

MODEL:
KINO-KBN-i2

**Mini-ITX SBC with AMD® G-Series SoC Processor,
DDR3, VGA/HDMI, Dual GbE, USB 3.0, Dual Mini PCIe,
SATA 6Gb/s, Audio and RoHS**

User Manual

Revision

Date	Version	Changes
December 3, 2015	1.02	Added a note regarding how to use USB 3.0 ports for Windows 7 OS installation in Section 3.3.2 .
March 12, 2014	1.01	Added chassis intrusion connector (CHASSIS1) Added IPMI LED connector (ID_BT_FP1)
November 20, 2013	1.00	Initial release

Chapter

1

Introduction

1.1 Introduction

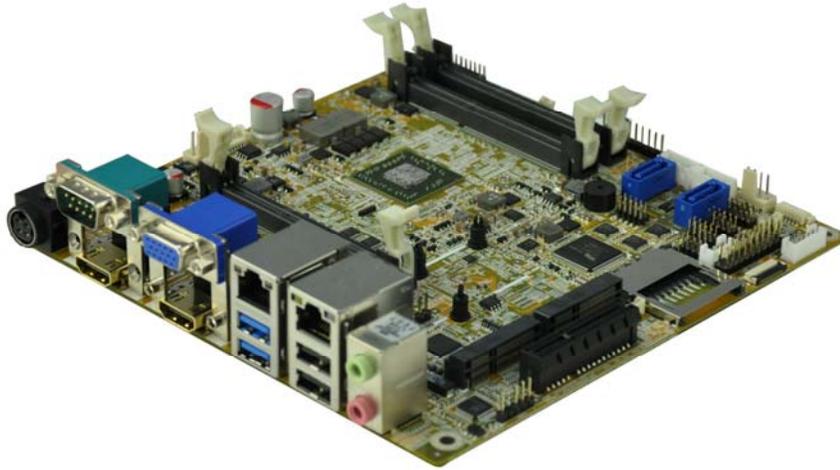

Figure 1-1: KINO-KBN-i2

The KINO-KBN-i2 Mini-ITX motherboard is an AMD® G-Series SoC processor platform. It supports two 1600/1333 MHz DDR3 SO-DIMM modules up to 8.0 GB.

The KINO-KBN-i2 includes a VGA connector and two HDMI connectors. Expansion and I/O include two USB 3.0 connectors on the rear panel, two USB 2.0 connectors on the rear panel, two USB 2.0 connectors by pin header and two SATA 6Gb/s connectors. Serial device connectivity is provided by three internal RS-232 connectors, one external RS-232 connector and one internal RS-422/485 connector. Two RJ-45 Ethernet connectors provide the system with smooth connections to an external LAN.

1.2 Model Variations

The model variations of the KINO-KBN-i2 Series are listed below.

Model No.	SoC
KINO-KBN-i2-4151-R10	AMD® G-Series GX-415GA, 15W, 1.5GHz
KINO-KBN-i2-2101-R10	AMD® G-Series GX-210HA, 9W, 1.0GHz
KINO-KBN-i2-4201-R10	AMD® G-Series GX-420CA, 25W, 2.0GHz
KINO-KBN-i2-2171-R10	AMD® G-Series GX-217GA, 15W, 1.65GHz

Table 1-1: KINO-KBN-i2 Model Variations

KINO-KBN-i2

1.3 Features

Some of the KINO-KBN-i2 motherboard features are listed below:

- Mini-ITX form factor with AMD® G-Series SoC processor supports DDR3 1600/1333 MHz memory
- 12V only single voltage design for AT/ATX power
- Dual independent display by VGA and dual HDMI
- Support dual PCIe Mini card slot with mSATA, wireless card and DOM capabilities
- IPMI 2.0 support by IPMI-01-R101 module card
- IEI One Key Recovery solution allows you to create rapid OS backup and recovery

1.4 Connectors

The connectors on the KINO-KBN-i2 are shown in the figure below.

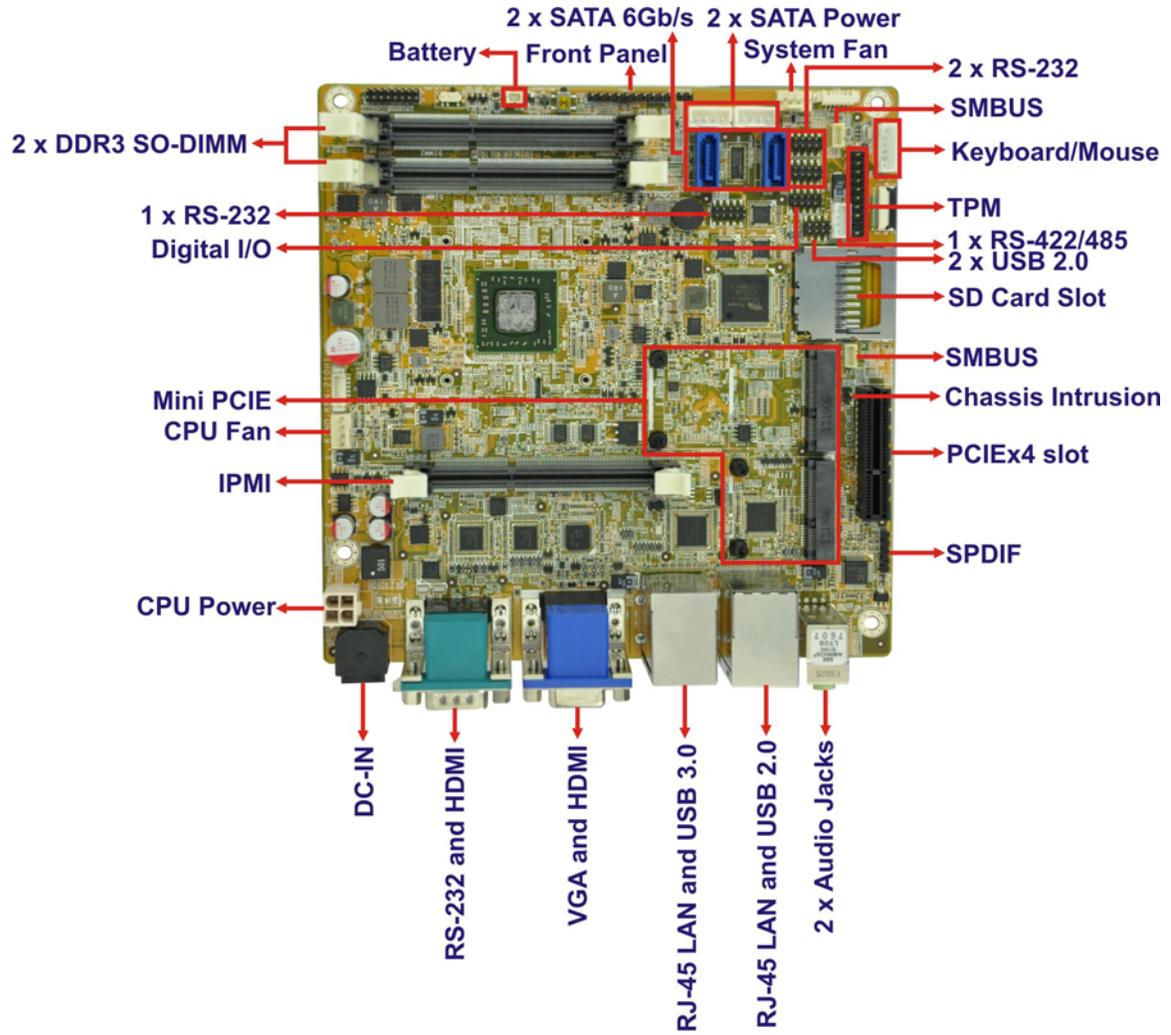

Figure 1-2: Connectors

KINO-KBN-i2

1.5 Dimensions

The dimensions of the board are listed below:

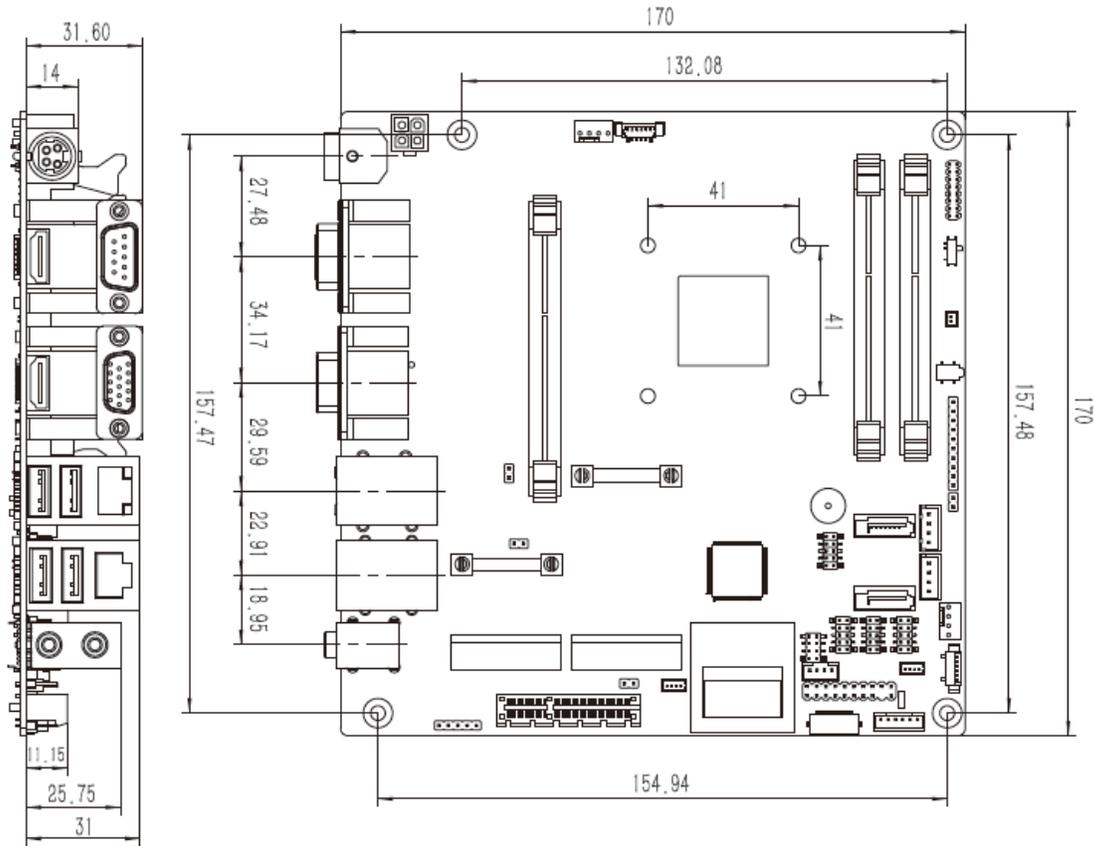

Figure 1-3: Dimensions (mm)

1.6 Data Flow

Figure 1-4 shows the data flow between the system chipset, the CPU and other components installed on the motherboard.

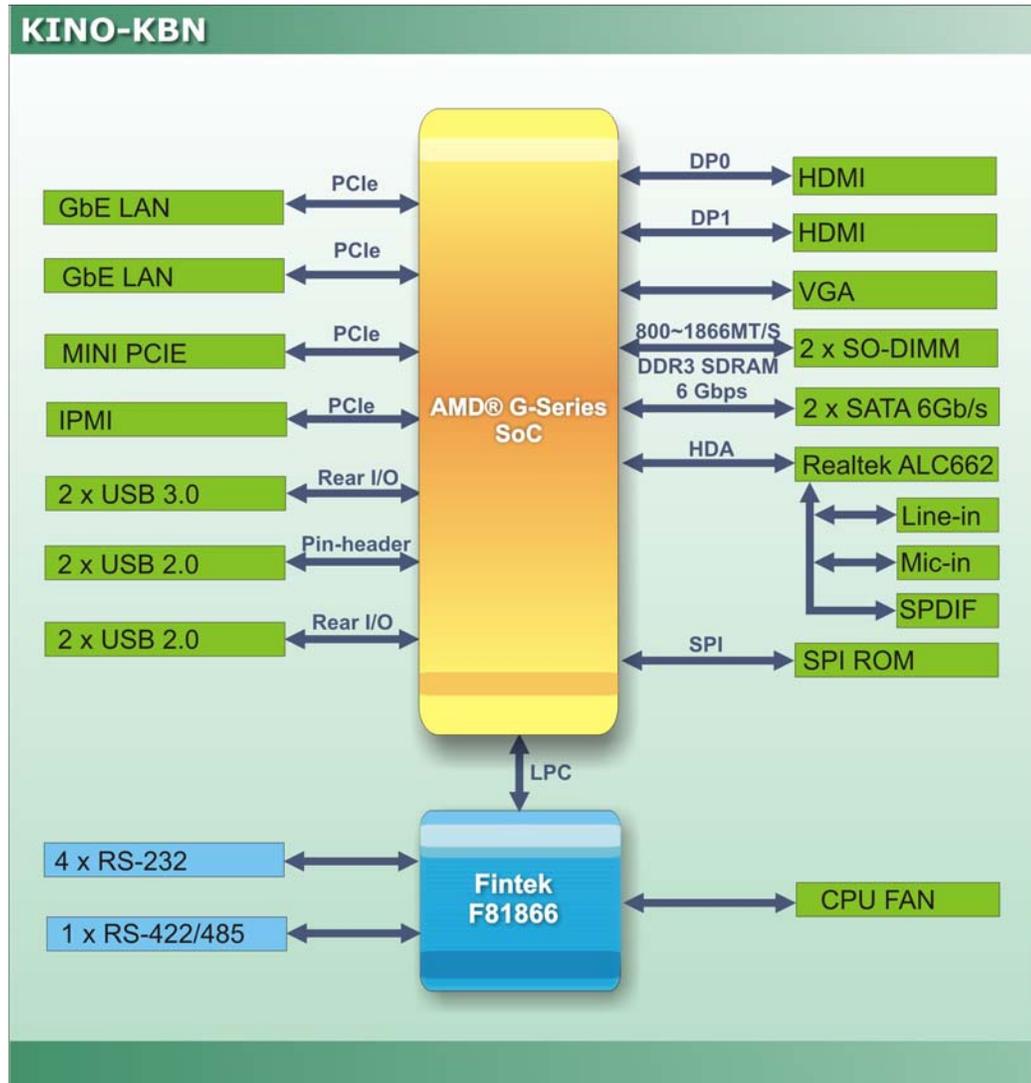

Figure 1-4: Data Flow Diagram

KINO-KBN-i2

1.7 Technical Specifications

KINO-KBN-i2 technical specifications are listed below.

Specification	KINO-KBN-i2
SoC	AMD® G-Series SoC processor
Memory	Two 204-pin 1600/1333 MHz single-channel DDR3 SO-DIMM supported (system max. 8 GB)
BIOS	UEFI BIOS
Ethernet	LAN1 (LAN1_USB2): Intel® I210-AT PCIe controller with NCSI support LAN2 (LAN2_USB2): Intel® I211-AT PCIe controller
Graphics	GPU frequency 300MHz (Radeon™ HD 8310E), DirectX® 11.1, UVD4.2, HDMI™ 1.4a, DisplayPort 1.2
Display Output	2 x HDMI (2560x1600) 1 x VGA (2560x1600)
Super IO	Fintek F81866
Audio	Realtek ALC892 HD Audio codec
Watchdog Timer	Software programmable supports 1~255 sec. system reset
I/O Interface Connectors	
Ethernet	Two RJ-45 ports
Audio Connector	1 x S/PDIF for digital audio 2 x Audio jacks on rear IO (line-out, mic-in)
Fan	1 x CPU fan connector (4-pin) 1 x System fan connector (4-pin)
Serial Ports	1 x RS-232 on rear I/O 3 x RS-232 by 8-pin (2x4) header 1 x RS-422/485 by 4-pin (1x4) wafer
USB Ports	2 x USB 3.0 on rear I/O 2 x USB 2.0 on rear I/O 2 x USB 2.0 by 8-pin (2x4) header

Specification	KINO-KBN-i2
Keyboard/Mouse	1 x KB/MS (6-pin wafer)
SD Card	1 x SD card
Front Panel	1 x Front panel (power LED, HDD LED, speaker, power button, reset button)
LAN LED	2 x LAN LED connector (2-pin, 1x2)
SMBus	1 x SMBus connector (4-pin, 1x4)
Digital I/O	8-bit digital I/O (4-bit input / 4-bit output)
IPMI	1 x IPMI slot
Storage	
Serial ATA	2 x SATA 6Gb/s with 5V/12V SATA power connector
Expansion	
Mini PCIe	1 x Full-size PCIe Mini card slot only for mSATA (SATA1 and mSATA shares SATA signal) 1 x Half-size PCIe Mini card slot
PCIe Slot	1 x PCIe x4 slot
Environmental and Power Specifications	
Power Supply	12V DC input only (AT/ ATX support) 1 x Internal power jack (4-pin, 2x2)
Power Consumption	12V@2.7A (AMD GX-424CC 2.4GHz CPU with 1600 MHz 8 GB DDR3 memory)
Operating Temperature	-10°C ~ 60°C
Storage Temperature	-20°C ~ 85°C
Humidity	5% ~ 95% (non-condensing)
Physical Specifications	
Dimensions	170mm x 170mm
Weight GW/NW	600 g / 250 g

Table 1-2: Technical Specifications

2

Unpacking

2.1 Anti-static Precautions

WARNING!

Static electricity can destroy certain electronics. Make sure to follow the ESD precautions to prevent damage to the product, and injury to the user.

Make sure to adhere to the following guidelines:

- **Wear an anti-static wristband:** Wearing an anti-static wristband can prevent electrostatic discharge.
- **Self-grounding:** Touch a grounded conductor every few minutes to discharge any excess static buildup.
- **Use an anti-static pad:** When configuring any circuit board, place it on an anti-static mat.
- **Only handle the edges of the PCB:** Don't touch the surface of the motherboard. Hold the motherboard by the edges when handling.

2.2 Unpacking Precautions

When the KINO-KBN-i2 is unpacked, please do the following:

- Follow the antistatic guidelines above.
- Make sure the packing box is facing upwards when opening.
- Make sure all the packing list items are present.

KINO-KBN-i2

2.3 Packing List

NOTE:

If any of the components listed in the checklist below are missing, do not proceed with the installation. Contact the IEI reseller or vendor the KINO-KBN-i2 was purchased from or contact an IEI sales representative directly by sending an email to sales@ieiworld.com.

The KINO-KBN-i2 is shipped with the following components:

Quantity	Item and Part Number	Image
1	KINO-KBN-i2 motherboard	
2	SATA with power output cable kit (P/N:32801-000100-300-RS)	
1	I/O shielding (P/N: 45014-0029C0-00-RS)	
1	Utility CD	
1	One Key Recovery CD	
1	Quick Installation Guide	

2.4 Optional Items

The following are optional components which may be separately purchased:

Item and Part Number	Image
IPMI 2.0 adapter card with AST2400 BMC chip (P/N: iRIS-2400-R10)	 A photograph of a yellow printed circuit board (PCB) IPMI 2.0 adapter card. It features a large black integrated circuit (chip) in the center, a barcode, and the 'iRIS' logo with 'IPMI 2.0 Compliant' text. The board has several connectors along its edges.
Dual-port USB cable with bracket (P/N: CB-USB02A-RS)	 A photograph of a white dual-port USB cable. It has two USB-A connectors on one end and a metal mounting bracket on the other.
RS-422/485 cable, 200mm (P/N: 32205-003800-300-RS)	 A photograph of a short, white RS-422/485 cable. It has a black plastic connector on one end and a metal mounting bracket on the other.
RS-232 cable (P/N: 19800-000300-100-RS)	 A photograph of a white RS-232 cable. It has a blue plastic connector on one end and a metal mounting bracket on the other.

Connectors

3.1 Peripheral Interface Connectors

This chapter details all the jumpers and connectors.

3.1.1 KINO-KBN-i2 Layout

The figures below show all the connectors and jumpers.

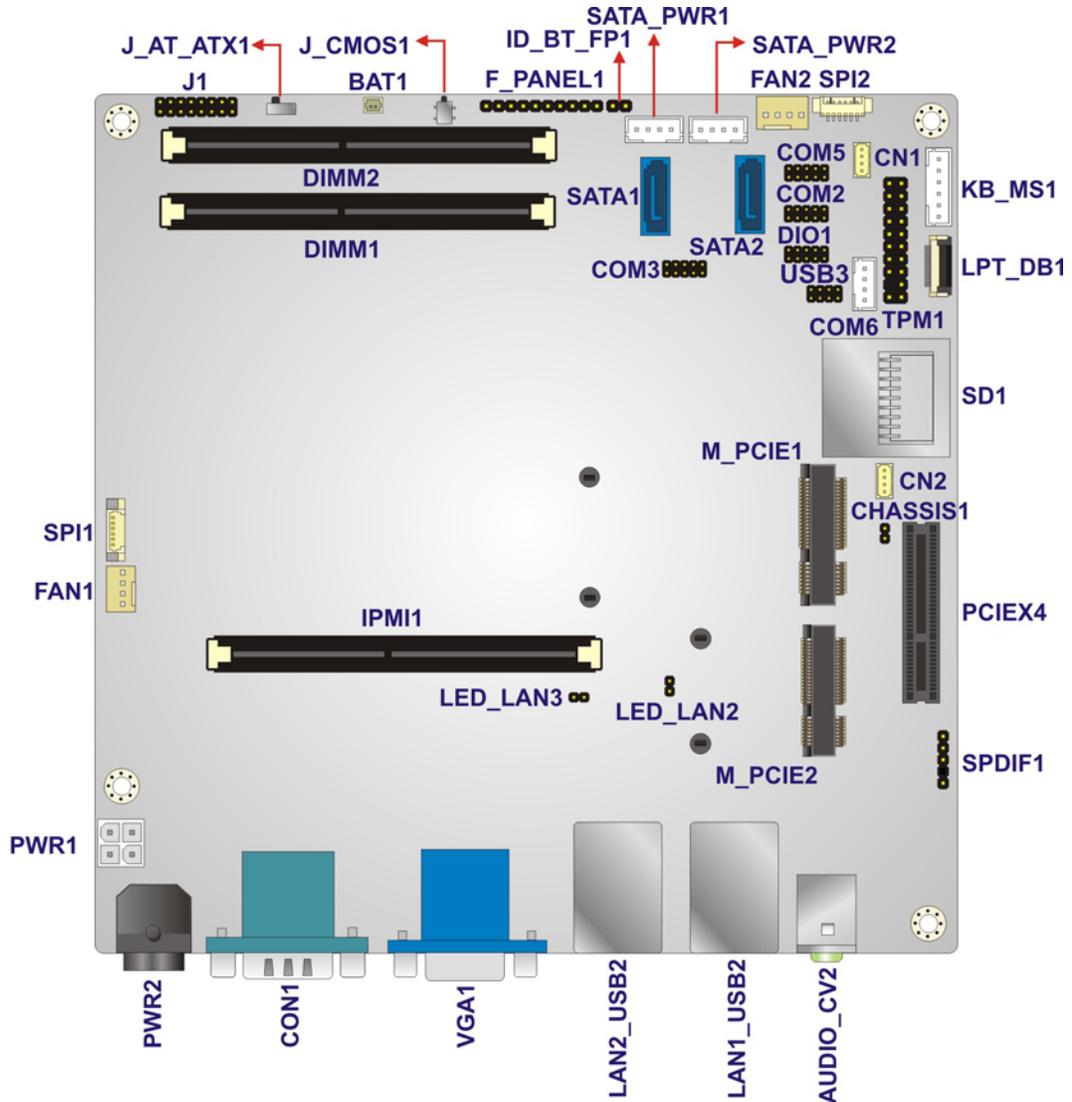

Figure 3-1: Connector and Jumper Locations

3.1.2 Peripheral Interface Connectors

The table below lists all the connectors on the board.

Connector	Type	Label
AT/ATX mode select switch	switch	J_ATX_AT1
Battery connector	2-pin wafer	BAT1
Chassis intrusion connector	2-pin header	CHASSIS1
Clear CMOS button	button	J_CMOS1
CPU fan connector	4-pin wafer	FAN1
CPU power connector	4-pin Molex	PWR1
DDR3 SO-DIMM slots	DDR3 SO-DIMM slot	DIMM1, DIMM2
Digital I/O connector	10-pin header	DIO1
EC debug connector	20-pin FPC connector	LPT_DB1
Front panel connector	10-pin wafer	F_PANEL1
IPMI LED connector	2-pin header	ID_BT_FP1
IPMI slot	204-pin slot	IPMI1
Keyboard and mouse connector	6-pin wafer	KB_MS1
LAN LED connectors	2-pin header	LED_LAN2, LED_LAN3
PCIe x4 slot	PCIe x4 slot	PCIEX4
PCIe Mini Card Slots	PCIe mini card slot	M_PCIE1, M_PCIE2
RS-232 serial port connector	10-pin header	COM2, COM3, COM5
RS-422/485 serial port connector	4-pin wafer	COM6
SATA 6Gb/s drive connectors	7-pin SATA connector	SATA1, SATA2
SATA power connectors	2-pin wafer	SATA_PWR1,

		SATA_PWR2
SD card slot	SD card slot	SD1
SMBus connectors	4-pin wafer	CN1, CN2
S/PDIF connector	5-pin header	SPDIF1
SPI Flash connectors	6-pin wafer	SPI1, SPI2
System fan connector	4-pin wafer	FAN2
TPM connector	20-pin connector	TPM1
USB connector	8-pin header	USB3

Table 3-1: Peripheral Interface Connectors

3.1.3 External Interface Panel Connectors

The table below lists the connectors on the external I/O panel.

Connector	Type	Label
Audio jacks	Audio jack	AUDIO_CV2
Ethernet and USB 2.0 ports	RJ-45, USB 2.0	LAN1_USB2
Ethernet and USB 3.0 ports	RJ-45, USB 3.0	LAN2_USB2
Power connector	DC power jack	PWR2
Serial port and HDMI connectors	DB-9, HDMI	COM1,HDMI1
VGA and HDMI connectors	15-pin female, HDMI	VGA1,HDMI2

Table 3-2: Rear Panel Connectors

KINO-KBN-i2

3.2 Internal Peripheral Connectors

The section describes all of the connectors on the KINO-KBN-i2.

3.2.1 AT/ATX Mode Select Switch

CN Label:	J_ATX_AT1
CN Type:	switch
CN Location:	See Figure 3-2
CN Settings:	See Table 3-3

The AT/ATX mode select switch specifies the systems power mode as AT or ATX. AT/ATX mode select switch settings are shown in **Table 3-3**.

Setting	Description	
Short 1-2	AT Mode	
Short 2-3	ATX Mode	Default

Table 3-3: AT/ATX Mode Select Switch Settings

The location of the AT/ATX mode select switch is shown in **Figure 3-2** below.

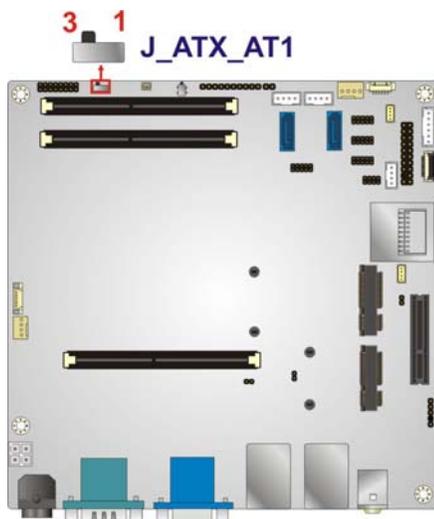

Figure 3-2: AT/ATX Mode Select Switch Location

3.2.2 Battery Connector

- CN Label:** **BAT1**
- CN Type:** 2-pin wafer
- CN Location:** See **Figure 3-3**
- CN Pinouts:** See **Table 3-4**

The battery connector is connected to the system battery. The battery provides power to the system clock to retain the time when power is turned off.

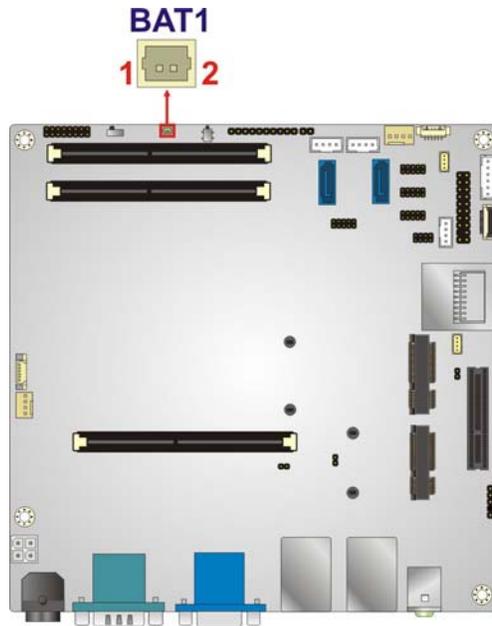

Figure 3-3: Battery Connector Location

PIN NO.	DESCRIPTION	PIN NO.	DESCRIPTION
1	+VBAT	2	GND

Table 3-4: Battery Connector Pinouts

KINO-KBN-i2

3.2.3 Chassis Intrusion Connector

- CN Label:** CHASSIS1
- CN Type:** 2-pin header
- CN Location:** See **Figure 3-4**
- CN Pinouts:** See **Table 3-5**

The chassis intrusion connector is for a chassis intrusion detection sensor or switch that detects if a chassis component is removed or replaced.

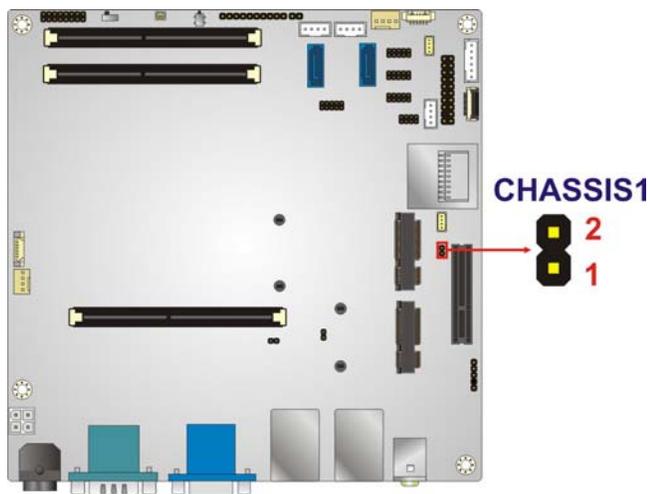

Figure 3-4: Chassis Intrusion Connector Location

Pin	Description
1	+V3.3A_EC_PLL
2	CHASSIE_EC

Table 3-5: Chassis Intrusion Connector Pinouts

3.2.4 Clear CMOS Button

- CN Label:** J_CMOS1
- CN Type:** button
- CN Location:** See **Figure 3-5**
- CN Settings:** See **Table 3-6**

If the KINO-KBN-i2 fails to boot due to improper BIOS settings, use the button to clear the CMOS data and reset the system BIOS information.

The clear CMOS button settings are shown in **Table 3-6**.

Setting	Description	
Open	Normal Operation	Default
Push	Clear CMOS Setup	

Table 3-6: Clear CMOS Button Settings

The location of the clear CMOS button is shown in **Figure 3-5**.

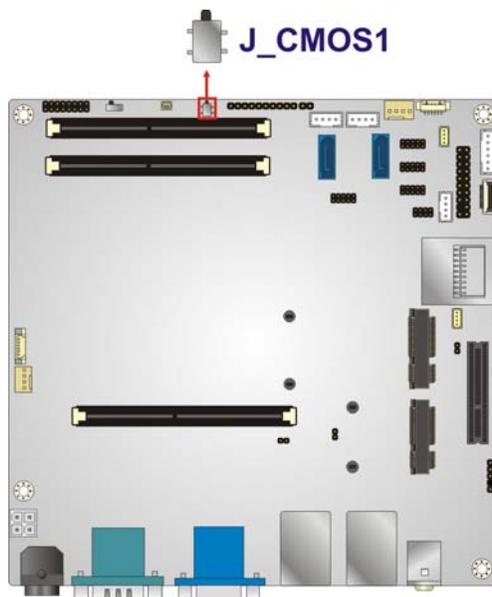

Figure 3-5: Clear CMOS Button Location

3.2.5 CPU Fan Connector

- CN Label:** FAN1
- CN Type:** 4-pin wafer
- CN Location:** See **Figure 3-6**
- CN Pinouts:** See **Table 3-7**

The fan connector attaches to a CPU cooling fan.

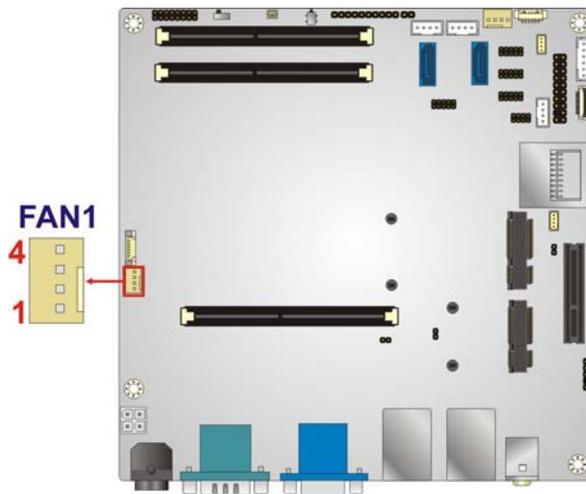

Figure 3-6: CPU Fan Connector Locations

PIN NO.	DESCRIPTION	PIN NO.	DESCRIPTION
1	GND	2	+12V
3	FAN1IN	4	FAN1OUT

Table 3-7: CPU Fan Connector Pinouts

3.2.6 CPU Power Connector

- CN Label:** PWR1
- CN Type:** 4-pin Molex
- CN Location:** See **Figure 3-7**
- CN Pinouts:** See **Table 3-8**

The CPU power connector provides power to the CPU.

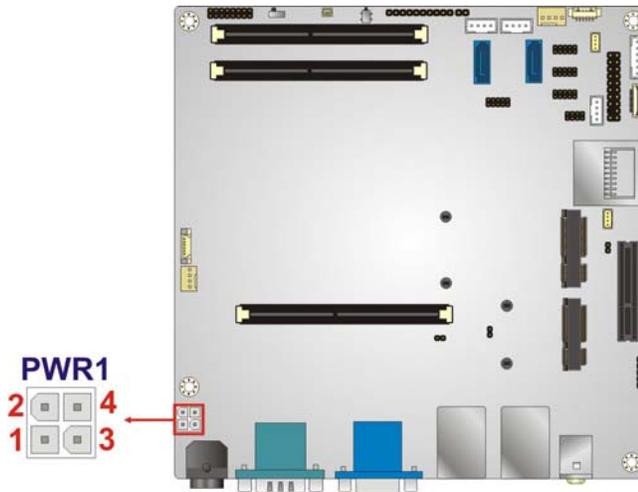

Figure 3-7: CPU Power Connector Location

PIN NO.	DESCRIPTION	PIN NO.	DESCRIPTION
1	GND_VIN	2	GND_VIN
3	12VIN_1	4	12VIN_1

Table 3-8: CPU Power Connector Pinouts

3.2.7 DDR3 SO-DIMM Slots

- CN Label:** DIMM1, DIMM2
- CN Type:** DDR3 SO-DIMM slot
- CN Location:** See **Figure 3-8**

The DDR3 SO-DIMM slot is for DDR3 SO-DIMM memory module. DIMM2 slot must be installed memory module.

KINO-KBN-i2

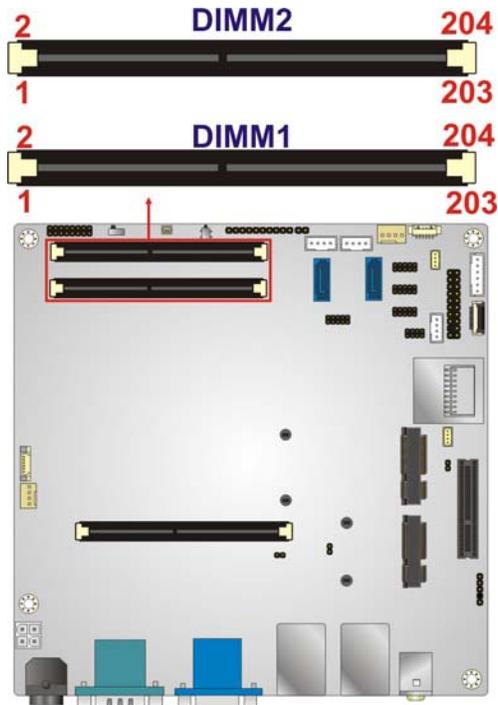

Figure 3-8: DDR3 SO-DIMM Slot Location

3.2.8 Digital I/O Connector

- CN Label:** DIO1
- CN Type:** 10-pin header
- CN Location:** See **Figure 3-9**
- CN Pinouts:** See **Table 3-9**

The digital I/O connector provides programmable input and output for external devices. The digital I/O provides 4-bit output and 4-bit input.

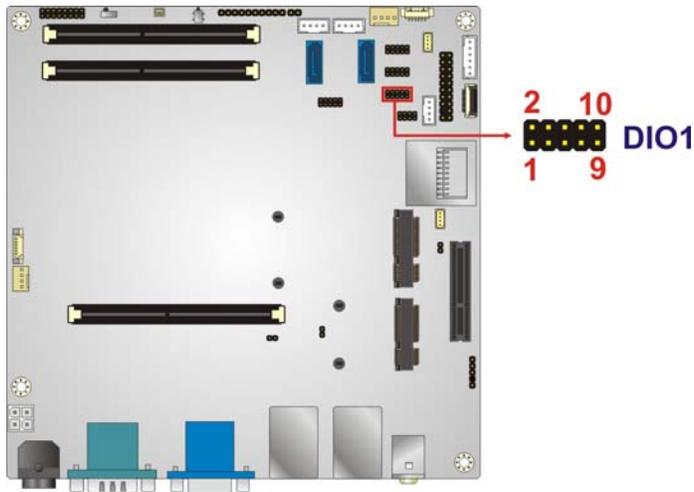

Figure 3-9: Digital I/O Connector Location

PIN NO.	DESCRIPTION	PIN NO.	DESCRIPTION
1	GND	2	+5V
3	DOUT3	4	DOUT2
5	DOUT1	6	DOUT0

- CN Label:** LPT_DB1
- CN Type:** 20-pin FPC connector
- CN Location:** See **Figure 3-10**
- CN Pinouts:** See **Table 3-10**

The EC debug connector connects to a debug card for Embedded Controller (EC) debug.

KINO-KBN-i2**3.2.19 SATA 6Gb/s Drive Connector**

CN Label:	SATA1, SATA2
CN Type:	7-pin SATA connector
CN Location:	See Figure 3-20

The SATA 6Gb/s drive connector is connected to a SATA 6Gb/s drive. The SATA 6Gb/s drive transfers data at speeds as high as 6Gb/s.

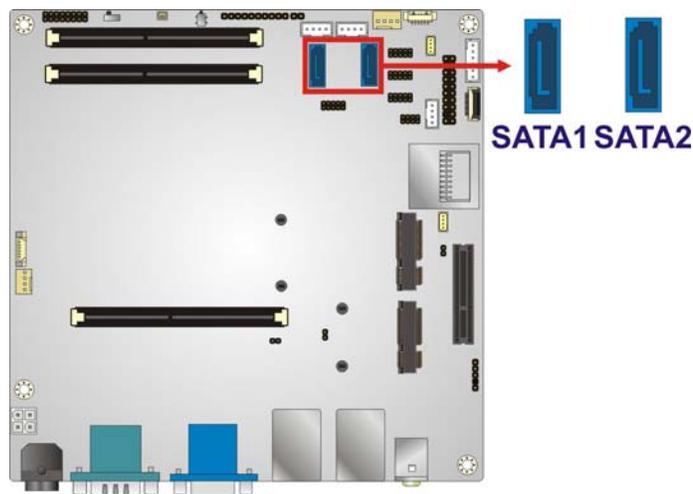

Figure 3-20: SATA 6Gb/s Drive Connector Location

3.2.20 SATA Power Connector

CN Label:	SATA_PWR1, SATA_PWR2
CN Type:	4-pin wafer
CN Location:	See Figure 3-21
CN Pinouts:	See Table 3-21

The SATA power connector provides +5V power output to the SATA connector.

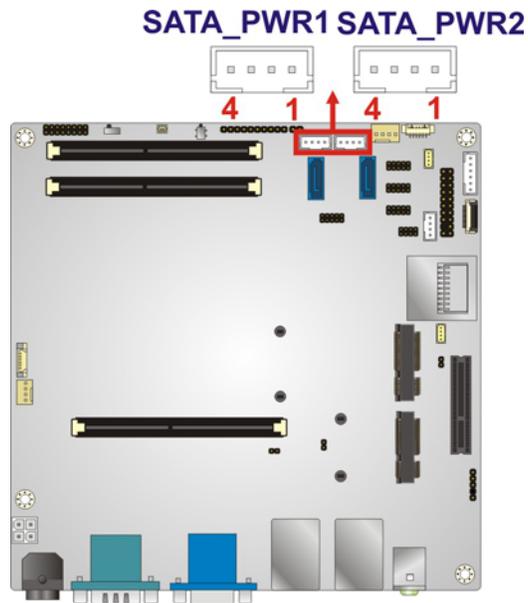

Figure 3-21: SATA Power Connector Location

3.3 External Peripheral Interface Connector Panel

Figure 3-29 shows the KINO-KBN-i2 external peripheral interface connector (EPIC) panel. The EPIC panel consists of the following:

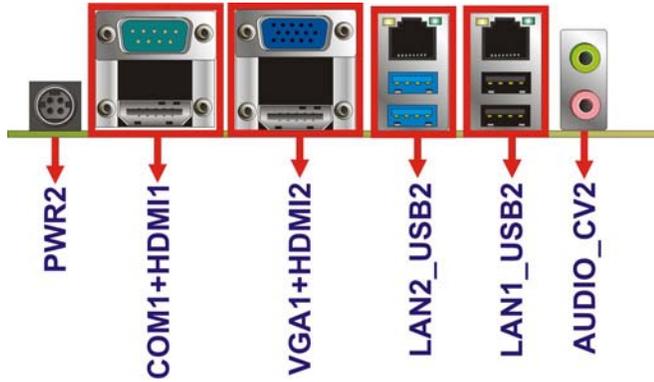

Figure 3-29: External Peripheral Interface Connector

3.3.1 Audio Connector

CN Label: AUDIO_CV2
CN Type: Audio jacks
CN Location: See Figure 3-29

The audio jacks connect to external audio devices.

- **Line Out port (Lime):** Connects to a headphone or a speaker. With multi-channel configurations, this port can also connect to front speakers.
- **Microphone (Pink):** Connects a microphone.

Figure 3-30: Audio Connector

KINO-KBN-i2

3.3.2 Ethernet and USB Connectors

- CN Label:** LAN1_USB2, LAN2_USB2
- CN Type:** RJ-45 , USB 2.0 and USB 3.0 ports
- CN Location:** See **Figure 3-29**
- CN Pinouts:** See **Figure 3-31** , **Table 3-29** and **Table 3-30**

The LAN connector connects to a local network. LAN1 supports IPMI 2.0 through the optional iRIS-2400 module.

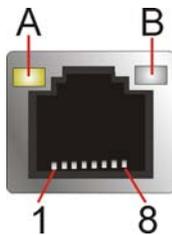

Figure 3-31: LAN Connector

The USB 2.0 ports are for attaching USB 2.0 peripheral devices to the system. The pinouts of LAN1 and USB 2.0 connectors are shown below.

Table 3-30: LAN2_USB2 Connector Pinouts

**NOTE:**

During Windows 7 OS installation, the USB 3.0 functionality will be disabled until the USB 3.0 drivers are installed. In order to use USB 3.0 ports for OS installation, the following steps must be followed:

1. Copy the USB 3.0 drivers from the driver CD to a USB flash drive.
2. When “**A Required CD/DVD Device Driver is Missing**” error dialog appears during OS installation, press **F6**.
3. The “**Browse for Folder**” window prompts user to select the folder that contains USB 3.0 drivers. After selecting the folder, select and install drivers for **AMD USB 3.0 Host Controller (amdxhc.inf)** and **AMD USB 3.0 Hub (amdhub30.inf)** in order.

3.3.3 HDMI Connector

CN Label:	HDMI1, HDMI2
CN Type:	HDMI connector
CN Location:	See Figure 3-29
CN Pinouts:	See Table 3-31

The HDMI connector connects to a display device with HDMI interface.

Pin	Description	Pin	Description

3.3.5 Serial Port Connector (COM1)

- CN Label:** COM1
- CN Type:** DB-9 Male connector
- CN Location:** See **Figure 3-29**
- CN Pinouts:** See **Table 3-33** and **Figure 3-32**

The RS-232 serial connector provides serial connection in the RS-232 mode.

Pin	Description	Pin	Description
1	NDCD1	6	NDSR1
2	NRX1	7	NRTS1

KINO-KBN-i2

Pin	Description	Pin	Description
3	NTX1	8	NCTS1
4	NDTR1	9	NRI1
5	GND		

Table 3-33: Serial Port Pinouts

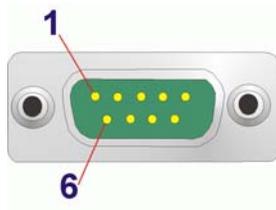

Figure 3-32: Serial Port Pinout Locations

3.3.6 VGA Connector

- CN Label:** VGA1
- CN Type:** D-sub 15-pin female connector
- CN Location:** See **Figure 3-29**
- CN Pinouts:** See **Figure 3-33** an **Table 3-34**

The standard 15-pin female VGA connector connects to a CRT or LCD monitor.

Pin	Description	Pin	Description	Pin	Description
1	RED	6	GND	11	NC
2	GREEN	7	GND	12	5VDDCDA
3	BLUE	8	GND	13	VGA_HSYNC
4	NC	9	CRT_VCC	14	VGA_VSYNC
5	GND	10	GND	15	5VDDCLK

Installation

4.1 Anti-static Precautions

WARNING:

Failure to take ESD precautions during the installation of the KINO-KBN-i2 may result in permanent damage to the KINO-KBN-i2 and severe injury to the user.

Electrostatic discharge (ESD) can cause serious damage to electronic components, including the KINO-KBN-i2. Dry climates are especially susceptible to ESD. It is therefore critical that whenever the KINO-KBN-i2 or any other electrical component is handled, the following anti-static precautions are strictly adhered to.

- **Wear an anti-static wristband:** Wearing a simple anti-static wristband can help to prevent ESD from damaging the board.
- **Self-grounding:** Before handling the board, touch any grounded conducting material. During the time the board is handled, frequently touch any conducting materials that are connected to the ground.
- **Use an anti-static pad:** When configuring the KINO-KBN-i2, place it on an anti-static pad. This reduces the possibility of ESD damaging the KINO-KBN-i2.
- **Only handle the edges of the PCB:** When handling the PCB, hold the PCB by the edges.

4.2 Installation Considerations

NOTE:

The following installation notices and installation considerations should be read and understood before installation. All installation notices must be strictly adhered to. Failing to adhere to these precautions may lead to severe damage and injury to the person performing the installation.

**WARNING:**

The installation instructions described in this manual should be carefully followed in order to prevent damage to the KINO-KBN-i2, KINO-KBN-i2 components and injury to the user.

Before and during the installation please **DO** the following:

- Read the user manual:
 - The user manual provides a complete description of the KINO-KBN-i2 installation instructions and configuration options.
- Wear an electrostatic discharge cuff (ESD):
 - Electronic components are easily damaged by ESD. Wearing an ESD cuff removes ESD from the body and helps prevent ESD damage.
- Place the KINO-KBN-i2 on an antistatic pad:
 - When installing or configuring the motherboard, place it on an antistatic pad. This helps to prevent potential ESD damage.
- Turn all power to the KINO-KBN-i2 off:
 - When working with the KINO-KBN-i2, make sure that it is disconnected from all power supplies and that no electricity is being fed into the system.

Before and during the installation of the KINO-KBN-i2 **DO NOT:**

- Remove any of the stickers on the PCB board. These stickers are required for warranty validation.
- Use the product before verifying all the cables and power connectors are properly connected.
- Allow screws to come in contact with the PCB circuit, connector pins, or its components.

4.2.1 SO-DIMM Installation

To install a SO-DIMM, please follow the steps below and refer to **Figure 4-1**.

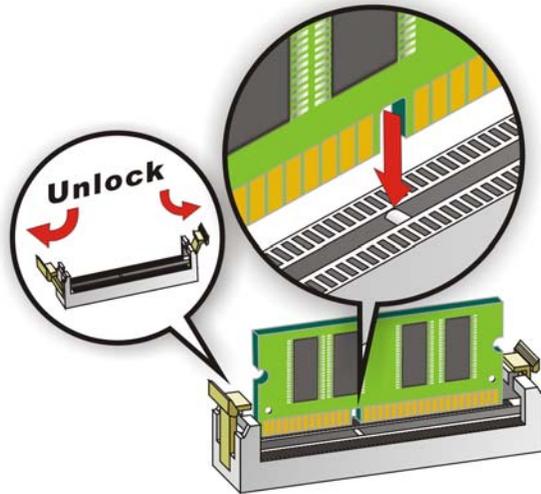

Figure 4-1: SO-DIMM Installation

- Step 1: Open the SO-DIMM socket handles.** Open the two handles outwards as far as they can. See **Figure 4-1**.
- Step 2: Align the SO-DIMM with the socket.** Align the DIMM so the notch on the memory lines up with the notch on the memory socket. See **Figure 4-1**.
- Step 3: Insert the SO-DIMM.** Once aligned, press down until the SO-DIMM is properly seated. Clip the two handles into place. See **Figure 4-1**.
- Step 4: Removing a SO-DIMM.** To remove a SO-DIMM, push both handles outward. The memory module is ejected by a mechanism in the socket.

4.2.2 IPMI Module Installation (Optional)

WARNING:

The IPMI module slot is designed to install the IEI iRIS-2400 IPMI 2.0 module only. DO NOT install other modules into the IPMI module slot. Doing so may cause damage to the KINO-KBN-i2.

To install the iRIS-2400 module, please follow the steps below and refer to Figure 4-2.

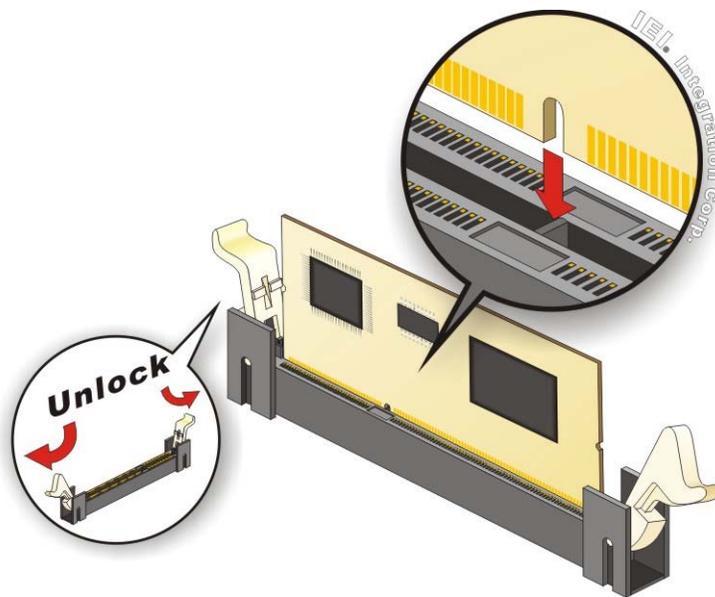

Figure 4-2: IPMI Module Installation

- Step 1:** **Open the socket handles.** Open the two handles outwards as far as they can. See Figure 4-2.
- Step 2:** **Align the iRIS-2400 module with the socket.** Align the iRIS-2400 module so the notch on the module lines up with the notch on the socket. See Figure 4-2.
- Step 3:** **Insert the iRIS-2400 module.** Once aligned, press down until the iRIS-2400 module is properly seated. Clip the two handles into place. See Figure 4-2.

KINO-KBN-i2

Step 4: **Removing the iRIS-2400 module.** To remove the iRIS-2400 module, push both handles outward. The module is ejected by a mechanism in the socket.

4.3 Internal Peripheral Device Connections

This section outlines the installation of peripheral devices to the on-board connectors

4.3.1 SATA Drive Connection

The KINO-KBN-i2 is shipped with two SATA drive cable. To connect the SATA drive to the connector, please follow the steps below.

Step 1: Locate the SATA connector and the SATA power connector. The locations of the connectors are shown in Chapter 3.

Step 2: **Insert the cable connector.** Insert the cable connector into the on-board SATA drive connector and the SATA power connector. See **Figure 4-3**.

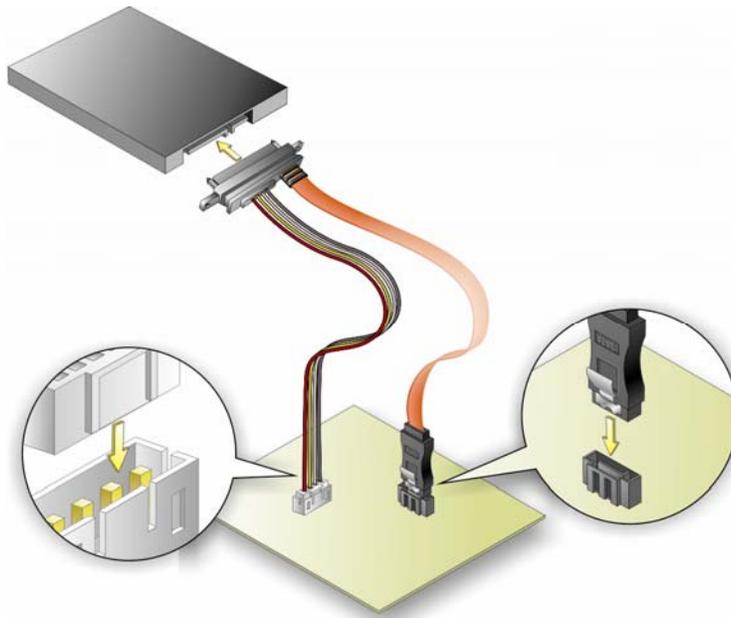

Figure 4-3: SATA Drive Cable Connection

Step 3: **Connect the cable to the SATA disk.** Connect the connector on the other end of the cable to the connector at the back of the SATA drive. See Figure 4-3.

Step 4: To remove the SATA cable from the SATA connector, press the clip on the connector at the end of the cable.

4.3.2 Single RS-232 Cable

The single RS-232 cable consists of one serial port connector attached to a serial communications cable that is then attached to a D-sub 9 male connector. To install the single RS-232 cable, please follow the steps below.

Step 1: Locate the connector. The location of the RS-232 connector is shown in Chapter 3.

Step 2: Insert the cable connector. Insert the connector into the serial port box header. See Figure 4-4. A key on the front of the cable connectors ensures the connector can only be installed in one direction.

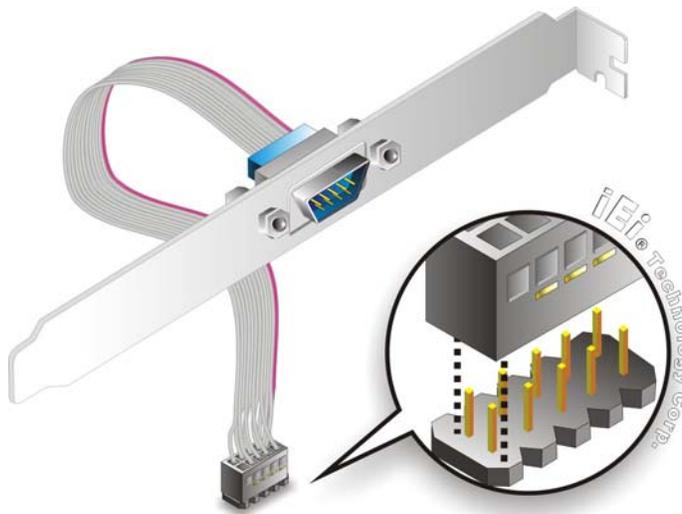

Figure 4-4: Single RS-232 Cable Installation

Step 3: Secure the bracket. The single RS-232 connector has two retention screws that must be secured to a chassis or bracket.

Step 4: Connect the serial device. Once the single RS-232 connector is connected to a chassis or bracket, a serial communications device can be connected to the system.

KINO-KBN-i2

4.4 IPMI Setup Procedure

The KINO-KBN-i2 features Intelligent Platform Management Interface (IPMI) that helps lower the overall costs of server management by enabling users to maximize IT resources, save time and manage multiple systems. The KINO-KBN-i2 supports IPMI 2.0 through the optional iRIS-2400 module. Follow the steps below to setup IPMI.

4.4.1 Managed System Hardware Setup

The hardware configuration of the managed system (KINO-KBN-i2) is described below.

- Step 1:** Install an iRIS-2400 module to the IPMI module socket (refer to **Section 4.2.2**).
- Step 2:** Make sure at least one DDR3 DIMM is installed in one of the DIMM sockets. If multiple DIMMs are installed, all of the DIMMs must be same size, same speed and same brand to get the best performance.
- Step 3:** Connect an Ethernet cable to the RJ-45 connector labeled **LAN1_USB2** (**Figure 3-29**).

4.4.2 Using the IEI iMAN Web GUI

To manage a client system from a remote console using IEI iMAN Web GUI, follow the steps below.

- Step 1:** Obtain the IP address of the managed system. It is recommended to use the IPMI Tool on the managed system to obtain the IP address. To use IPMI Tool to obtain IP address, follow the steps below:
 - a. Copy the **ipmitool.exe** file to a bootable USB flash drive.
 - b. Insert the USB flash drive to the KINO-KBN-i2
 - c. The KINO-KBN-i2 boots from the USB flash drive
 - d. Enter the following command: **ipmitool 20 30 02 01 03 00 00**
(there is a space between each two-digit number)
 - e. A serial of number shows. The last four two-digit hexadecimal numbers are the IP address. Convert the hexadecimal numbers to decimal numbers.

Step 2: On the remote management console, open a web browser. Enter the managed system IP address in the web browser (**Figure 4-5**).

Figure 4-5: IEI iMAN Web Address

Step 3: The login page appears in the web browser.

Step 4: Enter the user name and password to login the system. The default login username and password are:

-Username: **admin**

-Password: **admin**

Step 5: Press the login button to login the system.

Step 6: The IEI iMAN Web GUI appears (**Figure 4-6**).

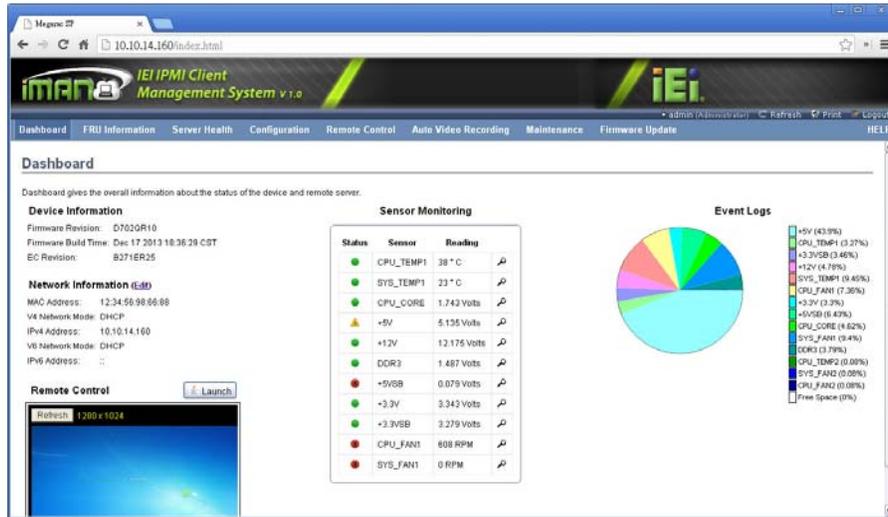

Figure 4-6: IEI iMAN Web GUI

NOTE:

To understand how to use the IEI iMAN Web GUI, please refer to the iRIS-2400 Web GUI user manual in the utility CD came with the KINO-KBN-i2. The user manual describes each function in detail.

Chapter

5

BIOS

5.1 Introduction

The BIOS is programmed onto the BIOS chip. The BIOS setup program allows changes to certain system settings. This chapter outlines the options that can be changed.

5.1.1 Starting Setup

The UEFI BIOS is activated when the computer is turned on. The setup program can be activated in one of two ways.

1. Press the **DELETE** or **F2** key as soon as the system is turned on or
2. Press the **DELETE** or **F2** key when the “**Press Del to enter SETUP**” message appears on the screen.

If the message disappears before the **DELETE** or **F2** key is pressed, restart the computer and try again.

5.1.2 Using Setup

Use the arrow keys to highlight items, press **ENTER** to select, use the PageUp and PageDown keys to change entries, press **F1** for help and press **ESC** to quit. Navigation keys are shown in.

Key	Function
Up arrow	Move to the item above
Down arrow	Move to the item below
Left arrow	Move to the item on the left hand side
Right arrow	Move to the item on the right hand side
+	Increase the numeric value or make changes
-	Decrease the numeric value or make changes
Page up	Move to the next page
Page down	Move to the previous page

Key	Function
Esc	Main Menu – Quit and do not save changes into CMOS Status Page Setup Menu and Option Page Setup Menu -- Exit current page and return to Main Menu
F1	General help, only for Status Page Setup Menu and Option Page Setup Menu
F9	Load optimized defaults
F10	Save changes and Exit BIOS

Table 5-1: BIOS Navigation Keys

5.1.3 Getting Help

When **F1** is pressed a small help window describing the appropriate keys to use and the possible selections for the highlighted item appears. To exit the Help Window press **Esc** or the **F1** key again.

5.1.4 Unable to Reboot after Configuration Changes

If the computer cannot boot after changes to the system configuration is made, CMOS defaults. Use the jumper described in Chapter 3.

5.1.5 BIOS Menu Bar

The **menu bar** on top of the BIOS screen has the following main items:

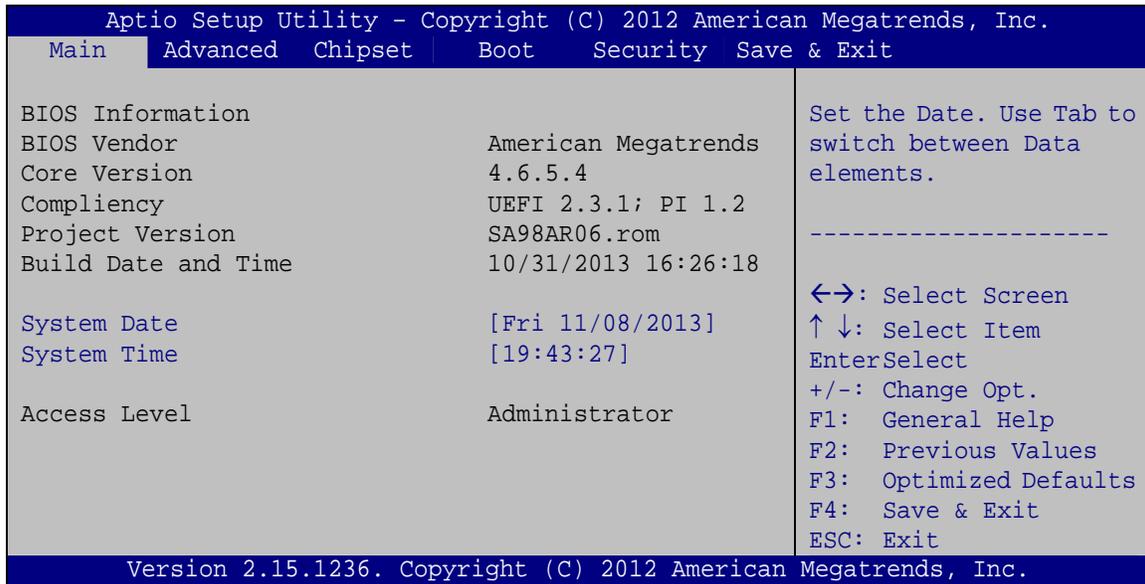

- Main – Changes the basic system configuration.
- Advanced – Changes the advanced system settings.
- Chipset – Changes the chipset settings.
- Boot – Changes the system boot configuration.
- Security – Sets User and Supervisor Passwords.
- Save & Exit – Selects exit options and loads default settings

The following sections completely describe the configuration options found in the menu items at the top of the BIOS screen and listed above.

KINO-KBN-i2

5.2 Main

The **Main** BIOS menu (**BIOS Menu 1**) appears when the **BIOS Setup** program is entered. The **Main** menu gives an overview of the basic system information.

BIOS Menu 1: Main

→ BIOS Information

The **BIOS Information** lists a brief summary of the BIOS. The fields in **BIOS Information** cannot be changed. The items shown in the system overview include:

- **BIOS Vendor:** Installed BIOS vendor
- **Core Version:** Current BIOS version
- **Compliency:** Current compliant version
- **Project Version:** the board version
- **Build Date and Time:** Date the current BIOS version was made

The System Overview field also has two user configurable fields:

→ System Date [xx/xx/xx]

Use the **System Date** option to set the system date. Manually enter the day, month and year.

→ System Time [xx:xx:xx]

Use the **System Time** option to set the system time. Manually enter the hours, minutes and seconds.

5.3 Advanced

Use the **Advanced** menu (**BIOS Menu 2**) to configure the CPU and peripheral devices through the following sub-menus:

WARNING!

Setting the wrong values in the sections below may cause the system to malfunction. Make sure that the settings made are compatible with the hardware.

```

```

BIOS Menu 2: Advanced

5.3.1 ACPI Settings

The **ACPI Settings** menu (**BIOS Menu 3**) configures the Advanced Configuration and Power Interface (ACPI) options.

KINO-KBN-i2

BIOS Menu 3: ACPI Configuration

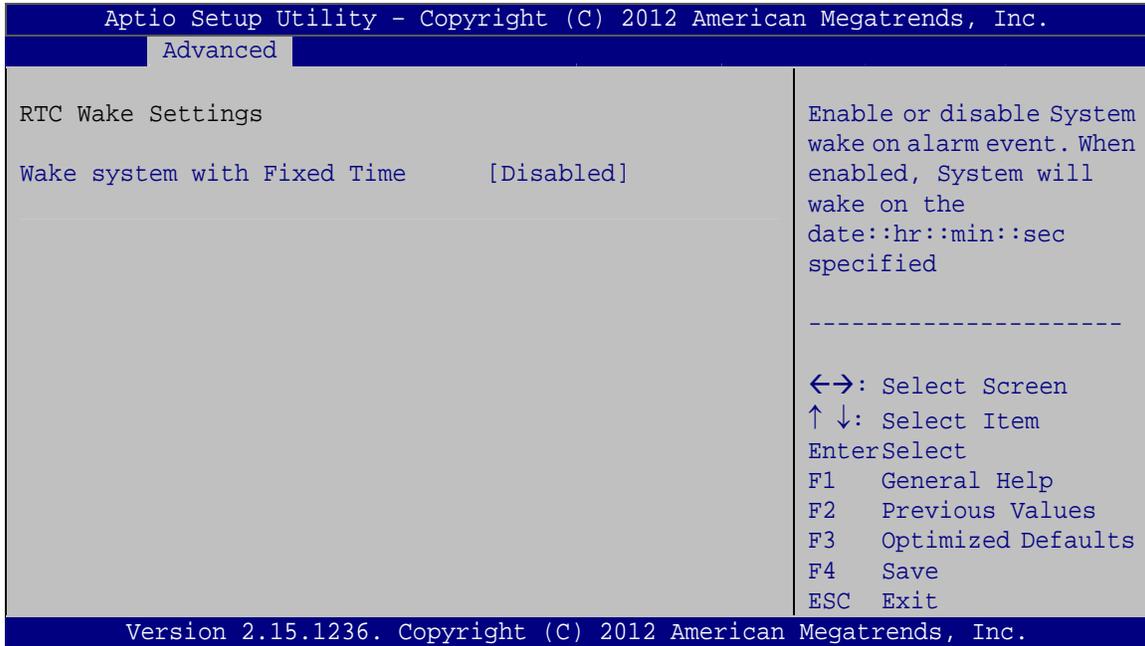

→ ACPI Sleep State [S3 only (Suspend to RAM)]

The fields in **ACPI Sleep State** option cannot be changed.

- **S3 only (Suspend to RAM)** **DEFAULT** The caches are flushed and the CPU is powered off. Power to the RAM is maintained. The computer returns slower to a working state, but more power is saved.

5.3.2 RTC Wake Settings

The **RTC Wake Settings** menu (**BIOS Menu 4**) configures RTC wake event.

BIOS Menu 4: RTC Wake Settings

➔ **Wake system with Fixed Time [Disabled]**

Use the **Wake system with Fixed Time** option to enable or disable the system wake on alarm event.

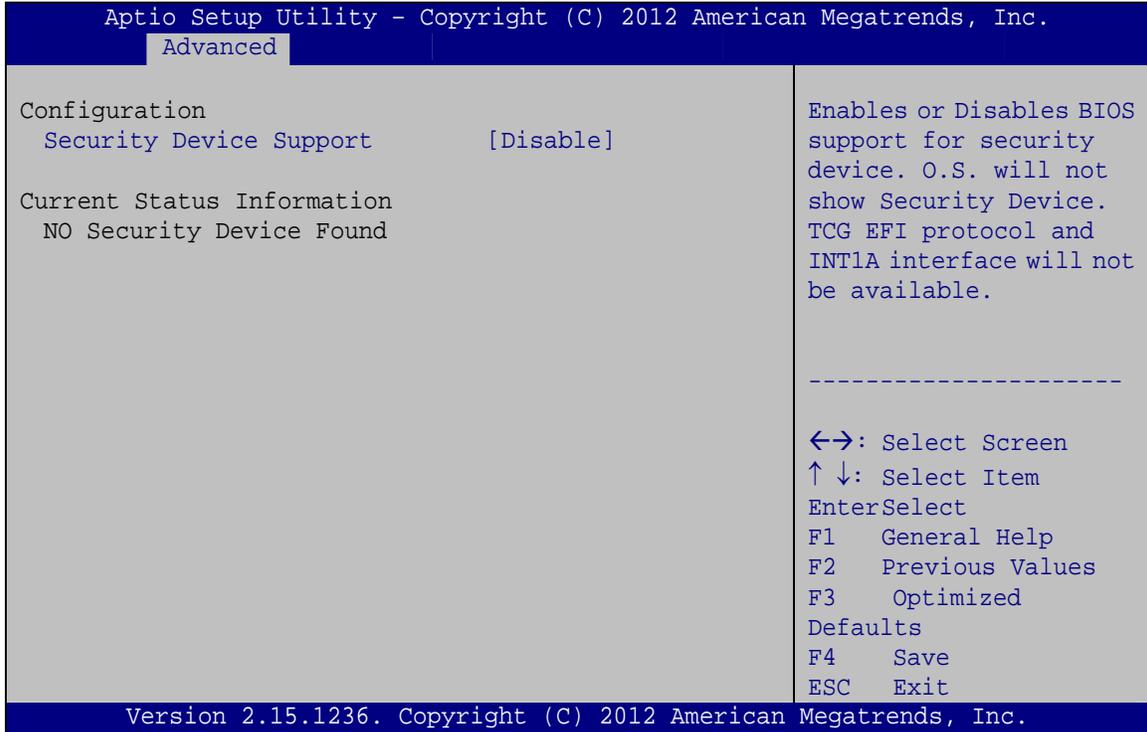

- ➔ **Disabled** **DEFAULT** The real time clock (RTC) cannot generate a wake event

- ➔ **Enabled** If selected, the **Wake up every day** option appears allowing you to enable to disable the system to wake every day at the specified time. Besides, the following options appear with values that can be selected:
 - Wake up date
 - Wake up hour
 - Wake up minute
 - Wake up second

After setting the alarm, the computer turns itself on from a suspend state when the alarm goes off.

5.3.3 Trusted Computing

Use the **Trusted Computing** menu (**BIOS Menu 5**) to configure settings related to the Trusted Computing Group (TCG) Trusted Platform Module (TPM).

BIOS Menu 5: Trusted Computing

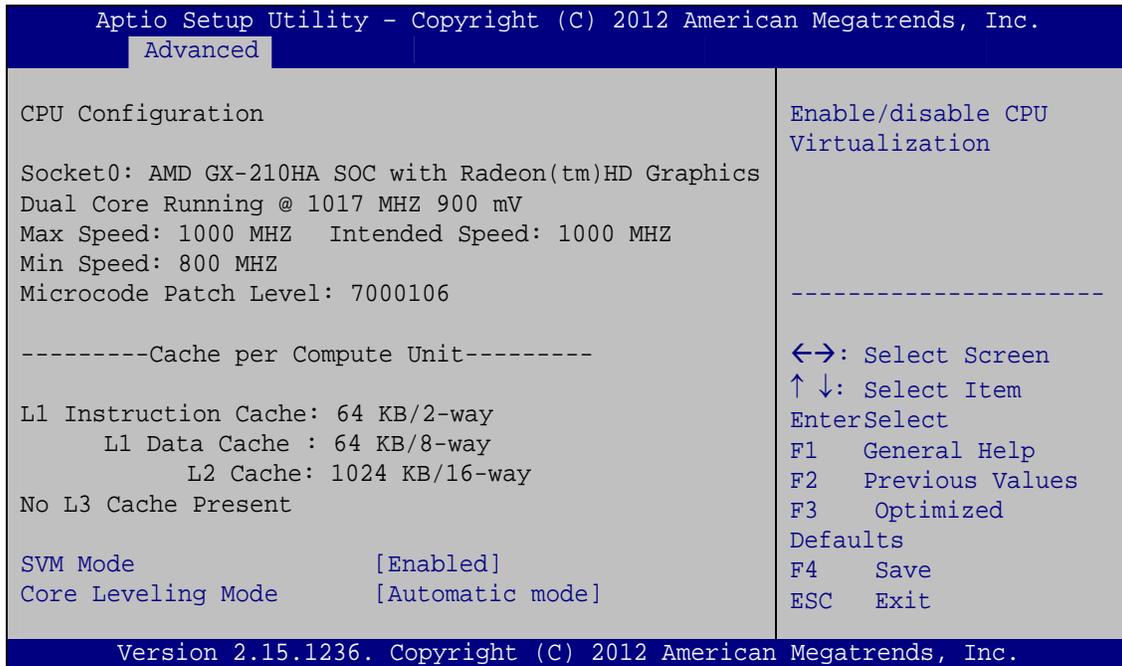

➔ Security Device Support [Disable]

Use the **Security Device Support** option to configure support for the security device.

- ➔ **Disable** DEFAULT Security device support is disabled.
- ➔ **Enable** Security device support is enabled.

5.3.4 CPU Configuration

Use the **CPU Configuration** menu (**BIOS Menu 6**) to view detailed CPU specifications and configure the CPU.

BIOS Menu 6: CPU Configuration

→ SVM Mode [Enabled]

Use the **SVM Mode** option to enable or disable the CPU virtualization function.

- **Disabled** Disables the CPU virtualization function
- **Enabled** **DEFAULT** Enables the CPU virtualization function

→ Core Leveling Mode [Automatic mode]

Use the **Core Leveling Mode** option to configure the number of the active processor cores.

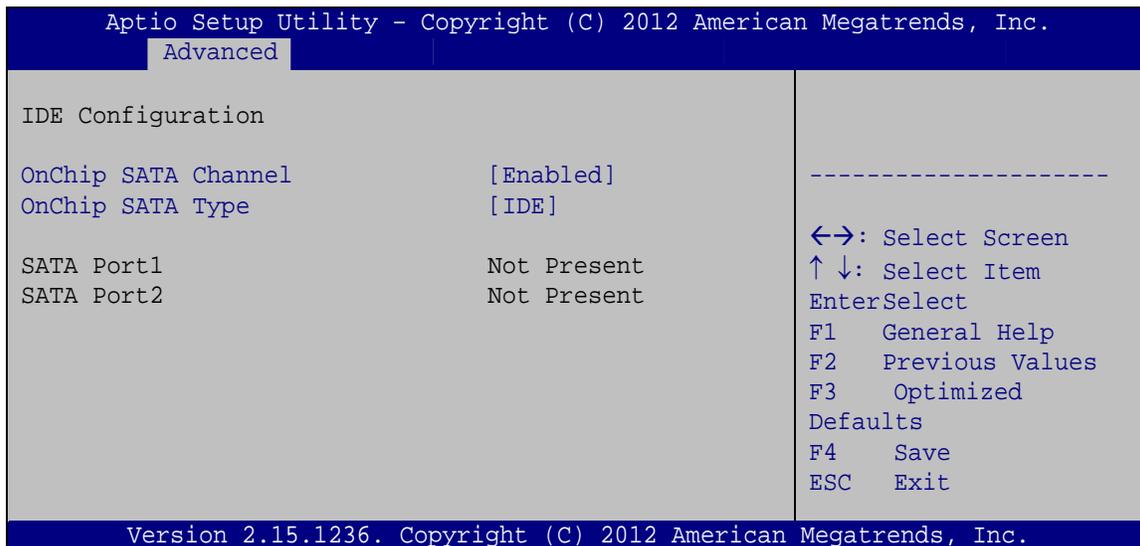

- **Automatic mode** **DEFAULT** Active the processor cores by automatic mode

KINO-KBN-i2

- ➔ **Three cores per processor** Active three of the processor cores
- ➔ **Two cores per processor** Active two of the processor cores
- ➔ **One core per processor** Active one of the processor cores

5.3.5 IDE Configuration

Use the **IDE Configuration** menu (**BIOS Menu 7**) to change and/or set the configuration of the SATA devices installed in the system.

BIOS Menu 7: IDE Configuration

- ➔ **OnChip SATA Channel [Enabled]**

Use the **OnChip SATA Channel** option to configure Onchip SATA channel.

- ➔ **Disabled** Disables Onchip SATA channel.
- ➔ **Enabled** **DEFAULT** Enables Onchip SATA channel.

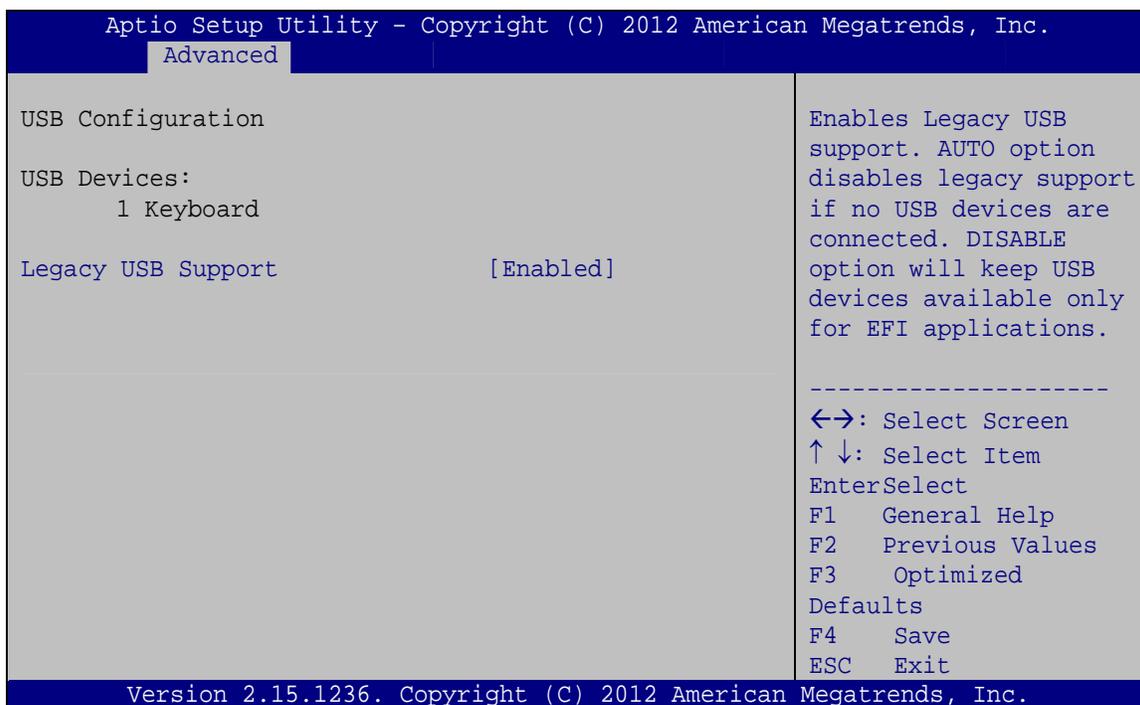

- ➔ **OnChip SATA Type [IDE]**

Use the **OnChip SATA Type** option to configure Onchip SATA type.

- ➔ **IDE** **DEFAULT** Configures SATA devices as normal IDE device.
- ➔ **AHCI** Configures SATA devices as AHCI device.

5.3.6 USB Configuration

Use the **USB Configuration** menu (**BIOS Menu 8**) to read USB configuration information and configure the USB settings.

BIOS Menu 8: USB Configuration

➔ **USB Devices**

The **USB Devices Enabled** field lists the USB devices that are enabled on the system

➔ **Legacy USB Support [Enabled]**

Use the **Legacy USB Support** BIOS option to enable USB mouse and USB keyboard support. Normally if this option is not enabled, any attached USB mouse or USB keyboard does not become available until a USB compatible operating system is fully booted with all USB drivers loaded. When this option is enabled, any attached USB mouse or USB

KINO-KBN-i2

keyboard can control the system even when there is no USB driver loaded onto the system.

- ➔ **Enabled** **DEFAULT** Legacy USB support enabled
- ➔ **Disabled** Legacy USB support disabled
- ➔ **Auto** Legacy USB support disabled if no USB devices are connected

5.3.7 F81866 Super IO Configuration

Use the **F81866 Super IO Configuration** menu (**BIOS Menu 9**) to set or change the configurations for the serial ports.

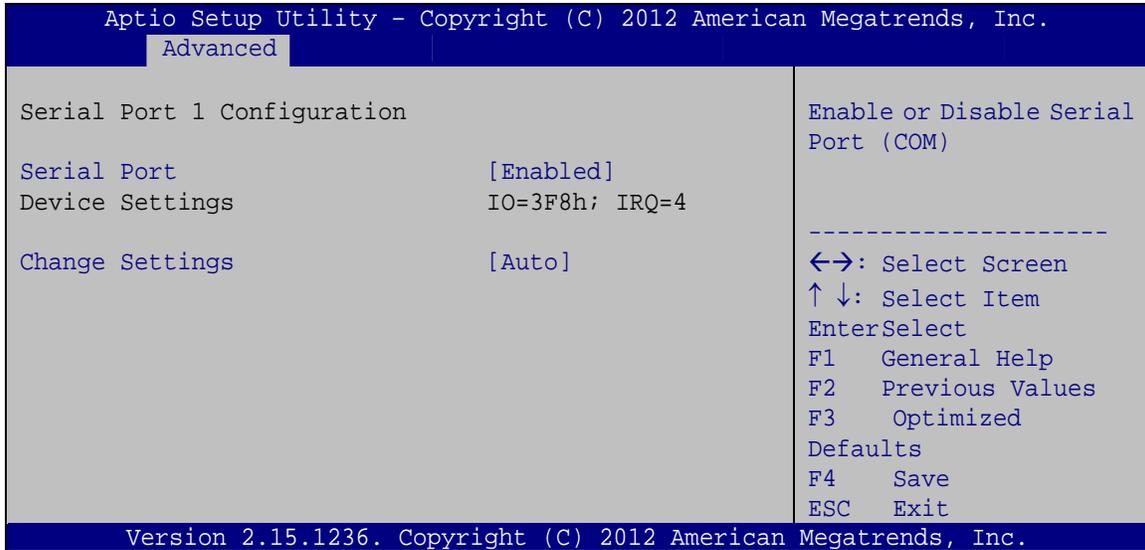

```

BIOS Menu 9: Super IO Configuration

5.3.7.1 Serial Port n Configuration

Use the **Serial Port n Configuration** menu (**BIOS Menu 10**) to configure the serial port n.

BIOS Menu 10: Serial Port n Configuration Menu

5.3.7.1.1 Serial Port 1 Configuration

➔ **Serial Port [Enabled]**

Use the **Serial Port** option to enable or disable the serial port.

- ➔ **Disabled** Disable the serial port
- ➔ **Enabled** **DEFAULT** Enable the serial port

➔ **Change Settings [Auto]**

Use the **Change Settings** option to change the serial port IO port address and interrupt address.

- ➔ **Auto** **DEFAULT** The serial port IO port address and interrupt address are automatically detected.
- ➔ **IO=3F8h; IRQ=4** Serial Port I/O port address is 3F8h and the interrupt address is IRQ4

KINO-KBN-i2

- | | |
|---------------------------------------|---|
| → IO=3F8h; IRQ=3,
4,5,6,7,10,11,12 | Serial Port I/O port address is 3F8h and the interrupt address is IRQ3,4,5,6,7,10,11,12 |
| → IO=2F8h; IRQ=3,
4,5,6,7,10,11,12 | Serial Port I/O port address is 2F8h and the interrupt address is IRQ3,4,5,6,7,10,11,12 |
| → IO=3E8h; IRQ=3,
4,5,6,7,10,11,12 | Serial Port I/O port address is 3E8h and the interrupt address is IRQ3,4,5,6,7,10,11,12 |
| → IO=2E8h; IRQ=3,
4,5,6,7,10,11,12 | Serial Port I/O port address is 2E8h and the interrupt address is IRQ3,4,5,6,7,10,11,12 |

5.3.7.1.2 Serial Port 2 Configuration

→ Serial Port [Enabled]

Use the **Serial Port** option to enable or disable the serial port.

- | | |
|--------------------------|-------------------------|
| → Disabled | Disable the serial port |
| → Enabled DEFAULT | Enable the serial port |

→ Change Settings [Auto]

Use the **Change Settings** option to change the serial port IO port address and interrupt address.

- | | |
|---------------------------------------|---|
| → Auto DEFAULT | The serial port IO port address and interrupt address are automatically detected. |
| → IO=2F8h; IRQ=3 | Serial Port I/O port address is 2F8h and the interrupt address is IRQ3 |
| → IO=3F8h; IRQ=3,
4,5,6,7,10,11,12 | Serial Port I/O port address is 3F8h and the interrupt address is IRQ3,4,5,6,7,10,11,12 |
| → IO=2F8h; IRQ=3,
4,5,6,7,10,11,12 | Serial Port I/O port address is 2F8h and the interrupt address is IRQ3,4,5,6,7,10,11,12 |
| → IO=3E8h; IRQ=3,
4,5,6,7,10,11,12 | Serial Port I/O port address is 3E8h and the interrupt address is IRQ3,4,5,6,7,10,11,12 |

- ➔ **IO=2E8h; IRQ=3, 4,5,6,7,10,11,12** Serial Port I/O port address is 2E8h and the interrupt address is IRQ3,4,5,6,7,10,11,12

5.3.7.1.3 Serial Port 3 Configuration

➔ Serial Port [Enabled]

Use the **Serial Port** option to enable or disable the serial port.

- ➔ **Disabled** Disable the serial port
- ➔ **Enabled DEFAULT** Enable the serial port

➔ Change Settings [Auto]

Use the **Change Settings** option to change the serial port IO port address and interrupt address.

- ➔ **Auto DEFAULT** The serial port IO port address and interrupt address are automatically detected.
- ➔ **IO=3E8h; IRQ=10** Serial Port I/O port address is 3E8h and the interrupt address is IRQ10
- ➔ **IO=3E8h; IRQ=3, 4,5,6,7,10,11,12** Serial Port I/O port address is 3E8h and the interrupt address is IRQ3,4,5,6,7,10,11,12
- ➔ **IO=2E8h; IRQ=3, 4,5,6,7,10,11,12** Serial Port I/O port address is 2E8h and the interrupt address is IRQ3,4,5,6,7,10,11,12
- ➔ **IO=2D0h; IRQ=3, 4,5,6,7,10,11,12** Serial Port I/O port address is 2D0h and the interrupt address is IRQ3,4,5,6,7,10,11,12
- ➔ **IO=2D8h; IRQ=3, 4,5,6,7,10,11,12** Serial Port I/O port address is 2D8h and the interrupt address is IRQ3,4,5,6,7,10,11,12

5.3.7.1.4 Serial Port 5 Configuration

→ **Serial Port [Enabled]**

Use the **Serial Port** option to enable or disable the serial port.

- **Disabled** Disable the serial port
- **Enabled DEFAULT** Enable the serial port

→ **Change Settings [Auto]**

Use the **Change Settings** option to change the serial port IO port address and interrupt address.

- **Auto DEFAULT** The serial port IO port address and interrupt address are automatically detected.
- **IO=2D0h; IRQ=10** Serial Port I/O port address is 2D0h and the interrupt address is IRQ10
- **IO=3E8h; IRQ=3, 4,5,6,7,10,11,12** Serial Port I/O port address is 3E8h and the interrupt address is IRQ3,4,5,6,7,10,11,12
- **IO=2E8h; IRQ=3, 4,5,6,7,10,11,12** Serial Port I/O port address is 2E8h and the interrupt address is IRQ3,4,5,6,7,10,11,12
- **IO=2D0h; IRQ=3, 4,5,6,7,10,11,12** Serial Port I/O port address is 2D0h and the interrupt address is IRQ3,4,5,6,7,10,11,12
- **IO=2D8h; IRQ=3, 4,5,6,7,10,11,12** Serial Port I/O port address is 2D8h and the interrupt address is IRQ3,4,5,6,7,10,11,12

5.3.7.1.5 Serial Port 6 Configuration

→ **Serial Port [Enabled]**

Use the **Serial Port** option to enable or disable the serial port.

- ➔ Disabled Disable the serial port
- ➔ Enabled **DEFAULT** Enable the serial port

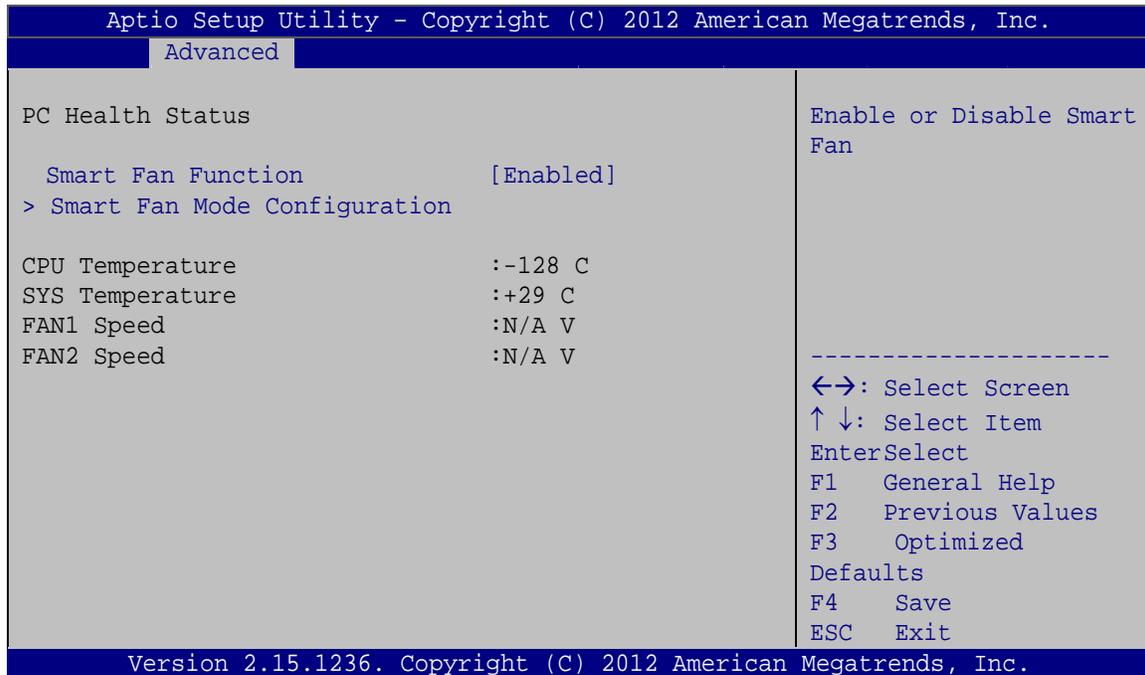

➔ **Change Settings [Auto]**

Use the **Change Settings** option to change the serial port IO port address and interrupt address.

- ➔ **Auto** **DEFAULT** The serial port IO port address and interrupt address are automatically detected.
- ➔ **IO=2D8h; IRQ=10** Serial Port I/O port address is 2D8h and the interrupt address is IRQ10
- ➔ **IO=3E8h; IRQ=3, 4,5,6,7,10,11,12** Serial Port I/O port address is 3E8h and the interrupt address is IRQ3,4,5,6,7,10,11,12
- ➔ **IO=2E8h; IRQ=3, 4,5,6,7,10,11,12** Serial Port I/O port address is 2E8h and the interrupt address is IRQ3,4,5,6,7,10,11,12
- ➔ **IO=2D0h; IRQ=3, 4,5,6,7,10,11,12** Serial Port I/O port address is 2D0h and the interrupt address is IRQ3,4,5,6,7,10,11,12
- ➔ **IO=2D8h; IRQ=3, 4,5,6,7,10,11,12** Serial Port I/O port address is 2D8h and the interrupt address is IRQ3,4,5,6,7,10,11,12

5.3.8 F81866 H/W Monitor

The **F8186 H/W Monitor** menu (**BIOS Menu 11**) shows the operating temperature, fan speeds and system voltages.

BIOS Menu 11: Hardware Health Configuration

→ PC Health Status

The following system parameters and values are shown. The system parameters that are monitored are:

- System Temperatures:
 - CPU Temperature
 - SYS Temperature
- Fans Speeds:
 - FAN1 Speed
 - FAN2 Speed

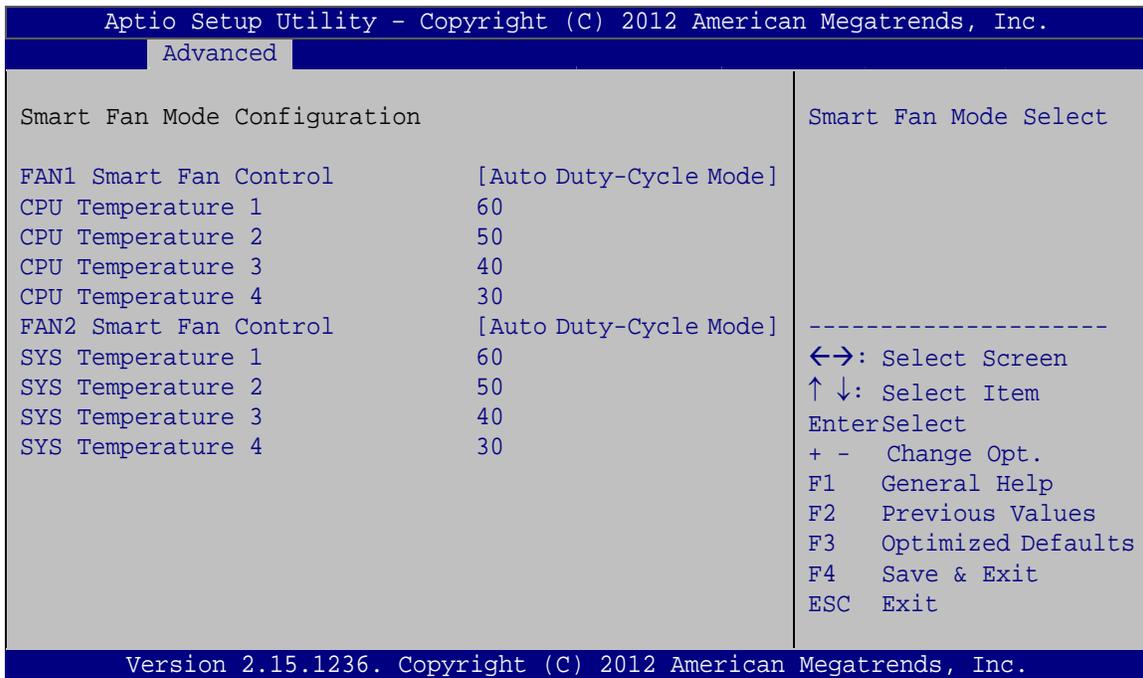

→ Smart Fan Function [Enabled]

Use the **Smart Fan Function** option to enable or disable the smart fan function.

- ➔ **Disabled** Disables the smart fan function.
- ➔ **Enabled** **DEFAULT** Enables the smart fan function.

5.3.8.1 Smart Fan Mode Configuration

Use the **Smart Fan Mode Configuration** submenu (**BIOS Menu 12**) to configure the smart fan temperature and speed settings.

BIOS Menu 12: FAN 1 Configuration

➔ **FAN1 Smart Fan Control [Auto Duty-Cycle Mode]**

Use the **FAN1 Smart Fan Control** option to configure the CPU Smart Fan.

- ➔ **Manual Duty Mode** The fan spins at the speed set in Manual by Duty Cycle settings
- ➔ **Auto Duty-Cycle Mode** **DEFAULT** The fan adjusts its speed using Auto by Duty-Cycle settings

KINO-KBN-i2**→ CPU Temperature n**

Use the + or – key to change the fan **CPU Temperature n** value. Enter a decimal number between 1 and 100.

→ FAN2 Smart Fan Control [Auto Duty-Cycle Mode]

Use the **FAN2 Smart Fan Control** option to configure the System Smart Fan.

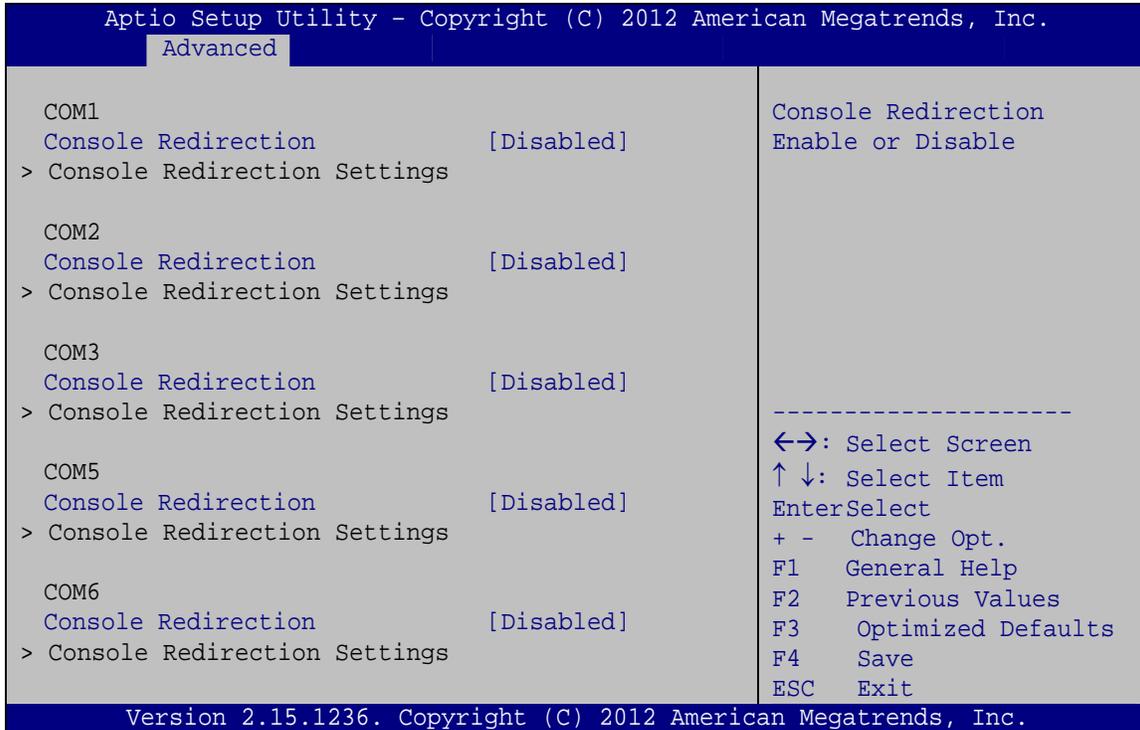

- | | | |
|----------|-----------------------------|--|
| → | Manual Duty Mode | The fan spins at the speed set in Manual by Duty Cycle settings |
| → | Auto Duty-Cycle Mode | DEFAULT The fan adjusts its speed using Auto by Duty-Cycle settings |

→ SYS Temperature n

Use the + or – key to change the fan **SYS Temperature n** value. Enter a decimal number between 1 and 100.

5.3.9 Serial Port Console Redirection

The **Serial Port Console Redirection** menu (**BIOS Menu 13**) allows the console redirection options to be configured. Console redirection allows users to maintain a system remotely by re-directing keyboard input and text output through the serial port.

BIOS Menu 13: Serial Port Console Redirection

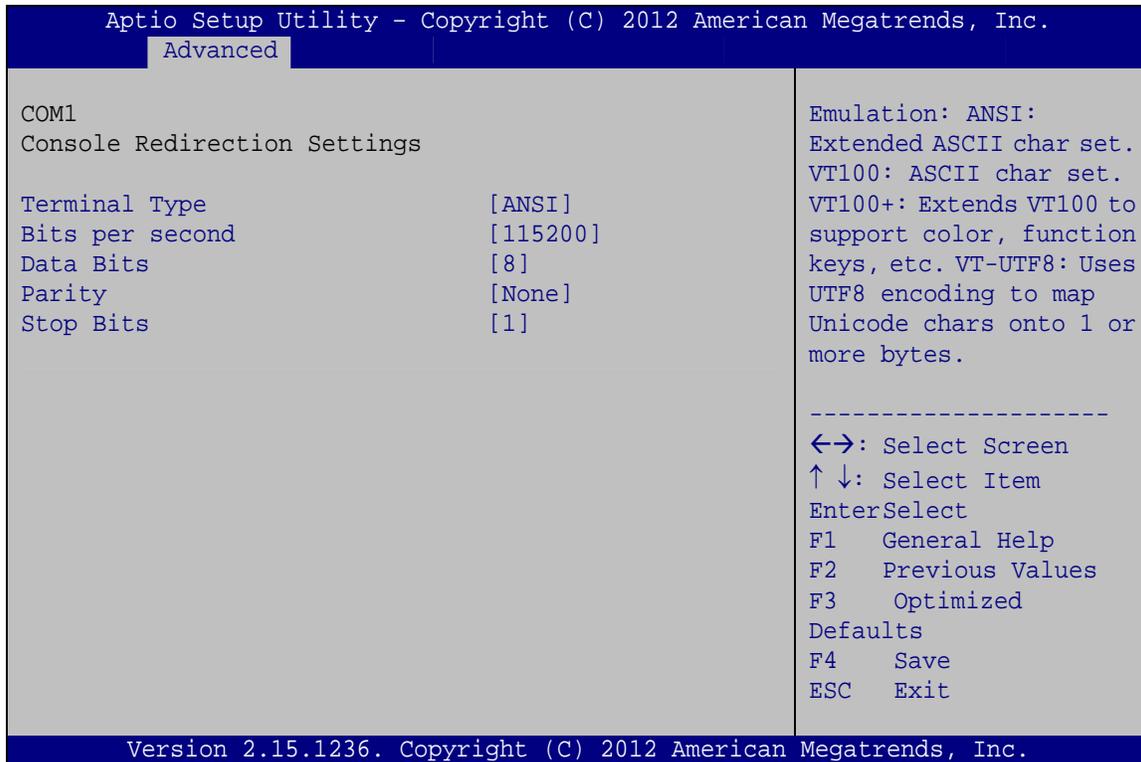

➔ **Console Redirection [Disabled]**

Use **Console Redirection** option to enable or disable the console redirection function.

- ➔ **Disabled** **DEFAULT** Disabled the console redirection function
- ➔ **Enabled** Enabled the console redirection function

5.3.9.1 Console Redirection Settings

The **Console Redirection Settings** menu (**BIOS Menu 14**) allows the console redirection options to be configured. The option is active when Console Redirection option is enabled.

BIOS Menu 14: Console Redirection Settings

➔ **Terminal Type [ANSI]**

Use the **Terminal Type** option to specify the remote terminal type.

- ➔ **VT100** The target terminal type is VT100
- ➔ **VT100+** The target terminal type is VT100+
- ➔ **VT-UTF8** The target terminal type is VT-UTF8
- ➔ **ANSI** **DEFAULT** The target terminal type is ANSI

➔ **Bits per second [115200]**

Use the **Bits per second** option to specify the serial port transmission speed. The speed must match the other side. Long or noisy lines may require lower speeds.

- ➔ **9600** Sets the serial port transmission speed at 9600.
- ➔ **19200** Sets the serial port transmission speed at 19200.

- **38400** Sets the serial port transmission speed at 38400.
- **57600** Sets the serial port transmission speed at 57600.
- **115200** **DEFAULT** Sets the serial port transmission speed at 115200.

→ **Data Bits [8]**

Use the **Data Bits** option to specify the number of data bits.

- **7** Sets the data bits at 7.
- **8** **DEFAULT** Sets the data bits at 8.

→ **Parity [None]**

Use the **Parity** option to specify the parity bit that can be sent with the data bits for detecting the transmission errors.

- **None** **DEFAULT** No parity bit is sent with the data bits.
- **Even** The parity bit is 0 if the number of ones in the data bits is even.
- **Odd** The parity bit is 0 if the number of ones in the data bits is odd.
- **Mark** The parity bit is always 1. This option does not provide error detection.
- **Space** The parity bit is always 0. This option does not provide error detection.

→ **Stop Bits [1]**

Use the **Stop Bits** option to specify the number of stop bits used to indicate the end of a serial data packet. Communication with slow devices may require more than 1 stop bit.

- **1** **DEFAULT** Sets the number of stop bits at 1.
- **2** Sets the number of stop bits at 2.

5.4 Chipset

Use the **Chipset** menu (**BIOS Menu 15**) to access the PCH-IO and System Agent (SA) configuration menus.

WARNING!

Setting the wrong values for the Chipset BIOS selections in the Chipset BIOS menu may cause the system to malfunction.

BIOS Menu 15: Chipset

5.4.1 GFX Configuration

Use the **GFX Configuration** menu (**BIOS Menu 16**) to configure the video device connected to the system.

BIOS Menu 16: GFX Configuration

→ **UMA Frame Buffer Size [256M]**

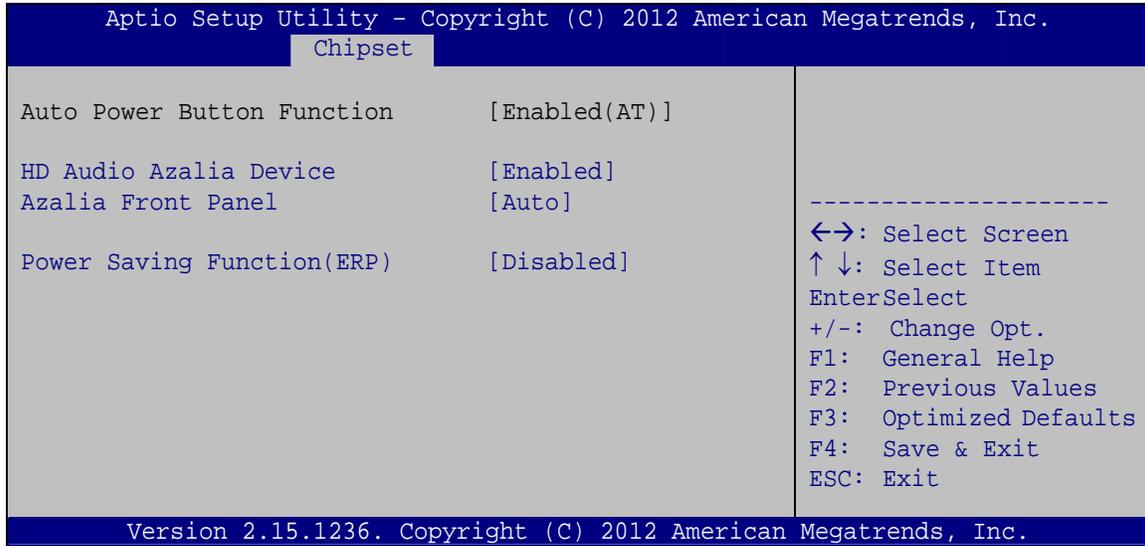

Use the **UMA Frame Buffer** option to specify the amount of system memory that can be allocated as graphics memory. Configuration options are listed below.

- 32M
- 64M
- 128M
- 256M **DEFAULT**
- 512M

5.4.2 South Bridge Configuration

Use the **South Bridge Configuration** menu (**BIOS Menu 17**) to configure the South Bridge chipset.

KINO-KBN-i2

BIOS Menu 17: South Bridge Configuration

→ HD Audio Azalia Device [Enabled]

Use the **HD Audio Azalia Device** option to enable or disable the High Definition Audio controller.

- **Auto** The onboard High Definition Audio controller will be enabled if present, disabled otherwise.
- **Disabled** The onboard High Definition Audio controller is disabled
- **Enabled** **DEFAULT** The onboard High Definition Audio controller is detected automatically and enabled

→ Azalia Front Panel [Enabled]

Use the **Azalia Front Panel** option to enable or disable the front panel audio controller.

- **Auto** The front panel audio controller will be enabled if present, disabled otherwise.
- **Disabled** The front panel audio controller is disabled
- **Enabled** **DEFAULT** The front panel audio controller is detected automatically and enabled

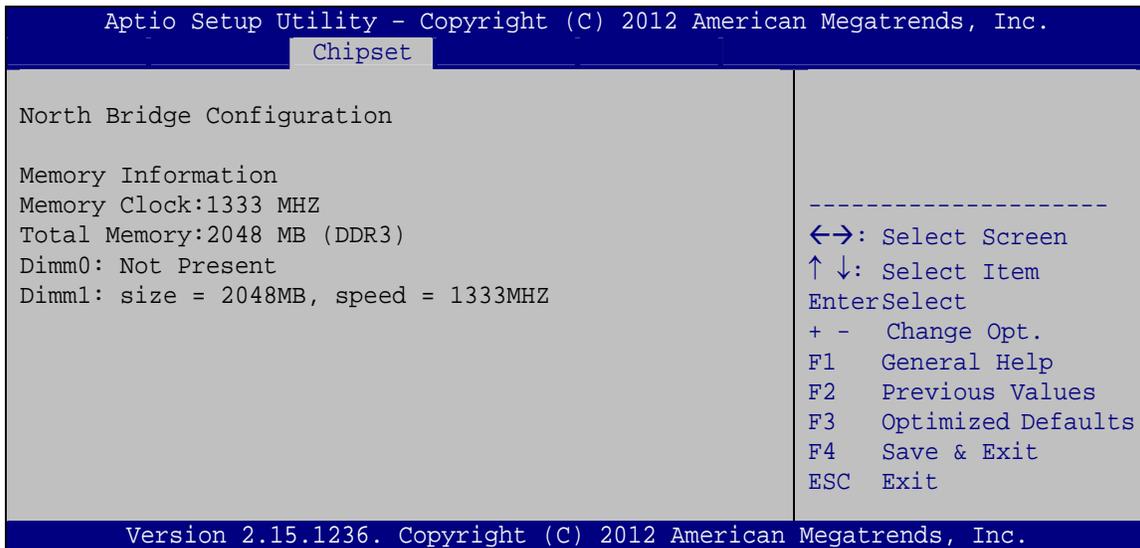

➔ **Power Saving Function(ERP) [Disabled]**

Use the **Power Saving Function** BIOS option to enable or disable the power saving function.

- ➔ **Disabled** **DEFAULT** Power saving function is disabled.
- ➔ **Enabled** Power saving function is enabled. It will reduce power consumption when the system is off.

5.4.3 North Bridge Configuration

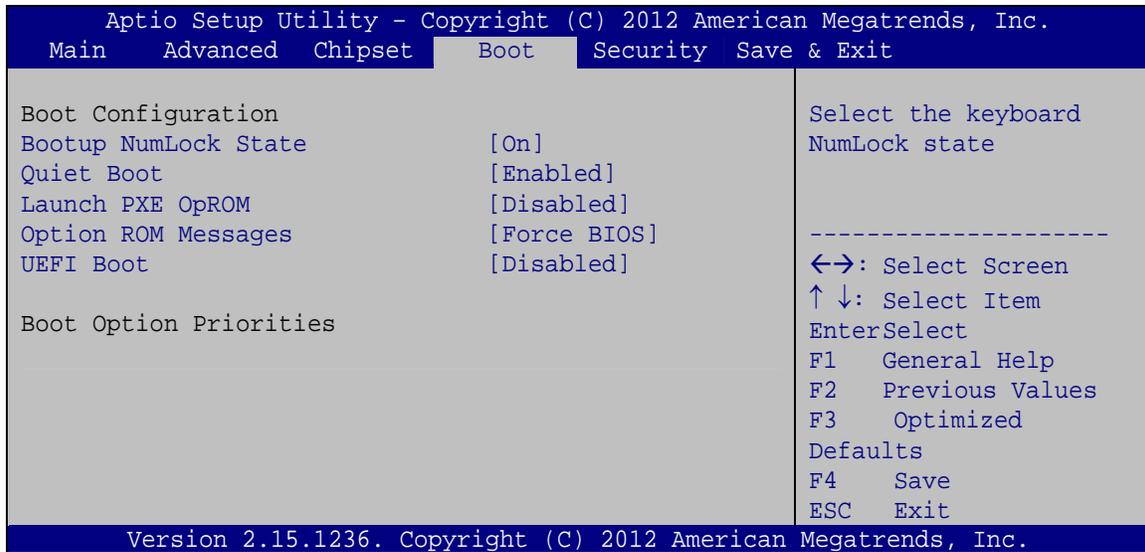

Use the **North Bridge** menu (**BIOS Menu 18**) to view the memory information.

BIOS Menu 18: North Bridge Configuration

5.5 Boot

Use the **Boot** menu (**BIOS Menu 19**) to configure system boot options.

BIOS Menu 19: Boot

→ Bootup NumLock State [On]

Use the **Bootup NumLock State** BIOS option to specify if the number lock setting must be modified during boot up.

→ **On** **DEFAULT** Allows the Number Lock on the keyboard to be enabled automatically when the computer system boots up. This allows the immediate use of the 10-key numeric keypad located on the right side of the keyboard. To confirm this, the Number Lock LED light on the keyboard is lit.

→ **Off** Does not enable the keyboard Number Lock automatically. To use the 10-keys on the keyboard, press the Number Lock key located on the upper left-hand corner of the 10-key pad. The Number Lock LED on the keyboard lights up when the Number Lock is engaged.

→ Quiet Boot [Enabled]

Use the **Quiet Boot** BIOS option to select the screen display when the system boots.

- **Disabled** Normal POST messages displayed
- **Enabled** **DEFAULT** OEM Logo displayed instead of POST messages

→ Launch PXE OpROM [Disabled]

Use the **Launch PXE OpROM** option to enable or disable boot option for legacy network devices.

- **Disabled** **DEFAULT** Ignore all PXE Option ROMs
- **Enabled** Load PXE Option ROMs.

→ Option ROM Messages [Force BIOS]

Use the **Option ROM Messages** option to set the Option ROM display mode.

- **Force BIOS** **DEFAULT** Sets display mode to force BIOS.
- **Keep Current** Sets display mode to current.

→ UEFI Boot [Disabled]

Use the **UEFI Boot** option to enable or disable to boot from the UEFI devices.

- **Auto** If the first boot HDD is GPT then enable UEFI boot options, otherwise disable,
- **Enabled** Boot from UEFI devices is enabled.
- **Disabled** **DEFAULT** Boot from UEFI devices is disabled.

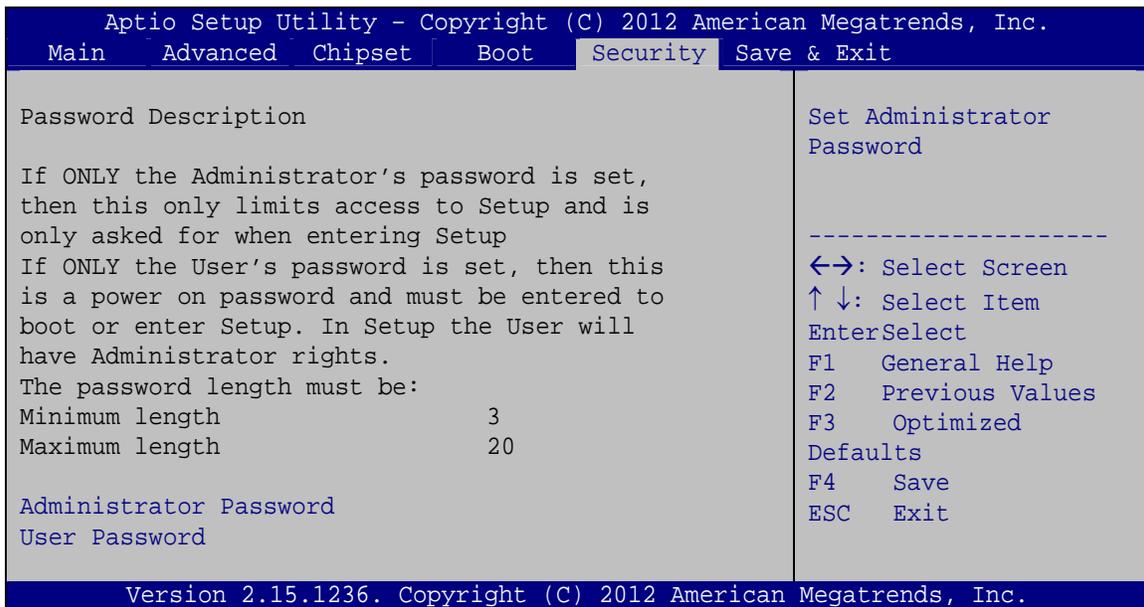

KINO-KBN-i2

→ Boot Option Priority

Use the **Boot Option Priority** function to set the system boot sequence from the available devices. The drive sequence also depends on the boot sequence in the individual device section.

5.6 Security

Use the **Security** menu (**BIOS Menu 20**) to set system and user passwords.

BIOS Menu 20: Security

→ Administrator Password

Use the **Administrator Password** to set or change a administrator password.

→ User Password

Use the **User Password** to set or change a user password.

5.7 Save & Exit

Use the **Save & Exit** menu (**BIOS Menu 21**) to load default BIOS values, optimal failsafe values and to save configuration changes.

```
Aptio Setup Utility - Copyright (C) 2012 American Megatrends, Inc.
Main   Advanced   Chipset   Boot   Security   Save & Exit

Save Changes and Reset
Discard Changes and Reset

Restore Defaults

F4   Save
ESC  Exit

Version 2.15.1236. Copyright (C) 2012 American Megatrends, Inc.
```

BIOS Menu 21:Exit

→ Save Changes and Reset

Use the **Save Changes and Reset** option to save the changes made to the BIOS options and to exit the BIOS configuration setup program.

→ Discard Changes and Reset

Use the **Discard Changes and Reset** option to exit the system without saving the changes made to the BIOS configuration setup program.

→ Restore Defaults

Use the **Restore Defaults** option to load the optimal default values for each of the parameters on the Setup menus. **F3 key can be used for this operation.**

→ Save as User Defaults

Use the **Save as User Defaults** option to save the changes done so far as user defaults.

→ Restore User Defaults

Use the **Restore User Defaults** option to restore the user defaults to all the setup options.

Appendix

A

Regulatory Compliance

DECLARATION OF CONFORMITY

This equipment has been tested and found to comply with specifications for CE marking. If the user modifies and/or installs other devices in the equipment, the CE conformity declaration may no longer apply.

FCC WARNING

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference, and
- This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

Appendix

C

Terminology

AC '97	Audio Codec 97 (AC'97) refers to a codec standard developed by Intel® in 1997.
ACPI	Advanced Configuration and Power Interface (ACPI) is an OS-directed configuration, power management, and thermal management interface.
AHCI	Advanced Host Controller Interface (AHCI) is a SATA Host controller register-level interface.
ATA	The Advanced Technology Attachment (ATA) interface connects storage devices including hard disks and CD-ROM drives to a computer.
APM	The Advanced Power Management (APM) application program interface (API) enables the inclusion of power management in the BIOS.
ARMD	An ATAPI Removable Media Device (ARMD) is any ATAPI device that supports removable media, besides CD and DVD drives.
ASKIR	Amplitude Shift Keyed Infrared (ASKIR) is a form of modulation that represents a digital signal by varying the amplitude (“volume”) of the signal. A low amplitude signal represents a binary 0, while a high amplitude signal represents a binary 1.
BIOS	The Basic Input/Output System (BIOS) is firmware that is first run when the computer is turned on and can be configured by the end user
CODEC	The Compressor-Decompressor (CODEC) encodes and decodes digital audio data on the system.
CMOS	Complimentary metal-oxide-conductor is a type of integrated circuit used in chips like static RAM and microprocessors.
COM	COM is used to refer to serial ports. Serial ports offer serial communication to expansion devices. The serial port on a personal

	computer is usually a male DE-9 connector.
DAC	The Digital-to-Analog Converter (DAC) converts digital signals to analog signals.
DDR	Double Data Rate refers to a data bus transferring data on both the rising and falling edges of the clock signal.
DMA	Direct Memory Access (DMA) enables some peripheral devices to bypass the system processor and communicate directly with the system memory.
DIMM	Dual Inline Memory Modules are a type of RAM that offer a 64-bit data bus and have separate electrical contacts on each side of the module.
EHCI	The Enhanced Host Controller Interface (EHCI) specification is a register-level interface description for USB 2.0 Host Controllers.
GbE	Gigabit Ethernet (GbE) is an Ethernet version that transfers data at 1.0 Gbps and complies with the IEEE 802.3-2005 standard.
GPIO	General purpose input
IrDA	Infrared Data Association (IrDA) specify infrared data transmission protocols used to enable electronic devices to wirelessly communicate with each other.
L1 Cache	The Level 1 Cache (L1 Cache) is a small memory cache built into the system processor.
L2 Cache	The Level 2 Cache (L2 Cache) is an external processor memory cache.
LVDS	Low-voltage differential signaling (LVDS) is a dual-wire, high-speed differential electrical signaling system commonly used to connect LCD displays to a computer.
MAC	The Media Access Control (MAC) protocol enables several terminals or network nodes to communicate in a LAN, or other multipoint networks.

KINO-KBN-i2

PCIe	PCI Express (PCIe) is a communications bus that uses dual data lines for full-duplex (two-way) serial (point-to-point) communications between the SBC components and/or expansion cards and the SBC chipsets. Each line has a 2.5 Gbps data transmission rate and a 250 MBps sustained data transfer rate.
POST	The Power-on Self Test (POST) is the pre-boot actions the system performs when the system is turned-on.
QVGA	Quarter Video Graphics Array (QVGA) refers to a display with a resolution of 320 x 240 pixels.
RAM	Random Access Memory (RAM) is a form of storage used in computer. RAM is volatile memory, so it loses its data when power is lost. RAM has very fast data transfer rates compared to other storage like hard drives.
SATA	Serial ATA (SATA) is a serial communications bus designed for data transfers between storage devices and the computer chipsets. The SATA bus has transfer speeds up to 1.5 Gbps and the SATA 3Gb/s bus has data transfer speeds of up to 3.0 Gbps.
S.M.A.R.T	Self Monitoring Analysis and Reporting Technology (S.M.A.R.T) refers to automatic status checking technology implemented on hard disk drives.
UART	Universal Asynchronous Receiver-transmitter (UART) is responsible for asynchronous communications on the system and manages the system's serial communication (COM) ports.
UHCI	The Universal Host Controller Interface (UHCI) specification is a register-level interface description for USB 1.1 Host Controllers.
USB	The Universal Serial Bus (USB) is an external bus standard for interfacing devices. USB 1.1 supports 12Mbps data transfer rates, while

USB 2.0 supports 480Mbps data transfer rates.

VGA

The Video Graphics Array (VGA) is a graphics display system developed by IBM.

Appendix

D

Digital I/O Interface

D.1 Introduction

The DIO connector on the KINO-KBN-i2 is interfaced to GPIO ports on the Super I/O chipset. The DIO has both 4-bit digital inputs and 4-bit digital outputs. The digital inputs and digital outputs are generally control signals that control the on/off circuit of external devices or TTL devices. Data can be read or written to the selected address to enable the DIO functions.

NOTE:

For further information, please refer to the datasheet for the Super I/O chipset.

The BIOS interrupt call **INT 15H** controls the digital I/O.

INT 15H:

AH – 6FH
<u>Sub-function:</u>
AL – 8 : Set the digital port as INPUT
AL : Digital I/O input value

KINO-KBN-i2

D.2 Assembly Language Sample 1

```

MOV     AX, 6F08H      ;setting the digital port as input
INT     15H           ;

```

AL low byte = value

AH – 6FH
<u>Sub-function:</u>
AL – 9 : Set the digital port as OUTPUT
BL : Digital I/O input value

D.3 Assembly Language Sample 2

```

MOV     AX, 6F09H      ;setting the digital port as output
MOV     BL, 09H        ;digital value is 09H
INT     15H           ;

```

Digital Output is 1001b

Appendix

E

Watchdog Timer

**NOTE:**

The following discussion applies to DOS environment. IEI support is contacted or the IEI website visited for specific drivers for more sophisticated operating systems, e.g., Windows and Linux.

The Watchdog Timer is provided to ensure that standalone systems can always recover from catastrophic conditions that cause the CPU to crash. This condition may have occurred by external EMI or a software bug. When the CPU stops working correctly, Watchdog Timer either performs a hardware reset (cold boot) or a Non-Maskable Interrupt (NMI) to bring the system back to a known state.

A BIOS function call (INT 15H) is used to control the Watchdog Timer:

INT 15H:

AH – 6FH Sub-function:	
AL – 2:	Sets the Watchdog Timer's period.
BL:	Time-out value (Its unit-second is dependent on the item "Watchdog Timer unit select" in CMOS setup).

Table E-1: AH-6FH Sub-function

Call sub-function 2 to set the time-out period of Watchdog Timer first. If the time-out value is not zero, the Watchdog Timer starts counting down. While the timer value reaches zero, the system resets. To ensure that this reset condition does not occur, calling sub-function 2 must periodically refresh the Watchdog Timer. However, the Watchdog timer is disabled if the time-out value is set to zero.

A tolerance of at least 10% must be maintained to avoid unknown routines within the operating system (DOS), such as disk I/O that can be very time-consuming.

**NOTE:**

When exiting a program it is necessary to disable the Watchdog Timer, otherwise the system resets.

Example program:

```
; INITIAL TIMER PERIOD COUNTER
;
W_LOOP:

    MOV     AX, 6F02H    ;setting the time-out value
    MOV     BL, 30H     ;time-out value is 48 seconds
    INT     15H

;
; ADD THE APPLICATION PROGRAM HERE
;

    CMP     EXIT_AP, 1  ;is the application over?
    JNE     W_LOOP     ;No, restart the application

    MOV     AX, 6F02H   ;disable Watchdog Timer
    MOV     BL, 0       ;
    INT     15H

;
; EXIT ;
```

Appendix

F

Hazardous Materials Disclosure

F.1 Hazardous Material Disclosure Table for IPB Products Certified as RoHS Compliant Under 2002/95/EC Without Mercury

The details provided in this appendix are to ensure that the product is compliant with the Peoples Republic of China (China) RoHS standards. The table below acknowledges the presences of small quantities of certain materials in the product, and is applicable to China RoHS only.

A label will be placed on each product to indicate the estimated “Environmentally Friendly Use Period” (EFUP). This is an estimate of the number of years that these substances would “not leak out or undergo abrupt change.” This product may contain replaceable sub-assemblies/components which have a shorter EFUP such as batteries and lamps. These components will be separately marked.

Please refer to the table on the next page.

KINO-KBN-i2

Part Name	Toxic or Hazardous Substances and Elements					
	Lead (Pb)	Mercury (Hg)	Cadmium (Cd)	Hexavalent Chromium (CR(VI))	Polybrominated Biphenyls (PBB)	Polybrominated Diphenyl Ethers (PBDE)
Housing	O	O	O	O	O	O
Display	O	O	O	O	O	O
Printed Circuit Board	O	O	O	O	O	O
Metal Fasteners	O	O	O	O	O	O
Cable Assembly	O	O	O	O	O	O
Fan Assembly	O	O	O	O	O	O
Power Supply Assemblies	O	O	O	O	O	O
Battery	O	O	O	O	O	O

O: This toxic or hazardous substance is contained in all of the homogeneous materials for the part is below the limit requirement in SJ/T11363-2006

X: This toxic or hazardous substance is contained in at least one of the homogeneous materials for this part is above the limit requirement in SJ/T11363-2006

此附件旨在确保本产品符合中国 RoHS 标准。以下表格标示此产品中某有毒物质的含量符合中国 RoHS 标准规定的限量要求。

本产品上会附有“环境友好使用期限”的标签，此期限是估算这些物质“不会有泄漏或突变”的年限。本产品可能包含有较短的环境友好使用期限的可替换元件，像是电池或灯管，这些元件将会单独标示出来。

部件名称	有毒有害物质或元素					
	铅 (Pb)	汞 (Hg)	镉 (Cd)	六价铬 (CR(VI))	多溴联苯 (PBB)	多溴二苯醚 (PBDE)
壳体	○	○	○	○	○	○
显示	○	○	○	○	○	○
印刷电路板	○	○	○	○	○	○
金属螺帽	○	○	○	○	○	○
电缆组装	○	○	○	○	○	○
风扇组装	○	○	○	○	○	○
电力供应组装	○	○	○	○	○	○
电池	○	○	○	○	○	○

○: 表示该有毒有害物质在该部件所有物质材料中的含量均在 SJ/T11363-2006 标准规定的限量要求以下。
 X: 表示该有毒有害物质至少在该部件的某一均质材料中的含量超出 SJ/T11363-2006 标准规定的限量要求。
