULT | Disable the case open beep function |
| → Enabled | | Enable the case open beep function |

5.3.3.1 Serial Port n Configuration

Use the **Serial Port n Configuration** menu (**BIOS Menu 6**) to configure the serial port n.

BIOS Menu 6: Serial Port n Configuration

5.3.3.1.1 Serial Port 1 Configuration

→ **Serial Port [Enabled]**

Use the **Serial Port** option to enable or disable the serial port.

→ **Disabled** Disable the serial port

→ **Enabled** **DEFAULT** Enable the serial port

→ **Change Settings [Auto]**

Use the **Change Settings** option to change the serial port IO port address and interrupt address.

→ **Auto** **DEFAULT** The serial port IO port address and interrupt address are automatically detected.

→ **IO=3F8h; IRQ=4** Serial Port I/O port address is 3F8h and the interrupt address is IRQ4

KINO-AQ170 Industrial Motherboard

- ➔ IO=3F8h; IRQ=3,
4, 11 Serial Port I/O port address is 3F8h and the interrupt address is IRQ3, 4, 11

4, 11 Serial Port I/O port address is 3E8h and the interrupt address is IRQ3, 4, 11

- ➔ IO=2E8h; IRQ=3,
4, 11 Serial Port I/O port address is 2E8h and the interrupt address is IRQ3, 4, 11
- ➔ IO=2D0h; IRQ=3,
4, 11 Serial Port I/O port address is 2D0h and the interrupt address is IRQ3, 4, 11
- ➔ IO=2E0h; IRQ=3,
4, 11 Serial Port I/O port address is 2E0h and the interrupt address is IRQ3, 4, 11

5.3.3.1.5 Serial Port 5 Configuration

➔ Serial Port [Enabled]

Use the **Serial Port** option to enable or disable the serial port.

- ➔ **Disabled** Disable the serial port
- ➔ **Enabled** **DEFAULT** Enable the serial port

➔ Change Settings [Auto]

Use the **Change Settings** option to change the serial port IO port address and interrupt address.

- ➔ **Auto** **DEFAULT** The serial port IO port address and interrupt address are automatically detected.
- ➔ IO=2D0h; IRQ=11 Serial Port I/O port address is 2D0h and the interrupt address is IRQ11
- ➔ IO=3F8h; IRQ=3,
4, 11 Serial Port I/O port address is 3F8h and the interrupt address is IRQ3, 4, 11
- ➔ IO=2F8h; IRQ=3,
4, 11 Serial Port I/O port address is 2F8h and the interrupt address is IRQ3, 4, 11
- ➔ IO=3E8h; IRQ=3,
4, 11 Serial Port I/O port address is 3E8h and the interrupt address is IRQ3, 4, 11
- ➔ IO=2E8h; IRQ=3,
4, 11 Serial Port I/O port address is 2E8h and the interrupt address is IRQ3, 4, 11

KINO-AQ170 Industrial Motherboard

- ➔ IO=2D0h; IRQ=3,
4, 11 Serial Port I/O port address is 2D0h and the interrupt address is IRQ3, 4, 11
- ➔ IO=2E0h; IRQ=3,
4, 11 Serial Port I/O port address is 2E0h and the interrupt address is IRQ3, 4, 11

➔ Transfer Mode [RS232]

Use the **Transfer Mode** option to select the Serial Port 5 signaling mode.

- ➔ RS422 Serial Port 5 signaling mode is RS-422
- ➔ RS232 **DEFAULT** Serial Port 5 signaling mode is RS-232
- ➔ RS485 Serial Port 5 signaling mode is RS-485

5.3.3.1.6 Serial Port 6 Configuration

➔ Serial Port [Enabled]

Use the **Serial Port** option to enable or disable the serial port.

- ➔ Disabled Disable the serial port
- ➔ Enabled **DEFAULT** Enable the serial port

➔ Change Settings [Auto]

Use the **Change Settings** option to change the serial port IO port address and interrupt address.

- ➔ Auto **DEFAULT** The serial port IO port address and interrupt address are automatically detected.
- ➔ IO=2E0h; IRQ=11 Serial Port I/O port address is 2E0h and the interrupt address is IRQ11
- ➔ IO=3F8h; IRQ=3,
4, 11 Serial Port I/O port address is 3F8h and the interrupt address is IRQ3, 4, 11

- ➔ IO=2F8h; IRQ=3,
4, 11 Serial Port I/O port address is 2F8h and the interrupt address is IRQ3, 4, 11
- ➔ IO=3E8h; IRQ=3,
4, 11 Serial Port I/O port address is 3E8h and the interrupt address is IRQ3, 4, 11

	 > Smart Fan Mode Configuration	

Version 2.17.1255. Copyright (C) 2016 American Megatrends, Inc.

BIOS Menu 7: iWDD H/W Monitor

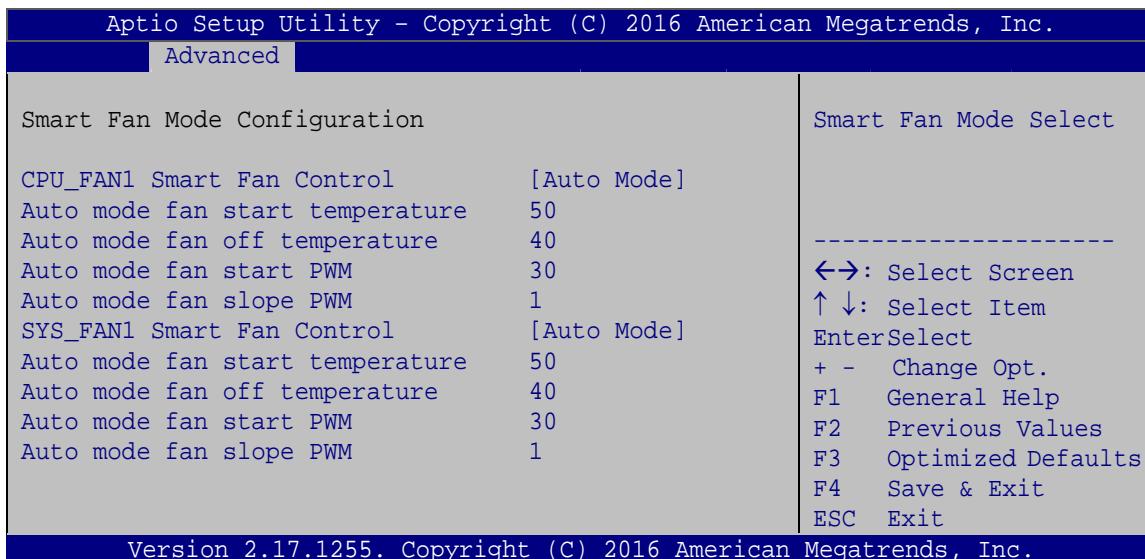

→ PC Health Status

The following system parameters and values are shown. The system parameters that are monitored are:

- System Temperatures:
 - CPU Temperature
 - System temperature
- Fan Speed:
 - CPU Fan Speed
 - System Fan Speed
- Voltages
 - CPU_CORE
 - +5V
 - +12V
 - +DDR
 - +5VSB
 - +3.3V
 - +3.3VSB

5.3.4.1 Smart Fan Mode Configuration

Use the **Smart Fan Mode Configuration** submenu (**BIOS Menu 8**) to configure fan temperature and speed settings.

BIOS Menu 8: Smart Fan Mode Configuration

→ CPU_FAN1 Smart Fan Control [Auto Mode]

Use the **CPU_FAN1 Smart Fan Control** BIOS option to configure the CPU Smart Fan.

→ **Manual Mode** **DEFAULT** The fan spins at the speed set in the Manual Mode option

→ **Auto Mode** **DEFAULT** The fan adjusts its speed using these settings:

 Auto mode fan start temperature

 Auto mode fan off temperature

 Auto mode fan start PWM

 Auto mode fan slope PWM

→ **SYS_FAN1 Smart Fan Control [Auto Mode]**

Use the **SYS_FAN1 Smart Fan Control** BIOS option to configure the system smart fan.

→ **Manual Mode** The fan spins at the speed set in the Manual Mode option

→ **Auto Mode** **DEFAULT** The fan adjusts its speed using these settings:

 Auto mode fan start temperature

 Auto mode fan off temperature

 Auto mode fan start PWM

 Auto mode fan slope PWM

→ **Auto mode fan start temperature [50]**

WARNING:

Setting this value too high may cause the fan to rotate at full speed only when the CPU is at a very high temperature and therefore cause the system to be damaged.

The **Auto mode fan start temperature** option can only be set if the **SYS_FAN1 Smart Fan Control** option is set to **Auto Mode**. If the system temperature is between **Start Temperature** and **Off Temperature**, the fan speed change to be **Start PWM**. To set a value, select the **Auto mode fan start temperature** option and enter a decimal number between 1 and 100.

→ **Auto mode fan off temperature [40]****WARNING:**

Setting this value too high may cause the fan to speed up only when the CPU is at a very high temperature and therefore cause the system to be damaged.

The **Auto mode fan off temperature** option can only be set if the **SYS_FAN1 Smart Fan control** option is set to **Auto Mode**. If the system temperature is lower than **Auto mode fan off temperature**, the fan speed change to be lowest. To set a value, select the **Auto mode fan off temperature** option and enter a decimal number between 1 and 100.

→ **Auto mode fan start PWM [30]**

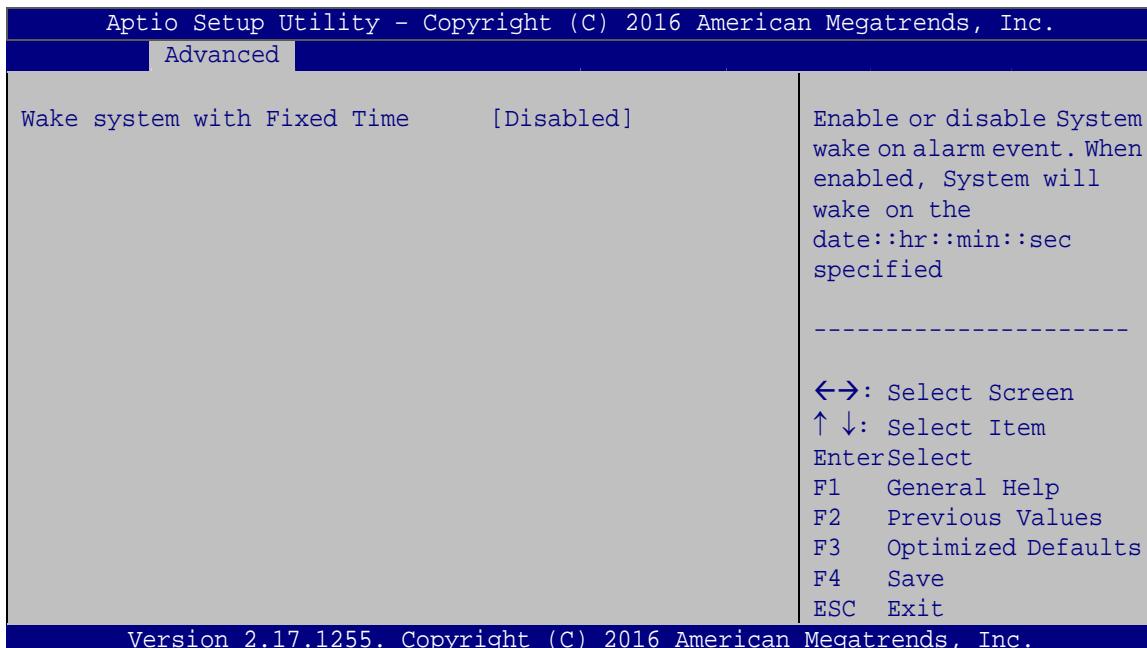

The **Auto mode fan start PWM** option can only be set if the **SYS_FAN1 Smart Fan control** option is set to **Auto Mode**. Use the **Auto mode fan start PWM** option to set the PWM start value. To set a value, select the **Auto mode fan start PWM** option and enter a decimal number between 1 and 100.

→ **Auto mode fan slope PWM [1]**

The **Auto mode fan slope PWM** option can only be set if the **SYS_FAN1 Smart Fan control** option is set to **Auto Mode**. Use the **Auto mode fan slope PWM** option to select the linear rate at which the PWM mode increases with respect to an increase in temperature. To set a value, select the **Auto mode fan slope PWM** option and enter a decimal number between 1 and 8.

5.3.5 RTC Wake Settings

The **RTC Wake Settings** menu (**BIOS Menu 9**) configures RTC wake event.

BIOS Menu 9: RTC Wake Settings

→ Wake system with Fixed Time [Disabled]

Use the **Wake system with Fixed Time** option to enable or disable the system wake on alarm event.

→ **Disabled** **DEFAULT** The real time clock (RTC) cannot generate a wake event

→ **Enabled** If selected, the **Wake up every day** option appears allowing you to enable to disable the system to wake every day at the specified time. Besides, the following options appear with values that can be selected:

Wake up date

Wake up hour

Wake up minute

Wake up second

After setting the alarm, the computer turns itself on from a suspend state when the alarm goes off.

5.3.6 Serial Port Console Redirection

The **Serial Port Console Redirection** menu (**BIOS Menu 10**) allows the console redirection options to be configured. Console redirection allows users to maintain a system remotely by re-directing keyboard input and text output through the serial port.

Aptio Setup Utility - Copyright (c) 2016 American Megatrends, Inc.

BIOS Menu 10: Serial Port Console Redirection

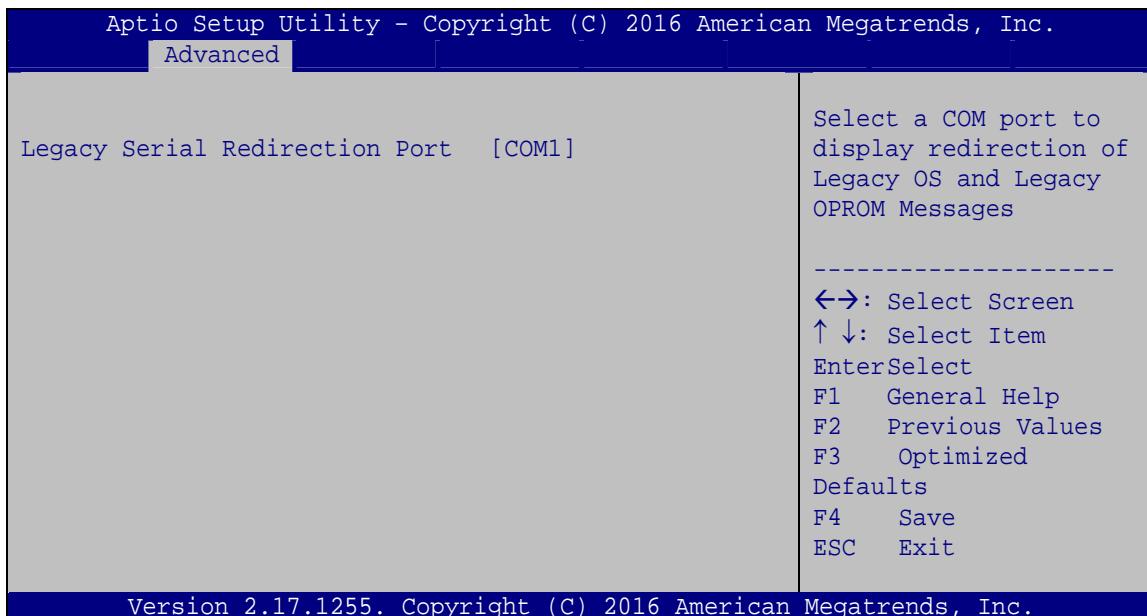

→ Console Redirection [Disabled]

Use **Console Redirection** option to enable or disable the console redirection function.

- | | | |
|-------------------|--|---|
| → Disabled | DEFAULT | Disabled the console redirection function |
| → Enabled | Enabled the console redirection function | |

5.3.6.1 Legacy Console Redirection Settings

The **Legacy Console Redirection Settings** menu (**BIOS Menu 11**) allows the legacy console redirection options to be configured.

BIOS Menu 11: Legacy Console Redirection Settings

→ Legacy Serial Redirection Port [COM1]

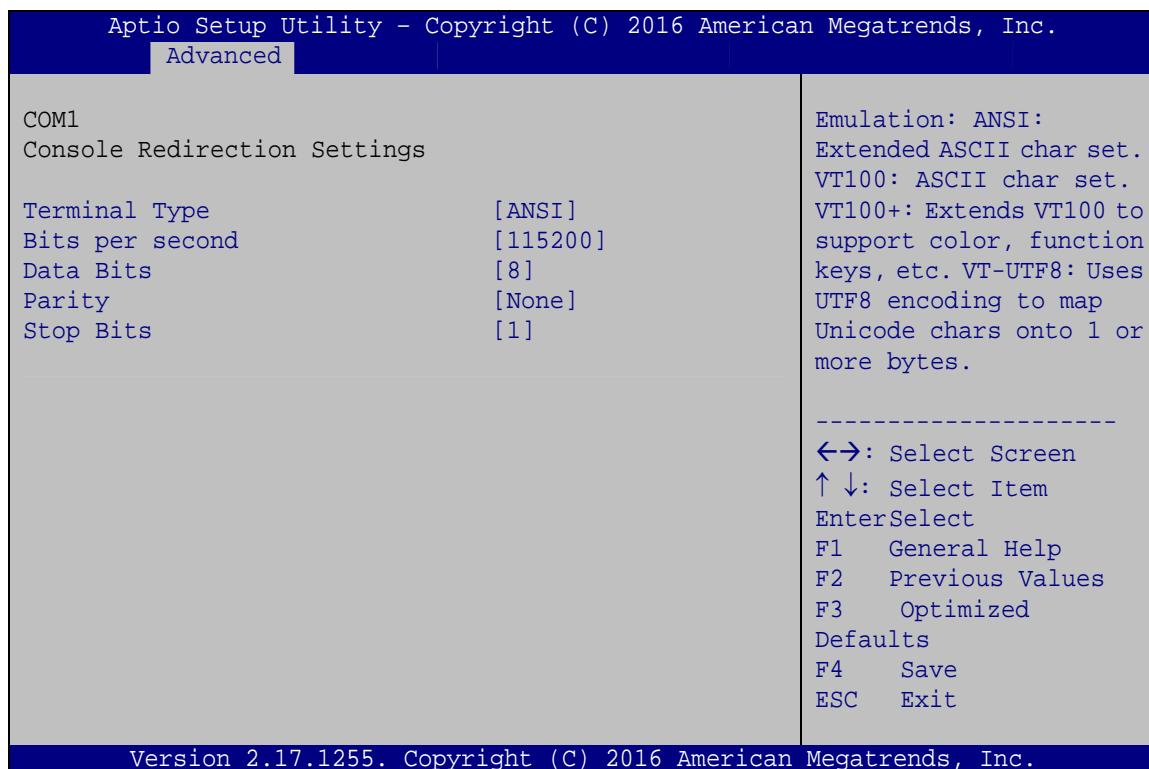

Use the **Legacy Serial Redirection Port** option to specify a COM port to display redirection of legacy OS and legacy OPROM messages. The options include:

- **COM1** **DEFAULT**
- COM2
- COM3
- COM4
- COM5

- COM6
- COM7 (Pci Bus0, Dev22, Func3)

5.3.6.2 Console Redirection Settings

The **Console Redirection Settings** menu (**BIOS Menu 12**) allows the console redirection options to be configured. The option is active when Console Redirection option is enabled.

BIOS Menu 12: Console Redirection Settings

→ Terminal Type [ANSI]

Use the **Terminal Type** option to specify the remote terminal type.

- **VT100** The target terminal type is VT100
- **VT100+** The target terminal type is VT100+
- **VT-UTF8** The target terminal type is VT-UTF8
- **ANSI** **DEFAULT** The target terminal type is ANSI

KINO-AQ170 Industrial Motherboard

→ Bits per second [115200]

Use the **Bits per second** option to specify the serial port transmission speed. The speed must match the other side. Long or noisy lines may require lower speeds.

- **9600** Sets the serial port transmission speed at 9600.
- **19200** Sets the serial port transmission speed at 19200.
- **57600** Sets the serial port transmission speed at 57600.
- **115200** **DEFAULT** Sets the serial port transmission speed at 115200.

→ Data Bits [8]

Use the **Data Bits** option to specify the number of data bits.

- **7** Sets the data bits at 7.
- **8** **DEFAULT** Sets the data bits at 8.

→ Parity [None]

Use the **Parity** option to specify the parity bit that can be sent with the data bits for detecting the transmission errors.

- **None** **DEFAULT** No parity bit is sent with the data bits.
- **Even** The parity bit is 0 if the number of ones in the data bits is even.
- **Odd** The parity bit is 0 if the number of ones in the data bits is odd.
- **Mark** The parity bit is always 1. This option does not provide error detection.
- **Space** The parity bit is always 0. This option does not provide error detection.

→ Stop Bits [1]

Use the **Stop Bits** option to specify the number of stop bits used to indicate the end of a serial data packet. Communication with slow devices may require more than 1 stop bit.

- ➔ 1 **DEFAULT** Sets the number of stop bits at 1.
- ➔ 2 Sets the number of stop bits at 2.

5.3.7 CPU Configuration

Use the **CPU Configuration** menu (**BIOS Menu 13**) to view detailed CPU specifications and configure the CPU.

Aptio Setup Utility - Copyright (C) 2016 American Megatrends, Inc.

BIOS Menu 13: CPU Configuration

KINO-AQ170 Industrial Motherboard

→ Active Processor Cores [All]

Use the **Active Processor Cores** BIOS option to enable numbers of cores in the processor package.

- **All** **DEFAULT** Enable all cores in the processor package.
- **1** Enable one core in the processor package.
- **2** Enable two cores in the processor package.
- **3** Enable three cores in the processor package.

→ Intel® Virtualization Technology [Disabled]

Use the **Intel® Virtualization Technology** option to enable or disable virtualization on the system. When combined with third party software, Intel® Virtualization technology allows several OSs to run on the same system at the same time.

- **Disabled** **DEFAULT** Disables Intel® Virtualization Technology.
- **Enabled** Enables Intel® Virtualization Technology.

→ Intel® SpeedStep™ [Enabled]

Use the **Intel® SpeedStep™** option to enable or disable the Intel® SpeedStep Technology.

- **Disabled** Disables the Intel® SpeedStep Technology.
- **Enabled** **DEFAULT** Enables the Intel® SpeedStep Technology.

→ CPU C State [Disabled]

Use the **CPU C State** option to enable or disable CPU C state.

- **Disabled** **DEFAULT** Disables CPU C state.
- **Enabled** Enables CPU C state.

→ Intel TXT(LT) Support [Disabled]

Use the **Intel TXT(LT) Support** option to enable or disable the Intel® TXT (LT) support.

→ **Disabled** **DEFAULT** Disables Intel® TXT (LT) support.

→ **Enabled** Enables Intel® TXT (LT) support.

5.3.8 SATA Configuration

Use the **SATA Configuration** menu (**BIOS Menu 14**) to change and/or set the configuration of the SATA devices installed in the system.

Aptio Setup Utility - Copyright (C) 2016 American Megatrends, Inc.		
Advanced

BIOS Menu 14: SATA Configuration

→ **STAT Controller(s) [Enabled]**

Use the **STAT Controller(s)** option to enable or disable the SATA device.

→ **Enabled** **DEFAULT** Enables the SATA device.

→ **Disabled** Disables the SATA device.

KINO-AQ170 Industrial Motherboard

→ SATA Mode Selection [AHCI]

Use the **SATA Mode Selection** option to configure SATA devices as AHCI devices.

- **AHCI** **DEFAULT** Configures SATA devices as AHCI device.
 - **RAID** Configures SATA devices as RAID device.
-

NOTE:

Before accessing the RAID configuration utility, ensure to set the **Option ROM Messages** BIOS option in the **Boot** menu to **Force BIOS**. This is to allow the “Press <CTRL+I> to enter Configuration Utility.....” message to appear during POST. Press Ctrl+I when prompted to enter the RAID configuration utility.

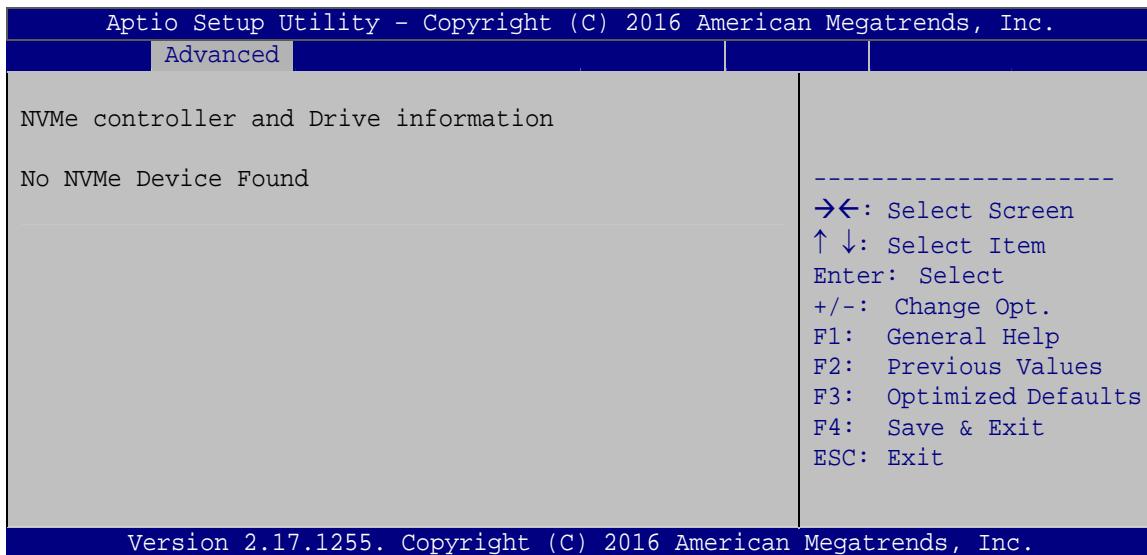

→ Hot Plug [Disabled]

Use the **Hot Plug** option to enable or disable the SATA device hot plug.

- **Disabled** **DEFAULT** Disables the SATA device hot plug.
- **Enabled** Enables the SATA device hot plug

5.3.9 NVMe Configuration

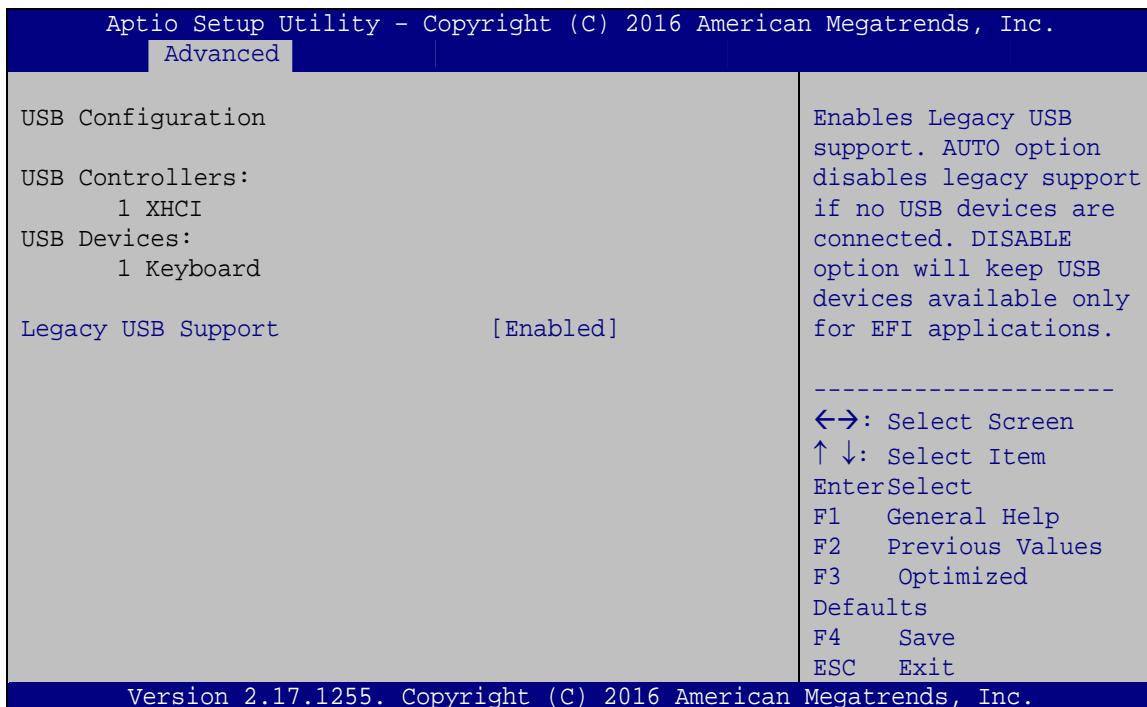

Use the **NVMe Configuration (BIOS Menu 15)** menu to display the NVMe controller and device information.

BIOS Menu 15: NVMe Configuration

5.3.10 USB Configuration

Use the **USB Configuration** menu (**BIOS Menu 16**) to read USB configuration information and configure the USB settings.

BIOS Menu 16: USB Configuration

→ **USB Devices**

The **USB Devices Enabled** field lists the USB devices that are enabled on the system

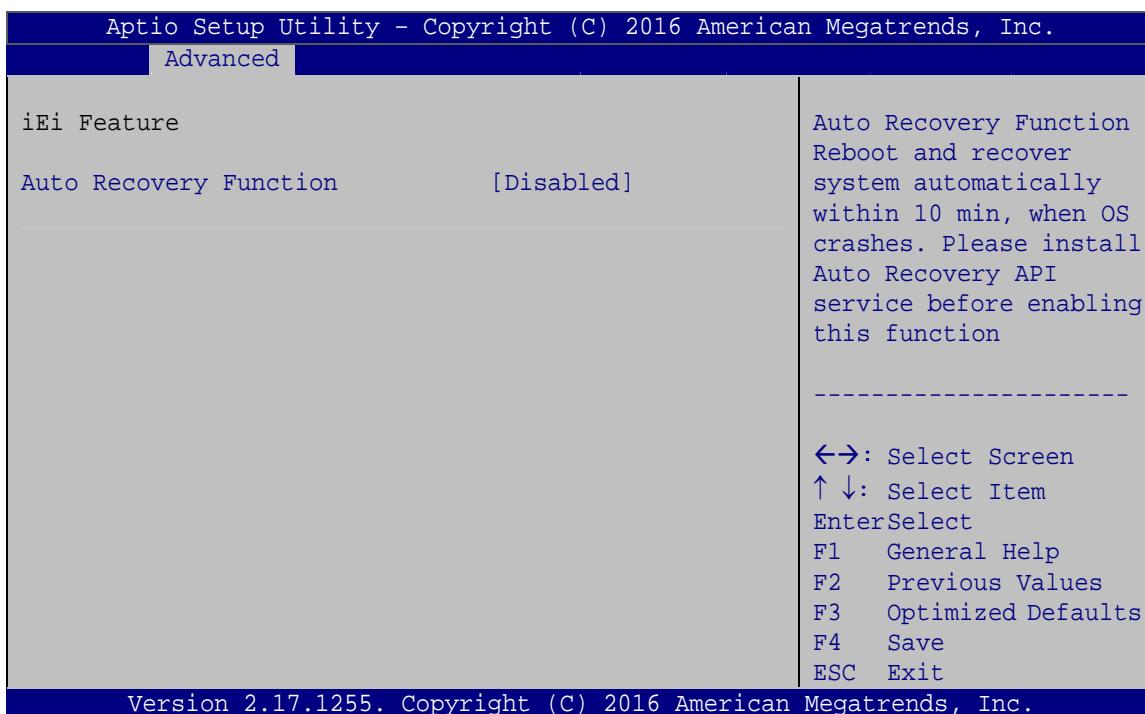

→ **Legacy USB Support [Enabled]**

Use the **Legacy USB Support** BIOS option to enable USB mouse and USB keyboard support. Normally if this option is not enabled, any attached USB mouse or USB keyboard does not become available until a USB compatible operating system is fully booted with all USB drivers loaded. When this option is enabled, any attached USB mouse or USB keyboard can control the system even when there is no USB driver loaded onto the system.

- ➔ **Enabled** **DEFAULT** Legacy USB support enabled
- ➔ **Disabled** Legacy USB support disabled
- ➔ **Auto** Legacy USB support disabled if no USB devices are connected

5.3.11 IEI Feature

Use the **IEI Feature** menu (**BIOS Menu 17**) to configure One Key Recovery function.

BIOS Menu 17: IEI Feature

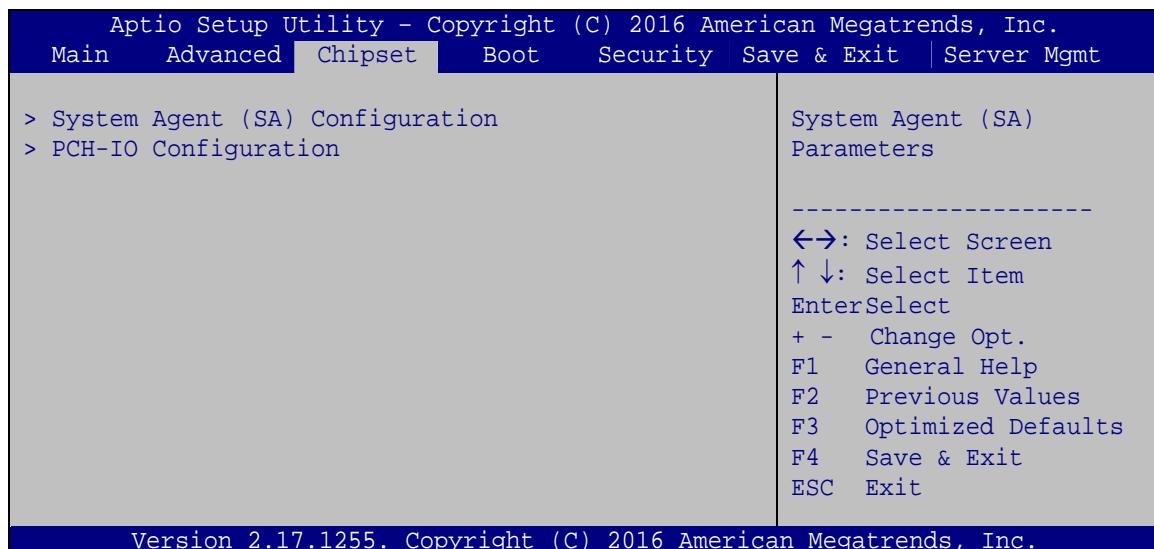

➔ **Auto Recovery Function [Disabled]**

Use the **Auto Recovery Function** BIOS option to enable or disable the auto recovery function of the IEI One Key Recovery.

- ➔ **Disabled** **DEFAULT** Auto recovery function disabled
- ➔ **Enabled** Auto recovery function enabled

5.4 Chipset

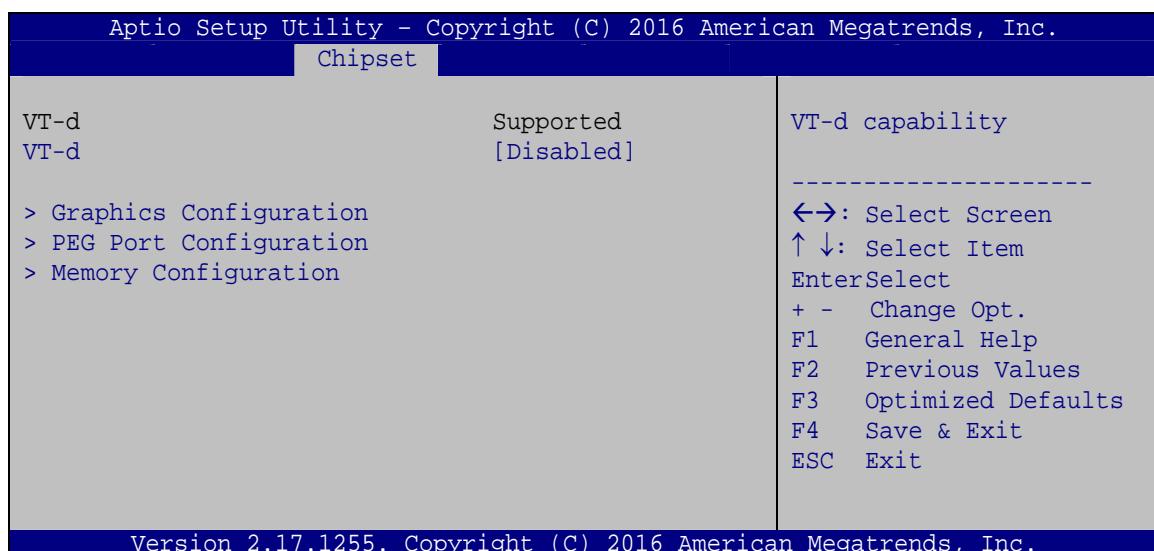

Use the **Chipset** menu (**BIOS Menu 18**) to configure the system chipset.

BIOS Menu 18: Chipset

5.4.1 System Agent (SA) Configuration

Use the **System Agent (SA) Configuration** menu (**BIOS Menu 19**) to configure the System Agent (SA) parameters.

BIOS Menu 19: System Agent (SA) Configuration

→ **VT-d [Disabled]**

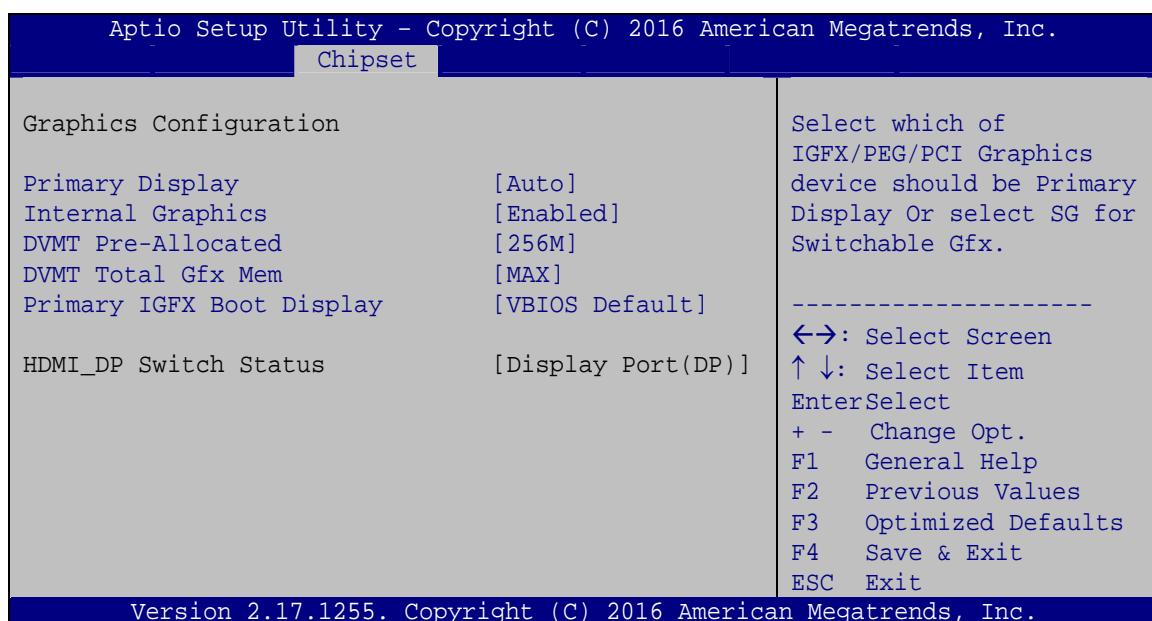

Use the **VT-d** option to enable or disable VT-d support.

→ **Disabled** **DEFAULT** Disable VT-d support.

→ **Enabled** Enable VT-d support.

5.4.1.1 Graphics Configuration

Use the **Graphics Configuration** menu (**BIOS Menu 20**) to configure the graphics settings.

BIOS Menu 20: Graphics Configuration

→ **Primary Display [Auto]**

Use the **Primary Display** option to select the graphics controller used as the primary boot device. Configuration options are listed below:

- Auto **DEFAULT**
- IGFX
- PEG
- PCIE

KINO-AQ170 Industrial Motherboard

→ Internal Graphics [Enabled]

Use the **Internal Graphics** option to enable or disable the internal graphics device.

→ **Auto** The internal graphics device is automatically detected and enabled.

→ **Disabled** Disable the internal graphics device.

→ **Enabled** **DEFAULT** Enable the internal graphics device. The following options_submenu appear with values that can be selected:

DVMT Pre-Allocated

DVMT Total Gfx Mem

LCD Control

→ DVMT Pre-Allocated [256M]

Use the **DVMT Pre-Allocated** option to set the amount of system memory allocated to the integrated graphics processor when the system boots. The system memory allocated can then only be used as graphics memory, and is no longer available to applications or the operating system. Configuration options are listed below:

- 32M
- 64M
- 128M
- 256M **DEFAULT**
- 512M

→ DVMT Total Gfx Mem [MAX]

Use the **DVMT Total Gfx Mem** option to select DVMT 5.0 total graphic memory size used by the internal graphics device. The following options are available:

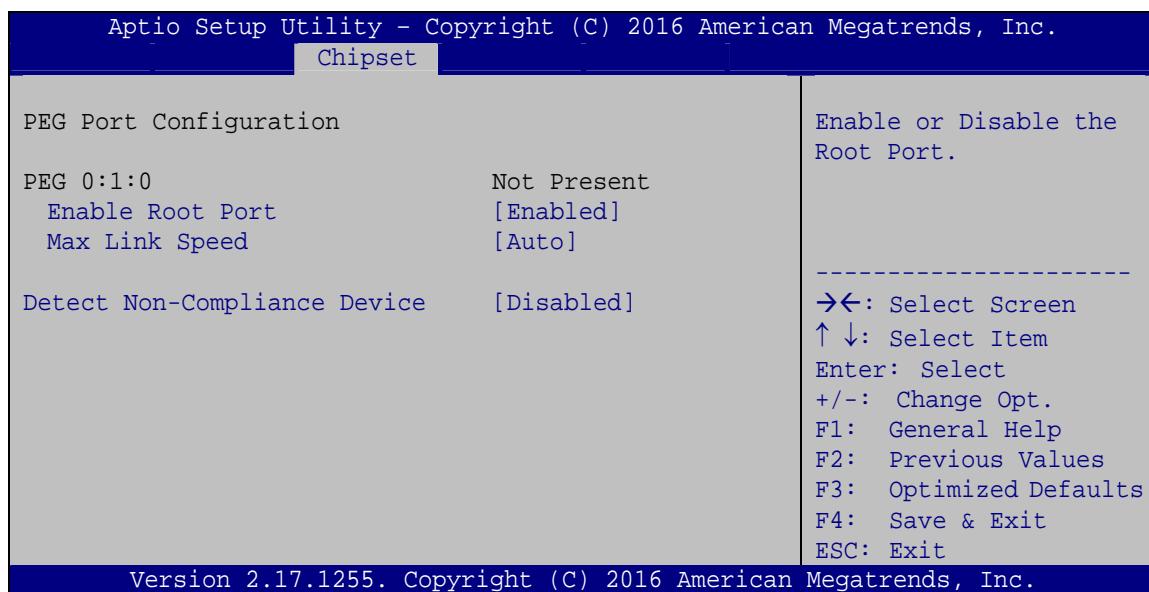

- 128M
- 256M
- MAX **DEFAULT**

→ Primary IGFX Boot Display [VBIOS Default]

Use the **Primary IGFX Boot Display** option to select the display device used by the system when it boots.

- VBIOS Default **DEFAULT**
- HDMI 2.0
- CRT
- IDP
- DP1.2/HDMI

5.4.1.2 PEG Port Configuration

BIOS Menu 21: PEG Port Configuration

→ **Enable Root Port [Enabled]**

Use the **Enable Root Port** option to enable or disable the PCI Express (PEG) controller.

- | | |
|-------------------|--|
| → Disabled | Disables the PCI Express (PEG) controller. |
| → Enabled | DEFAULT Enables the PCI Express (PEG) controller. |

KINO-AQ170 Industrial Motherboard

→ Max Link Speed [Auto]

Use the **Max Link Speed** option to select the maximum link speed of the PCI Express slot.

The following options are available:

- Auto **Default**
- Gen1
- Gen2
- Gen3

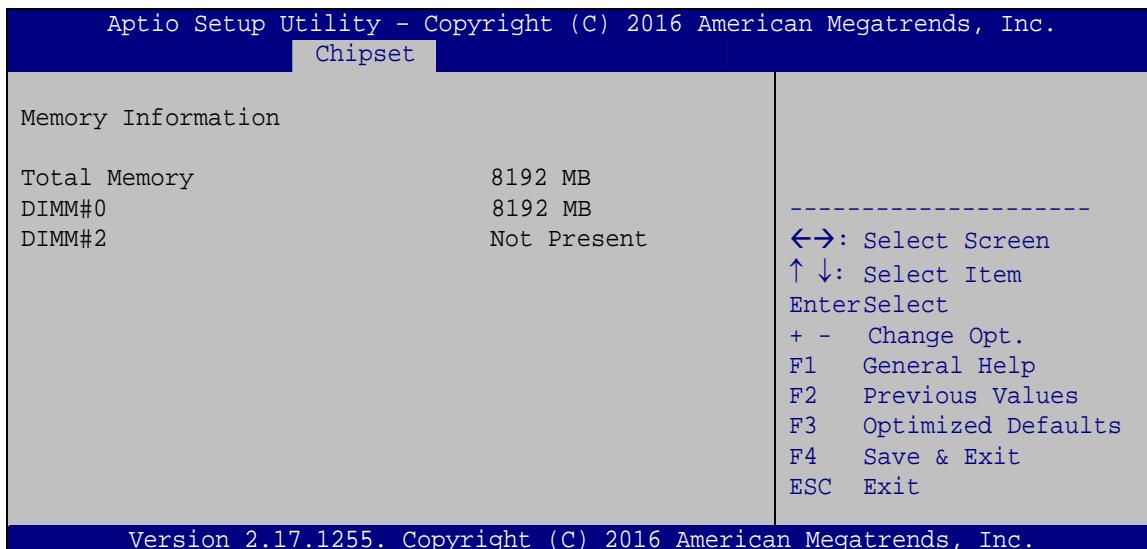

→ Detect Non-Compliance Device [Disabled]

Use the **Detect Non-Compliance Device** option to enable or disable detecting if a non-compliance PCI Express device is connected to the PCI Express slot.

- | | | |
|-------------------|----------------|---|
| → Disabled | DEFAULT | Disables to detect if a non-compliance PCI Express device is connected to the PCI Express slot. |
| → Enabled | | Enables to detect if a non-compliance PCI Express device is connected to the PCI Express slot. |

5.4.1.3 Memory Configuration

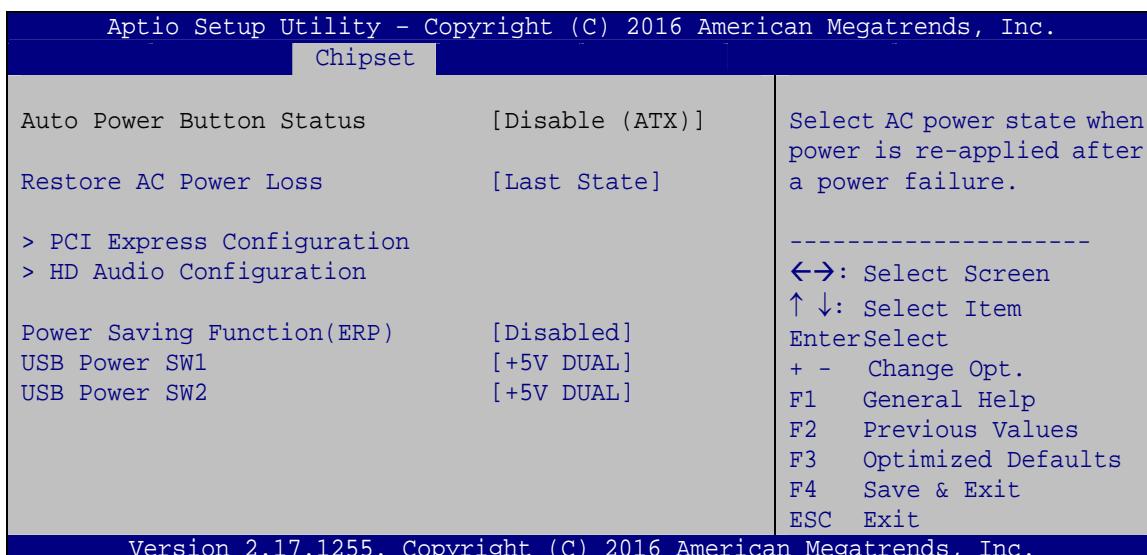

Use the **Memory Configuration** submenu (**BIOS Menu 22**) to display the memory information.

BIOS Menu 22: Memory Configuration

5.4.2 PCH-IO Configuration

Use the **PCH-IO Configuration** menu (**BIOS Menu 23**) to configure the PCH-IO chipset.

BIOS Menu 23: PCH-IO Configuration

KINO-AQ170 Industrial Motherboard

→ Restore AC Power Loss [Last State]

Use the **Restore AC Power** BIOS option to specify what state the system returns to if there is a sudden loss of power to the system.

- **Power Off** The system remains turned off
- **Power On** The system turns on
- **Last State** **DEFAULT** The system returns to its previous state. If it was on, it turns itself on. If it was off, it remains off.

→ Power Saving Function(ERP) [Disabled]

Use the **Power Saving Function(ERP)** BIOS option to enable or disable the power saving function.

- **Disabled** **DEFAULT** Power saving function is disabled.
- **Enabled** Power saving function is enabled. It will reduce power consumption when the system is off.

→ USB Power SW1 [+5V DUAL]

Use the **USB Power SW1** BIOS option to configure the USB power source for the corresponding USB connectors (**Table 5-1**).

- **+5V DUAL** **DEFAULT** Sets the USB power source to +5V dual
- **+5V** Sets the USB power source to +5V

→ USB Power SW2 [+5V DUAL]

Use the **USB Power SW2** BIOS option to configure the USB power source for the corresponding USB connectors (**Table 5-1**).

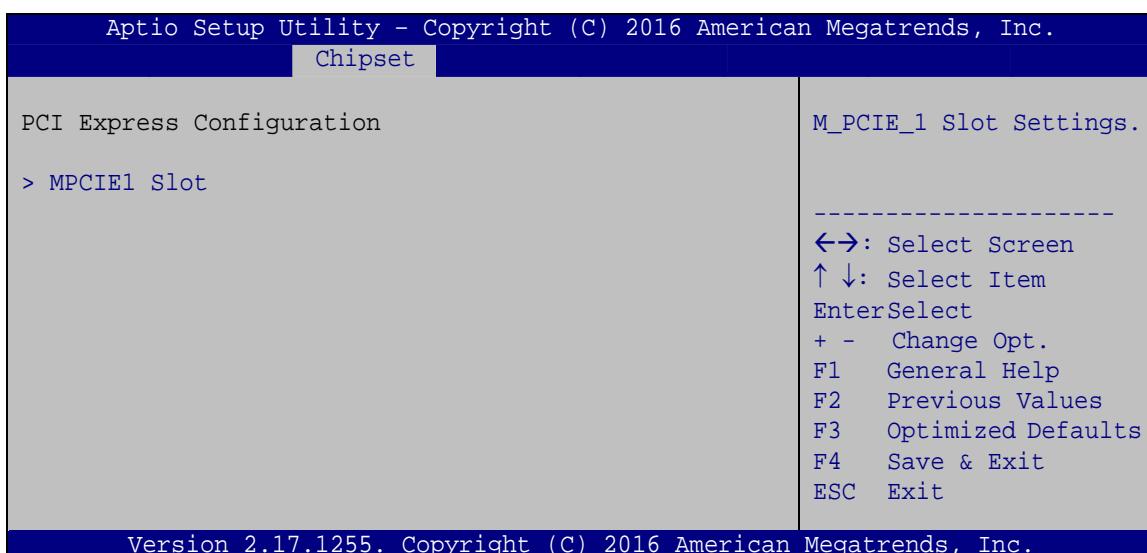

- **+5V DUAL** **DEFAULT** Sets the USB power source to +5V dual
- **+5V** Sets the USB power source to +5V

BIOS Options	Configured USB Ports
USB Power SW1	K/M_USB1 (external USB 2.0 ports) LAN1_USB1 (external USB 3.0 ports) LAN2_USB2 (external USB 3.0 ports)
USB Power SW2	USB1 (internal USB 2.0 ports) USB2 (internal USB 2.0 ports)

Table 5-1: BIOS Options and Configured USB Ports

5.4.2.1 PCI Express Configuration

Use the **PCI Express Configuration** submenu (**BIOS Menu 24**) to configure the PCI Express slots.

BIOS Menu 24: PCI Express Configuration

The **MPCIE1 Slot** submenu contains the following options:

→ **PCIe Speed [Auto]**

Use the **PCIe Speed** option to configure the PCIe interface speed.

- Auto **DEFAULT**

KINO-AQ170 Industrial Motherboard

- Gen 1
- Gen 2
- Gen 3

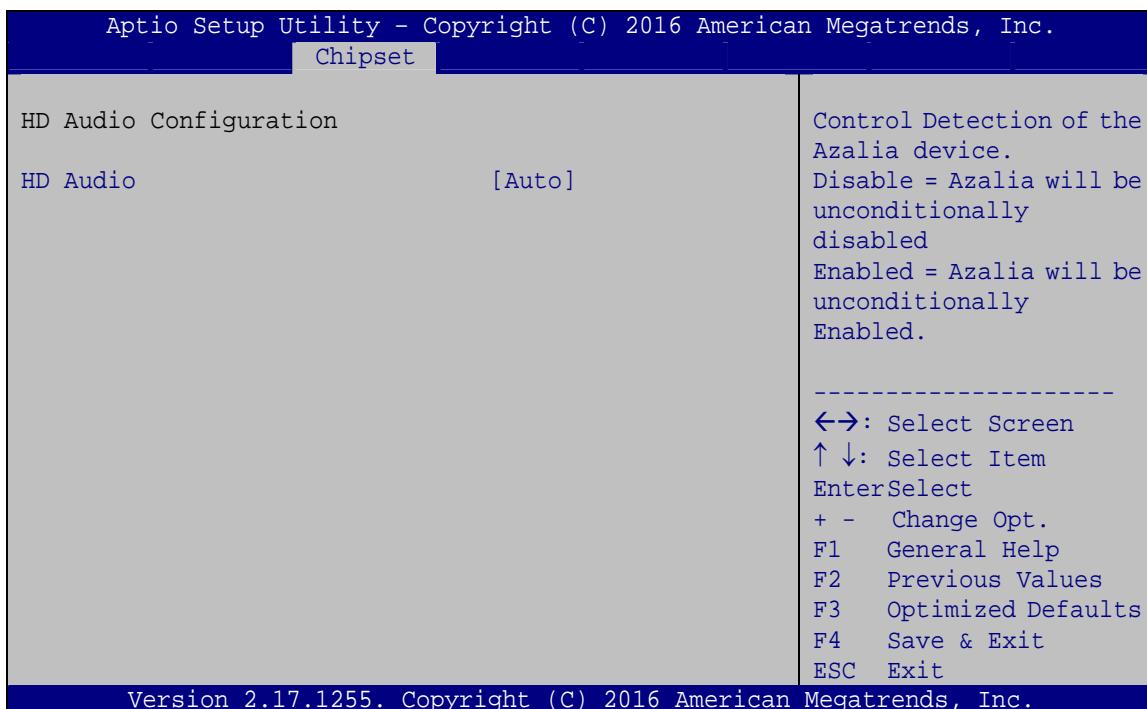

→ Detect Non-Compliance Device [Disabled]

Use the **Detect Non-Compliance Device** option to enable or disable detecting if a non-compliance PCI Express device is connected to the PCI Express slot.

- | | |
|-------------------|--|
| → Disabled | DEFAULT Disables to detect if a non-compliance PCI Express device is connected to the PCI Express slot. |
| → Enabled | Enables to detect if a non-compliance PCI Express device is connected to the PCI Express slot. |

5.4.2.2 HD Audio Configuration

Use the **HD Audio Configuration** submenu (**BIOS Menu 25**) to configure the High Definition Audio codec.

BIOS Menu 25: HD Audio Configuration

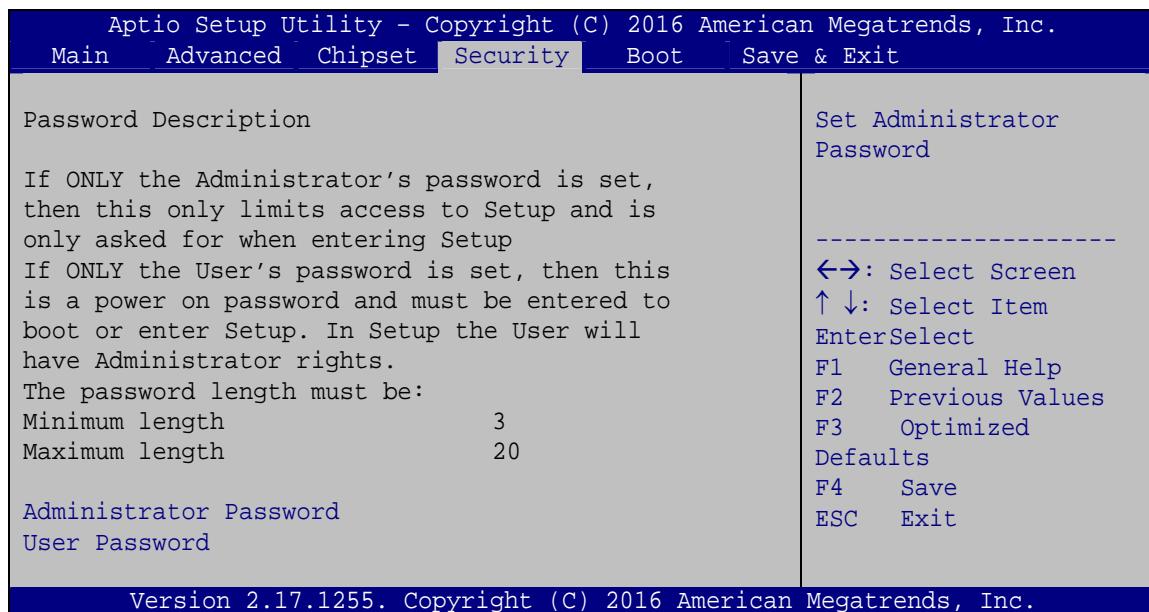

→ HD Audio [Auto]

Use the **HD Audio** BIOS option to enable or disable the High Definition Audio controller.

- **Disabled** The High Definition Audio controller is disabled.
- **Enabled** The High Definition Audio controller is enabled.
- **Auto** **DEFAULT** The onboard High Definition Audio controller automatically detected and enabled.

5.5 Security

Use the **Security** menu (**BIOS Menu 26**) to set system and user passwords.

BIOS Menu 26: Security

→ Administrator Password

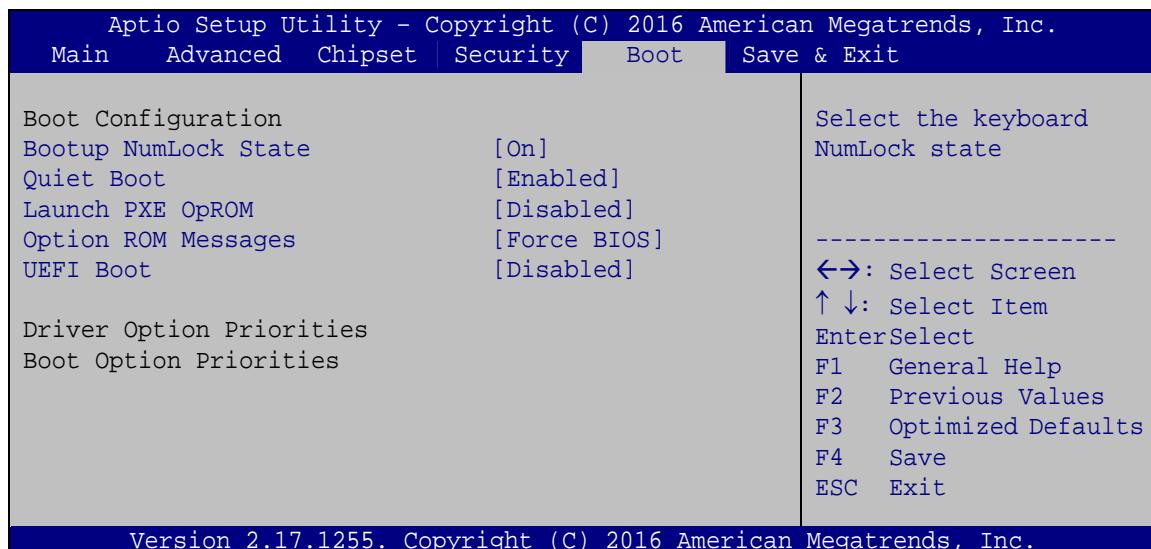

Use the **Administrator Password** to set or change a administrator password.

→ User Password

Use the **User Password** to set or change a user password.

5.6 Boot

Use the **Boot** menu (**BIOS Menu 27**) to configure system boot options.

BIOS Menu 27: Boot

→ Bootup NumLock State [On]

Use the **Bootup NumLock State** BIOS option to specify if the number lock setting must be modified during boot up.

- | | | |
|-------|---------|--|
| → On | DEFAULT | Allows the Number Lock on the keyboard to be enabled automatically when the computer system boots up. This allows the immediate use of the 10-key numeric keypad located on the right side of the keyboard. To confirm this, the Number Lock LED light on the keyboard is lit. |
| → Off | | Does not enable the keyboard Number Lock automatically. To use the 10-keys on the keyboard, press the Number Lock key located on the upper left-hand corner of the 10-key pad. The Number Lock LED on the keyboard lights up when the Number Lock is engaged. |

→ Quiet Boot [Enabled]

Use the **Quiet Boot** BIOS option to select the screen display when the system boots.

- ➔ **Disabled** Normal POST messages displayed
 - ➔ **Enabled** **DEFAULT** OEM Logo displayed instead of POST messages

→ Launch PXE OpROM [Disabled]

Use the **Launch PXE OpROM** option to enable or disable boot option for legacy network devices.

- | | | | |
|---|-----------------|----------------|-----------------------------|
| → | Disabled | DEFAULT | Ignore all PXE Option ROMs. |
| → | Enabled | | Load PXE Option ROMs. |

→ Option ROM Messages [Force BIOS]

Use the **Option ROM Messages** option to set the Option ROM display mode.

- **Force BIOS** **DEFAULT** Sets display mode to force BIOS.
 - **Keep Current** Sets display mode to current.

→ UEFI Boot [Disabled]

Use the **UEFI Boot** option to enable or disable to boot from the UEFI devices.

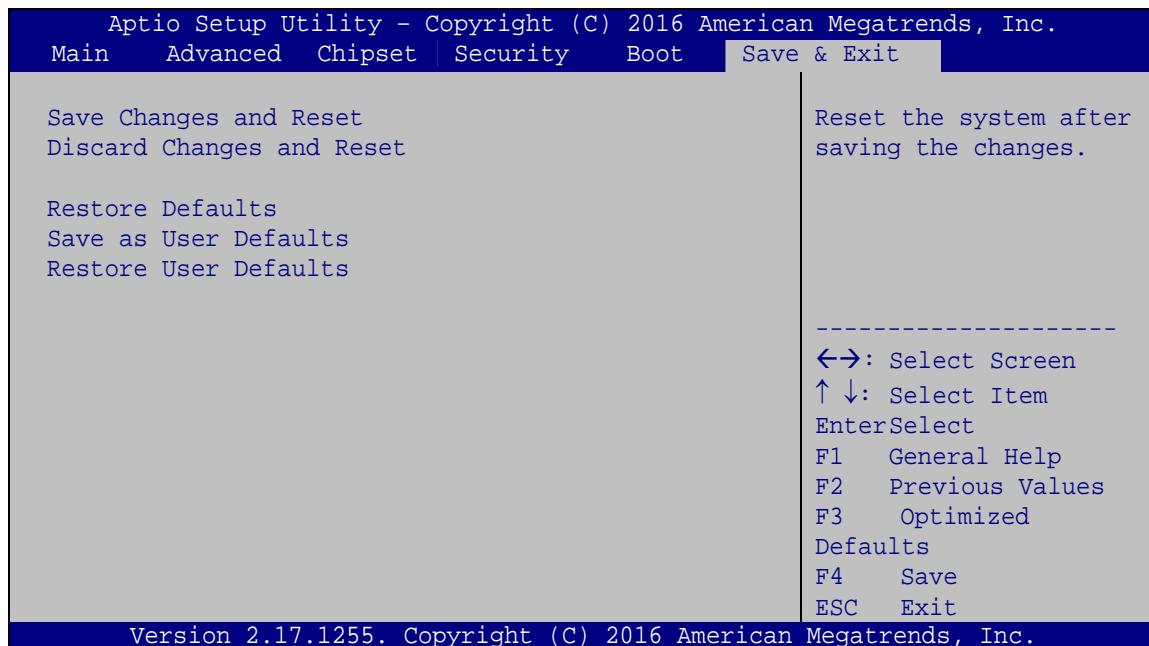

- ➔ **Enabled** Boot from UEFI devices is enabled.
 - ➔ **Disabled** **DEFAULT** Boot from UEFI devices is disabled.

→ Boot Option Priority

Use the **Boot Option Priority** function to set the system boot sequence from the available devices. The drive sequence also depends on the boot sequence in the individual device section.

5.7 Save & Exit

Use the **Save & Exit** menu (**BIOS Menu 28**) to load default BIOS values, optimal failsafe values and to save configuration changes.

BIOS Menu 28: Exit

→ Save Changes and Reset

Use the **Save Changes and Reset** option to save the changes made to the BIOS options and to exit the BIOS configuration setup program.

→ Discard Changes and Reset

Use the **Discard Changes and Reset** option to exit the system without saving the changes made to the BIOS configuration setup program.

→ Restore Defaults

Use the **Restore Defaults** option to load the optimal default values for each of the parameters on the Setup menus. **F3 key can be used for this operation.**

→ **Save as User Defaults**

Use the **Save as User Defaults** option to save the changes done so far as user defaults.

→ **Restore User Defaults**

Use the **Restore User Defaults** option to restore the user defaults to all the setup options.

Chapter

6

Software Drivers

**NOTE:**

The content of the CD may vary throughout the life cycle of the product and is subject to change without prior notice. Visit the IEI website or contact technical support for the latest updates.

6.1 Software Installation

All the drivers for the KINO-AQ170 are on the CD that came with the system. To install the drivers, please follow the steps below.

Step 1: Insert the CD into a CD drive connected to the system.

**NOTE:**

If the installation program doesn't start automatically:

Click "Start->My Computer->CD Drive->autorun.exe"

Step 2: The driver main menu appears.

Step 3: Click **KINO-AQ170**.

Step 4: A new screen with a list of available drivers appears.

Step 5: Install all of the necessary drivers in the menu.

6.2 Available Software Drivers

All the drivers for the KINO-AQ170 are on the utility CD that came with the system. The utility CD contains drivers for Windows 7, Windows 8 and Windows 10 operating systems. If the drivers are not installed automatically, please install the following drivers manually.

The following drivers can be installed on the **KINO-AQ170**:

- Chipset
- VGA
- LAN
- Audio
- USB 3.0 (for Windows 7 and Windows 8.1 OS)
- Kernel-Mode Driver Framework (for Windows 7 OS only)
- ME (Intel® AMT)
- RST (Intel® Rapid Storage Technology)
- Intel® Serial IO (for Windows 8.1/10 64-bit OS only)

NOTE:

The Intel TXE requires that Microsoft's "Kernel-Mode Driver Framework (KMDF) version 1.11 update for Windows 7" must be installed first on Windows 7 OS. If the KMDF is not installed, either error 37 or error 28 may appear on the Intel TXE device in Device Manager.

Please find the KMDF version 1.11 update for Windows 7 in the TXE driver folder in the driver CD or click the following link to download it.

Appendix

A

Regulatory Compliance

DECLARATION OF CONFORMITY

This equipment has been tested and found to comply with specifications for CE marking. If the user modifies and/or installs other devices in the equipment, the CE conformity declaration may no longer apply.

FCC WARNING

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference, and
- This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

Appendix

B

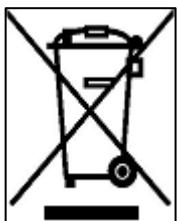

Product Disposal

**CAUTION:**

Risk of explosion if battery is replaced by an incorrect type. Only certified engineers should replace the on-board battery.

Dispose of used batteries according to instructions and local regulations.

- Outside the European Union – If you wish to dispose of used electrical and electronic products outside the European Union, please contact your local authority so as to comply with the correct disposal method.
- Within the European Union – The device that produces less waste and is easier to recycle is classified as electronic device in terms of the European Directive 2012/19/EU (WEEE), and must not be disposed of as domestic garbage.

EU-wide legislation, as implemented in each Member State, requires that waste electrical and electronic products carrying the mark (left) must be disposed of separately from normal household waste. This includes monitors and electrical accessories, such as signal cables or power cords. When you need to dispose of your device, please follow the guidance of your local authority, or ask the shop where you purchased the product. The mark on electrical and electronic products only applies to the current European Union Member States.

Please follow the national guidelines for electrical and electronic product disposal.

D

Terminology

KINO-AQ170 Industrial Motherboard

AC '97	Audio Codec 97 (AC'97) refers to a codec standard developed by Intel® in 1997.
ACPI	Advanced Configuration and Power Interface (ACPI) is an OS-directed configuration, power management, and thermal management interface.
AHCI	Advanced Host Controller Interface (AHCI) is a SATA Host controller register-level interface.
ATA	The Advanced Technology Attachment (ATA) interface connects storage devices including hard disks and CD-ROM drives to a computer.
APM	The Advanced Power Management (APM) application program interface (API) enables the inclusion of power management in the BIOS.
ARMD	An ATAPI Removable Media Device (ARMD) is any ATAPI device that supports removable media, besides CD and DVD drives.
ASKIR	Amplitude Shift Keyed Infrared (ASKIR) is a form of modulation that represents a digital signal by varying the amplitude ("volume") of the signal. A low amplitude signal represents a binary 0, while a high amplitude signal represents a binary 1.
BIOS	The Basic Input/Output System (BIOS) is firmware that is first run when the computer is turned on and can be configured by the end user
CODEC	The Compressor-Decompressor (CODEC) encodes and decodes digital audio data on the system.
CMOS	Complimentary metal-oxide-conductor is a type of integrated circuit used in chips like static RAM and microprocessors.
COM	COM is used to refer to serial ports. Serial ports offer serial communication to expansion devices. The serial port on a personal

computer is usually a male DE-9 connector.

DAC	The Digital-to-Analog Converter (DAC) converts digital signals to analog signals.
DDR	Double Data Rate refers to a data bus transferring data on both the rising and falling edges of the clock signal.
DMA	Direct Memory Access (DMA) enables some peripheral devices to bypass the system processor and communicate directly with the system memory.
DIMM	Dual Inline Memory Modules are a type of RAM that offer a 64-bit data bus and have separate electrical contacts on each side of the module.
EHCI	The Enhanced Host Controller Interface (EHCI) specification is a register-level interface description for USB 2.0 Host Controllers.
GbE	Gigabit Ethernet (GbE) is an Ethernet version that transfers data at 1.0 Gbps and complies with the IEEE 802.3-2005 standard.
GPIO	General purpose input
IrDA	Infrared Data Association (IrDA) specify infrared data transmission protocols used to enable electronic devices to wirelessly communicate with each other.
L1 Cache	The Level 1 Cache (L1 Cache) is a small memory cache built into the system processor.
L2 Cache	The Level 2 Cache (L2 Cache) is an external processor memory cache.
LVDS	Low-voltage differential signaling (LVDS) is a dual-wire, high-speed differential electrical signaling system commonly used to connect LCD displays to a computer.
MAC	The Media Access Control (MAC) protocol enables several terminals or network nodes to communicate in a LAN, or other multipoint networks.

KINO-AQ170 Industrial Motherboard

PCIe	PCI Express (PCIe) is a communications bus that uses dual data lines for full-duplex (two-way) serial (point-to-point) communications between the SBC components and/or expansion cards and the SBC chipsets. Each line has a 2.5 Gbps data transmission rate and a 250 MBps sustained data transfer rate.
POST	The Power-on Self Test (POST) is the pre-boot actions the system performs when the system is turned-on.
QVGA	Quarter Video Graphics Array (QVGA) refers to a display with a resolution of 320 x 240 pixels.
RAM	Random Access Memory (RAM) is a form of storage used in computer. RAM is volatile memory, so it loses its data when power is lost. RAM has very fast data transfer rates compared to other storage like hard drives.
SATA	Serial ATA (SATA) is a serial communications bus designed for data transfers between storage devices and the computer chipsets. The SATA bus has transfer speeds up to 1.5 Gbps and the SATA 3Gb/s bus has data transfer speeds of up to 3.0 Gbps.
S.M.A.R.T	Self Monitoring Analysis and Reporting Technology (S.M.A.R.T) refers to automatic status checking technology implemented on hard disk drives.
UART	Universal Asynchronous Receiver-transmitter (UART) is responsible for asynchronous communications on the system and manages the system's serial communication (COM) ports.
UHCI	The Universal Host Controller Interface (UHCI) specification is a register-level interface description for USB 1.1 Host Controllers.
USB	The Universal Serial Bus (USB) is an external bus standard for interfacing devices. USB 1.1 supports 12Mbps data transfer rates, while

USB 2.0 supports 480Mbps data transfer rates.

VGA

The Video Graphics Array (VGA) is a graphics display system developed by IBM.

Appendix

E

Digital I/O Interface

E.1 Introduction

The DIO connector on the KINO-AQ170 is interfaced to GPIO ports on the Super I/O chipset. The DIO has both 8-bit digital inputs and 8-bit digital outputs. The digital inputs and digital outputs are generally control signals that control the on/off circuit of external devices or TTL devices. Data can be read or written to the selected address to enable the DIO functions.

NOTE:

For further information, please refer to the datasheet for the Super I/O chipset.

The BIOS interrupt call **INT 15H** controls the digital I/O.

INT 15H:

AH – 6FH
<u>Sub-function:</u>
AL – 8 : Set the digital port as INPUT
AL : Digital I/O input value

E.2 Assembly Language Sample 1

```
MOV      AX, 6F08H      ;setting the digital port as input  
INT      15H           ;
```

AL low byte = value

AH – 6FH
<u>Sub-function:</u>
AL – 9 :Set the digital port as OUTPUT
BL :Digital I/O input value

E.3 Assembly Language Sample 2

```
MOV      AX, 6F09H      ;setting the digital port as output  
MOV      BL, 09H         ;digital value is 09H  
INT      15H           ;
```

Digital Output is 1001b

Appendix

F

Watchdog Timer

**NOTE:**

The following discussion applies to DOS. Contact IEI support or visit the IEI website for drivers for other operating systems.

The Watchdog Timer is a hardware-based timer that attempts to restart the system when it stops working. The system may stop working because of external EMI or software bugs. The Watchdog Timer ensures that standalone systems like ATMs will automatically attempt to restart in the case of system problems.

A BIOS function call (INT 15H) is used to control the Watchdog Timer.

INT 15H:

AH – 6FH Sub-function:	
AL – 2:	Sets the Watchdog Timer's period.
BL:	Time-out value (Its unit-second is dependent on the item "Watchdog Timer unit select" in CMOS setup).

Table F-1: AH-6FH Sub-function

Call sub-function 2 to set the time-out period of Watchdog Timer first. If the time-out value is not zero, the Watchdog Timer starts counting down. When the timer value reaches zero, the system resets. To ensure that this reset condition does not occur, calling sub-function 2 must periodically refresh the Watchdog Timer. However, the watchdog timer is disabled if the time-out value is set to zero.

A tolerance of at least 10% must be maintained to avoid unknown routines within the operating system (DOS), such as disk I/O that can be very time-consuming.

**NOTE:**

The Watchdog Timer is activated through software. The software application that activates the Watchdog Timer must also deactivate it when closed. If the Watchdog Timer is not deactivated, the system will automatically restart after the Timer has finished its countdown.

EXAMPLE PROGRAM:

```
; INITIAL TIMER PERIOD COUNTER

;

W_LOOP:
;

    MOV      AX, 6F02H      ;setting the time-out value
    MOV      BL, 30          ;time-out value is 48 seconds
    INT      15H

;

; ADD THE APPLICATION PROGRAM HERE
;

    CMP      EXIT_AP, 1      ;is the application over?
    JNE      W_LOOP          ;No, restart the application

    MOV      AX, 6F02H      ;disable Watchdog Timer
    MOV      BL, 0           ;
    INT      15H

;

; EXIT ;
```

Appendix

G

Hazardous Materials Disclosure

The details provided in this appendix are to ensure that the product is compliant with the Peoples Republic of China (China) RoHS standards. The table below acknowledges the presences of small quantities of certain materials in the product, and is applicable to China RoHS only.

A label will be placed on each product to indicate the estimated "Environmentally Friendly Use Period" (EFUP). This is an estimate of the number of years that these substances would "not leak out or undergo abrupt change." This product may contain replaceable sub-assemblies/components which have a shorter EFUP such as batteries and lamps. These components will be separately marked.

Part Name	Toxic or Hazardous Substances and Elements					
	Lead (Pb)	Mercury (Hg)	Cadmium (Cd)	Hexavalent Chromium (CR(VI))	Polybrominated Biphenyls (PBB)	Polybrominated Diphenyl Ethers (PBDE)
Housing	O	O	O	O	O	O
Display	O	O	O	O	O	O
Printed Circuit Board	O	O	O	O	O	O
Metal Fasteners	O	O	O	O	O	O
Cable Assembly	O	O	O	O	O	O
Fan Assembly	O	O	O	O	O	O
Power Supply Assemblies	O	O	O	O	O	O
Battery	O	O	O	O	O	O

O: This toxic or hazardous substance is contained in all of the homogeneous materials for the part is below the limit requirement in SJ/T11363-2006 (now replaced by GB/T 26572-2011).

X: This toxic or hazardous substance is contained in at least one of the homogeneous materials for this part is above the limit requirement in SJ/T11363-2006 (now replaced by GB/T 26572-2011).

KINO-AQ170 Industrial Motherboard

此附件旨在确保本产品符合中国 RoHS 标准。以下表格标示此产品中某有毒物质的含量符合中国 RoHS 标准规定的限量要求。

本产品上会附有“环境友好使用期限”的标签，此期限是估算这些物质“不会有泄漏或突变”的年限。本产品可能包含有较短的环境友好使用期限的可替换元件，像是电池或灯管，这些元件将会单独标示出来。

部件名称	有毒有害物质或元素					
	铅 (Pb)	汞 (Hg)	镉 (Cd)	六价铬 (Cr(VI))	多溴联苯 (PBB)	多溴二苯醚 (PBDE)
壳体	O	O	O	O	O	O
显示	O	O	O	O	O	O
印刷电路板	O	O	O	O	O	O
金属螺帽	O	O	O	O	O	O
电缆组装	O	O	O	O	O	O
风扇组装	O	O	O	O	O	O
电力供应组装	O	O	O	O	O	O
电池	O	O	O	O	O	O

O: 表示该有毒有害物质在该部件所有物质材料中的含量均在 SJ/T11363-2006 (现由 GB/T 26572-2011 取代) 标准规定的限量要求以下。

X: 表示该有毒有害物质至少在该部件的某一均质材料中的含量超出 SJ/T11363-2006 (现由 GB/T 26572-2011 取代) 标准规定的限量要求。
